Betrothed Couples Target Of Dairy Promotion

BY
BONNIE HELLUM BRECHBILL
Franklin County Correspondent

CHAMBERSBURG — Engaged couples who apply for a marriage license in Franklin County will be getting something extra along with their license. The Franklin County Dairy Promotion Committee has put together a gift pack of dairy-related items which is being handed out by Franklin County Court personnel.

"As June is Dairy Month and also our busiest time for marriage licenses, the promotion is extremely timely," said Clerk of Courts Robert J. Woods of the first-time project.

The gift pack consists of a litter bag filled with dairy recipes, a key chain with the slogan "Milk — It's Fitness You Can Drink", exercise booklet, cholesterol counter, calorie chart, and a coupon for a free pound of butter.

According to Jane Upperman, Dairy Promotion Committee member, the recipe brochures were chosen for their appropriateness to a newly-married couple. Those included are: "Cooking for Two", and "Make it Fast in a Microwave". Upperman

The Harvest Season In Full Swing

The harvesting of barley got underway in full swing this week. As shown at the Allen Mellinger farm, 127 Herr Road. Dennis Groff from Strasburg is operating the combine.

By the time Lancaster Farming Editor Everett Newswanger caught up with this combine late Wednesday afternoon, the stage was set for another beautiful Lancaster County harvest scene. Groff said their combine had just started a few days ago but the grain was flowing to indicate a good barley crop this year.

Farming Is Still Nation's Most Hazardous Occupation

BY JACK HUBLEY

Everyone wants to be number one. Unless, of course, that honor refers to the occupation with the highest accident rate. In that case, no profession is eager to challenge farming's position at the head of the list.

One group that's working to relinquish top honors is the National Institute for Farm Safety, a group of American and Canadian farm safety professionals dedicated to whittling away at farming's casualty list. About 80 NIFS representatives from across the nation and Canada met at Lancaster's Treadway Resort Inn this week to discuss ways to make farming a safer occupation.

"The preliminary data suggest that we will again be the most hazardous occupation this year (1986)," says Dennis Murphy, Penn State's Extension safety specialist, who coordinated the 6-day meeting.

Murphy noted that, while the mining and construction industries have improved their safety record considerably in recent years, farming's accident rate has improved only slightly. Murphy attributed the situation to the fact that agriculture has no legislation or organized labor faction to delineate and enforce safety procedures. "The people themselves (farmers) want to be left alone," he said. "They accept it."

Tractor overturns are still the number-one cause of fatalities and serious injuries, Murphy said, followed by PTO entrapments and other equipment-related injuries.

Early Deadline

Because of the holiday the Lancaster Farming office will be closed on Friday, July 3

Public sale advertising deadline will be Monday, June 29 at 5 p m.

Sec B classified ad deadline will be Tuesday, June 30 at 5 p m

Sec C classified ad deadline will be Wednesday, July 1 at 9 a.m

Small Grains Featured At SE Research Farm Field Day

BY JACK HUBLEY

LANDISVILLE — New winter barley varieties, winter wheat nitrogen requirements and small grains as forages were some of the highlights of a field day held at Penn State's Southeastern Field Research Laboratory in Landisville on Wednesday.

Small grain breeder Dr. Marvin Risius kicked off the tour of test plots with the introduction of two new winter barley varieties on test at the facility Released jointly by Penn State and USDA's Agricultural Research Service, a new variety called Pennco outyielded other varieties including Maury, Pennrad and Barsoy, and showed good resistance to net blotch, leaf rust and powdery mildew, according to Risius

A high yielding variety from Virginia, Wysor showed good resistance to powdery mildew and scald. This barley was four days earlier than Maury but not as winter hardy. Maury seed is currently available, while Pennco should be available in the fall of 1988. "Both have performed very well in this part of the state," Risius summed up.

Nitrogen and Winter Wheat

Nitrogen application is more

FARM BUREAU ACRES

FUTURES MARKET TRENDS GRAIN AND LIVESTOCK

This market information provided by ACRES. ACRES is a copyrighted market information service developed by the American Farm Bureau and available to Pennsylvania farmers on a daily basis through Pennsylvania Farmers' Association Farm Management Services. For additional market comments and trading service contact PFA Commodity Futures Service (717) 761 2740

ACRES CORN UPDATE: Corn futures settled lower on widespread long liquidation as a result of nervousness over forecasts for rain in the eastern corn region over the weekend. Western belt rains last night were thought to be insufficient; but noon day weather forecasts failed to give any new significant weather information to offset the downtrend. Supporting further losses was the lack of significant movement in the country.

ACRES SOYBEAN UPDATE: Soybeans closed sharply lower but above session lows as the soybean meal plunged and a more bearish assessment of weather prospects. Soymeal broke on ideas that increased CCC bean resales would result in a higher crush pace. July soybeans closed 9-1/4 lower at $5.7325 as March '88 closed down 13 cents at $6.10.

ACRES WHEAT UPDATE: Wheat futures settled mixed with the deferreds remaining unchanged to gaining one cent as the harvest in the midwest is stalled due to rain. Nearbys were from 3/4 cents lower to 1-1/2 cent lower. No new news from the Soviet Union lent some stability to today's trading.

ACRES CATTLE UPDATE: Live cattle futures settled higher from $.20 in the June option to $ .73 in the February '88 option which closed at $ 65.10. This market is still reacting to ideas the market is underpriced amid expections for tight supplies and strong feedlot demand. Buying in feeders was also prompted by significantly lower feed prices.

ACRES NEXT DAY OUTLOOK FOR CATTLE: cash-steady to weak futures-steady to higher

ACRES HOG UPDATE: Live hog futures closed higher with bellies closing limit-up in July and August and June hogs closed 10 points from a limit gain. Light interior movement sparked buying sprees in both pits and the posting of new cash highs at terminals markets.

Northeast Chicken Parts

Thursday, June 18, 1987

Comment: Trading was improved and fairly good on leg quarters and legs, light to fair and only slightly better on breast items. Cutlets were adequate to fully adequate for a fair call. Line-run breasts were in good balance at 70 cents and generally a willingness by both buyers and sellers to schedule at this level. Rib breasts were fully adequate to occasionally ample and slow to clear in a few quarters. Leg quarters were moving well and sales under 25 cents were limited today. Legs were moving better but the demand was not as strong when compared to leg quarters. Wings were in good balance, and clearances were quite satisfactory at current price levels.

Breasts, skinned, boneless 1.70-1.75.
Rib-on-breasts .77-.78.
Line run breasts .70.
Legs .36-.37.
Leg quarters .25-.26.
Wings .43-.44.
Backs and necks .11-.12.
Livers .15-.20.
Gizzards (hearts) .15-.20.

Today's negotiated sales as of 11:30 a.m. prices paid per pound on ice packed part delivered in pool trucklot and trucklot quantities.

Tour Planned

COUDERSPORT — Pennsylvania Secretary of Agriculture Boyd Wolff will tour farms in Potter County July 23.

The tour, sponsored by the Tioga-Potter Pennsylvania Farmers' Association and the Potter County Extension Service will begin at 1 p.m. and visit several farms which represent the type of agriculture in the county. The day will conclude with a reception and picnic at 7 p.m. at the Kosa family farm in Ulysses.

In addition to Wolff, Lamartine F. Hood, dean of the Penn State College of Agriculture, Senator John E. Peterson and Representative Edgar A. Carlson will be participating in the farm tour.

OPINION

Beauty And The Barnyard

We got hold of a farm magazine that is over 55 years old last week at the Pharis Landis sale north of Witmer. The pictures and advertising in the issue dated 1931 captured our interest. So did the story entitled, "Beauty And The Barnyard."

C.D. Steiner of Putnam County, Ohio, says, "No path or walk on the farm is trod more than the one leading from the house to the barn. To one who spends a lifetime on the farm, it should make quite a difference at the end of life's road whether this much traveled path goes past manure piles, broken down fences and gates, unsightly buildings, clumps of weeds, worn-out farm machinery, board and junk piles or whether it leads through bowers of beauty and cool shade or flower-bordered walks where one would love to linger. There is a holiness of beauty as well as a beauty of holiness. Beautiful scenes fit one much better to do the work of the day than unsightly ones. And they add much to the sum total of one's physical, mental and spiritual attainment."

No spot on the farm is more important than this one between the house and barn. On many farms it is just so much wasteland where weeds are allowed to grow, machinery is junked and trash is permited to accumulate. On others it is a place of rare beauty, a picture gallery for those who pass back and forth on errands and to their work. They find joy, inspiration, rest and comfort to body, mind and sole.

The area between the house and barn, if attractive, sets off a home as well as very few things can. No matter how fine the house or how well kept the barn, if this twilight zone between house and barn is not made and kept attractive, the homestead will have lost much of its beauty and charm.

As you know, all across Pennsylvania right now, dairy farms are being judged by a panel in each of 10 districts. And the top 10 farms in each district will soon be awarded Dairy of Distinction signs and certificates. This program involves farm beautification for the benefit of consumers of milk who drive past the farm.

But as Steiner wrote so long ago, it may be that beauty in the barnyard benefits even the farm family, too.

FARM FORUM OUR READERS WRITE

Editor:

I was happy to read that someone spoke up about the judge's decision in the Robert Frame hearing. I saw one small article about it in your paper and that seemed to be the end of it. Of course it isn't for us farmers! It goes on and on.

I wish we could get all our organized farm groups, young farmers, farm women and so on to write to their legislatures and let it be known how we feel. It isn't fair for the farmer to have to pay all the advertising.

The Pork Board approved a 1987 budget of $18 million, including an operating budget for the board itself of $1.58 million to cover administration, collection costs and producer communications.

The Pennsylvania Milk Board approved a budget of $2.4 million. $139,500 is used for administration, accounting, advisory board and contingency. All this money is taken from the farmers' checks and is giving someone else an agrelated job. I hope they have eight-hour jobs and can sit in air-conditioned offices at our expense.

I talked to three different persons over the weekend on a bus I was traveling on, and they said they wish they could buy some good milk. I've always said, "After the dairy has it, it isn't tasty any more. I'm not proud to have to advertise an inferior product.

I was in a restaurant where they didn't have milk to sell and another where chocolate milk was $1.20 for large and $1.00 for small. I didn't buy it, and I think this is the reason why our products aren't selling.

Our milk dropped .87/cwt. the last two months. My ice cream man was here yesterday and told me ice cream went up 10 cents for two quarts. Strange isn't it! Who is making all the money.

Let's write or call our legislators and try and help ourselves. I have gotten some favorable response from my U.S. senator.

Jonestown

NOW IS THE TIME

By Jay Irwin
Lancaster County Agriculture Agent

To Control Flies

The good growing conditions we'e experienced this spring for field crops also favor the build-up of fly populations. The needed moisture presents ideal conditions for maggots to develop into flies. We suggest that livestock and poultry operators use residual insecticides on their buildings and pit walls to cut down on fly problems. Also, you may want to use different materials at different intervals to break the cycle. Flies are immune to most of the old-line materials. Fly baits along with the spray are also recommended. Follow label instructions for rate of application.

One of the most important practices in keeping down the number of flies is to clean up the place and eliminate fly breeding areas. Manure packs and other debris are good fly breeding places.

Good sanitation along with insecticides goes a long way in keeping flies under control.

To Feed Dry Matter on Pasture

Pastures are lush due to the good moisture content. This means that livestock can utilize some dry matter while on pasture. This can include hay, straw or silage. With the dry matter present, they will consume a moderate amount along with the fresh grass.

The dry matter slows down the passage of the lush forage through the digestive system. Also, it reduces the danger of bloating when there is clover or alfalfa in the forage mixture. If the animals are out all of the time, then a portable hay rack would be the way to feed hay or straw. Dry matter intake is important when pastures are lush and high in water content.

To Check Lighting for Layers

One of the cardinal rules for poultry management is to never decrease the light period of flocks in production. Most flock managers would never intentionally decrease the day length to a flock in production but we are in the season of the year when this can happen accidentally.

Most layers are in a light-controlled not light-tight housing. The major sources of light leakage are the exhaust fans and air intake. Pullet flocks placed in the laying house during late fall, winter or spring can be given a 14 hour day. As summer approaches and natural day length exceeds 14 hours, layers in non-light tight housing will be exposed to an increasing day length due to the light entering the building through fans and air intakes.

This increases in day length causes no problem. The longest day occurs on June 21 and decreases until December 21. It is this decrease in day length that can cause layers to go out of production unless the time clocks controlling the lights are readjusted to provide the layers with the day length they received on June 21.

To Renovate Strawberries

Since the harvest of the strawberry crop is nearly over, it is a good time to plant for next year. In most cases, plants that have yielded two or more crops cannot be expected to do as well in the future. However, if the current planting is to be used for another year we suggest that the rows be worked by the use of mechanical cultivation and followed by top-dressing with fertilizer. These practices will keep the berry plants in a row and encourage additional runners to increase next year's yield.

In the case of a new planting of strawberries, we urge you to fertilize them in June and again in early August. This extra plant food will enable the setting of runners and will help increase yield next year.

Farm Calendar

Saturday, June 20

Orange County, N.Y., Dairy Judging Tour, Orange County Fairgrounds, Middletown, N.Y.

Lancaster County Dairy Princess Pageant, Farm and Home Center, Lancaster.

Sun Area and Montour Counties Dairy Princess Pageant, Shamokin Dam.

Wayne County Conservation Workshop, Lacawac Sanctuary.

Pa. Beekeepers Association summer picnic and meeting, McVeytown Playground.

THE BIBLE SPEAKS

BY LAWRENCE W. ALTHOUSE

HOW GOOD ARE YOU?

June 21, 1987

Background Scripture: Romans 2:1 through 3:26.

Devotional Reading: Romans 2:5-11.

A man once told me that he had overheard his pastor describe him as "a good Christian." "At first," he told me, "I felt very gratified. But as I thought more and more about what he had said, I wasn't sure that I was really "a good Christian." A good Methodist, perhaps. But Christian? I'm not so sure."

Jesus also had trouble with being called "good." "Why do you call me good?" Jesus said to a man one day. "No one is good but God alone" (Mark 10:18). Any earthly virtue, no matter how great, is but a shadow of the divine virtue of God. Thus, when we are asked, "How good are you?", we can say without false modesty: "Not good enough."

Writing to the church at Rome, Paul went to great pains to impress upon these Christians that God desires of us performance, not profession. We can read between the lines and assume that some of the Christians at Rome believed that they were saved by their right beliefs, by subscribing to right doctrines. But Paul, speaking of the Last Judgement, says "he will render to every man according to his works" (Romans 2:6). Not according to beliefs, not according to words, but according to works.

Christians, then and now, assumed that they earned God's favor by listening to Christian preaching and agreeing with it. (If that sounds a bit fanciful, consider the man I visited in the hospital who said to me: "All these years of going to church and look what's happened to me!"). But Paul says, "it is not the hearers of the law who are righteous before God, but the doers of the law who will be justified" (2:13).

Paul then lifts up the example of Gentiles "who have not the law," but who "do by nature what the law requires" (2:14). The Gentiles should be moral miles behind any good Jew, but some of them, Paul observed, were already more virtuous in their deeds than those who had been raised on the law of Israel. Paul wrote those words a long time ago, but they are no less applicable today. Lots of Christians who know the Gospel, are less likely to do it than non-Christians who presumably wouldn't know better. I have personally sometimes encountered more true "brotherhood" in a secular setting than I have in the church. These people, who don't have the advantage we have as Christians, still live as good as or better sometimes than we. Paul explains: "They show that what the law requires is written on their hearts..." (2:15).

Attending worship regularly, pledging, contributing and being active in your church are worthwhile only to the degree that they motivate and help you to live as Christ commands. Being a "good" Christian means being truly Christian within, just as Paul observed that "He is a Jew who is one inwardly, and real circumcision is a matter of the heart, spiritual and not literal" (2:23).

There is also another implication for those of us who call ourselves Christians: a higher level of "goodness" is expected of us because we know what Christ desires of us. Thus, to be "as good" as others who do not profess Christianity is not enough. We are called to be more loving, more compassionate, more willing to serve, more ready to redeem and forgive than those who do not look to Christ. Having the gospel is not only a great privilege, it is also a tremendous responsibility.

Omaha Weekly

Thurs., June 18
Report Supplied by USDA

Slaughter steers and heifers closed the week 2.00-3.00 lower when compared to the previous week. Lower dressed beef prices in both the carcass and boxed beef channels were the dominant factors for the decline. Buyer demand still continues good for those with expected large percentage of choice carcasses on the rail. Slaughter cows closed 1.00 higher, slaughter bulls 2.00 higher.

Estimated 5 day receipts of cattle this week 4,600 compared to actuals last week of 4,372 and 5,303 last year. Slaughter steers accounted for 51 percent of receipts this week. Slaughter heifers 35 percent, slaughter cows 12 percent, feeder cattle 1 percent.

SLAUGHTER STEERS: (Closing Sales) Choice 2-4 1100-1300 lbs. 69.00-70.00; Good and Choice 2-3 1050-1250 lbs. 67.00-69.00.

SLAUGHTER HEIFERS: (Closing sales) Choice 2-4 1025-1150 lbs. 68.50-69.00; Good and Choice 2-3 950-1050 lbs. 65.00-67.50.

Average of LS 214 detailed price quotations for Choice 900-1100 lb. steers this week $68.25, 1100-1300 lbs. $69.92. Average for Choice 700-900 lb. heifers $66.00, 900-1100 lbs. $68.75.

Average cost and weight this week: Steers: Choice 1179 lbs. 70.62; Good 1234 lbs. 63.61; All 1204 lbs. 67.30. Heifers: Choice 1038 lbs. 69.03; Good 1003 lbs. 65.51; All 1026 lbs. 67.87.

Last week: Steers: Choice 1206 lbs. 71.66; Good 1181 lbs. 65.90; All 1195 lbs. 69.30. Heifers: Choice 1049 lbs. 69.95; Good 1031 lbs. 67.09; All 1045 lbs. 69.28.

SLAUGHTER COWS: (Closing sales) Cutt, Util, Comm 2-3 Breaking 42.50-47.50 bulk; Boning 43.00-48.00 bulk, Hi Dress % 48.00-49.50; Canner and Cutter 41.00-44.00 bulk, Low Dress % 40.00-42.00.

SLAUGHTER BULLS: (Closing sales) Yield Grade 1-2 1400-1900 lbs. 55.50-59.50 bulk.

Frederick Livestock

Monday, June 15, 1987

BUTCHER COWS: 1.00 higher. Good 47.00-51.25; Canners 39.00-Utility 43.00-46.00; Canners 39.00-43.00; Shelly 41.00 down.

BULLS: Good 54.00-58.25; Medium 53.00-54.00.

STEERS: Standard 55.00-57.50.

HEIFERS: Good 53.00-56.75.

BUTCHER HOGS: 2.00 higher. 220-240 lbs. 60.25-61.50; 190-205 lbs. 59.00-60.00. Sows 300-600 lbs. 44.00-47.75; Thin Sows: 40.00-43.00.

VEAL CALVES: Heavy calves 5.00 higher- light calves 2.00 lower; Good-Choice 85.00-95.00; Standard 75.00-83.00; Stocky & Thin 65.00-74.00; Light Calves 80.00-92.00; Weak & Rough 79.00-Down.

CALVES RETURNING TO FARM: Bulls Steady- Heifers 5.00 Lower.

HOLSTEIN HEIFERS: 90-120 lbs. 90.00-93.00.

HOLSTEIN BULLS: 90-100 lbs. 95.00-120.00; 100-115 lbs. 110.00-131.00.

STOCK CATTLE: Light Run-Steady Prices. Steers- Med. To Good 57.00-64.50; Heifers Good 55.00-56.75. Springing Heifers Large 700.00-885.00; Small 400.00-600.00.

PIGS & SHOATS: 3.00 Higher. By the Head- 25-35 lbs. 35.00-44.00; 40-70 lbs. 45.00-57.00; By the Lb. 50.00-57.00.

Peoria Cattle

Thursday, June 18, 1987

Compared with last week slaughter steers sold .50 to mostly 1.00 lower with one load Monday .50 higher. Holstein steers 1.00 to 3.00, slaughter heifers steady to 1.00 lower. Slaughter cows 2.00 to 3.00 higher. Bulls not well tested. Supply mainly good to average choice slaughter steers and heifers with 3% cows. Estimated receipts this week about 1500 as compared with actual receipts of 1314 a week ago and 1550 a year ago.

SLAUGHTER STEERS: Choice 2-4, 1100-1350 lbs. 69.00-71.00, two loads 71.50-72.50; 950-1100 lbs. 68.00-69.50. Good and Choice 2-3 1000-1200 lbs. 65.00-68.00. Good 2-3 900-1100 lbs. 63.00-66.00.

HOLSTEIN STEERS: Good and choice 2-3 1250-1450 lbs. 58.00-61.00. Standard and Good 2-3 1100-1300 lbs.555.00-58.00.

SLAUGHTER HEIFERS: Choice 2-4 1000-1200 lbs. 67.50-69.00, two part loads 69.50-70.00; 850-1000 lbs. 63.00-67.50. Good and choice 2-3 900-1100 lbs. 63.00-66.00. Good 2-3 60.00-63.00.

SLAUGHTER COWS: Cutter and boning utility 1-2 40.00-43.00, few high dressing 43.00-45.00. Canner and low cutter 35.00-40.00.

BULLS: Yield grade 1-2 1500-2000 lbs. 53.00-57.00.

Oklahoma Cattle

Wednesday, June 17
Report supplied by USDA

Feeder steers and heifers under 600# 1.00-3.00 higher; between 600-775# 1.00-2.00 higher; over 775# steady to 1.00 lower. Slaughter cows and bulls 1.50-2.00 higher. Demand good for both slaughter & feeder cattle. Exception feeders over 775# sold to narrow outlets following the C-O-F report. Weather hot and humid. Wheat harvest in progress. Receipts this week estimated at 8400 head. Following quotes are bulk sales for the week:

FEEDER STEERS: Medium and large frame 1 300-400# 89.00-98.50; 400-500# 81.00-87.00; 500-600# 77.00-82.90; 600-700# 73.00-77.50; 700-750# 72.50-76.00; 750-800# 70.50-72.55; 800-900# 68.20-70.80, closing 67.50-69.50.

FEEDER HEIFERS: Medium and large frame 1 375# lot 82.90; 400-500# 74.75-80.25; 500-600# 70.00-75.50; 600-700# 68.30-71.00, fleshy 66.80-68.30; 700-800# 65.70-70.10 mostly 67.30-69.10.

SLAUGHTER COWS: Boning and breaking utility 1-4 42.50-48.00. Cutter 1-2 42.00-46.70. Canner and low-dressing cutter 39.50-42.00.

SLAUGHTER BULLS: Y.G. 1 1000-1500# 50.50-54.80; 1500-2100# 56.00-58.00.

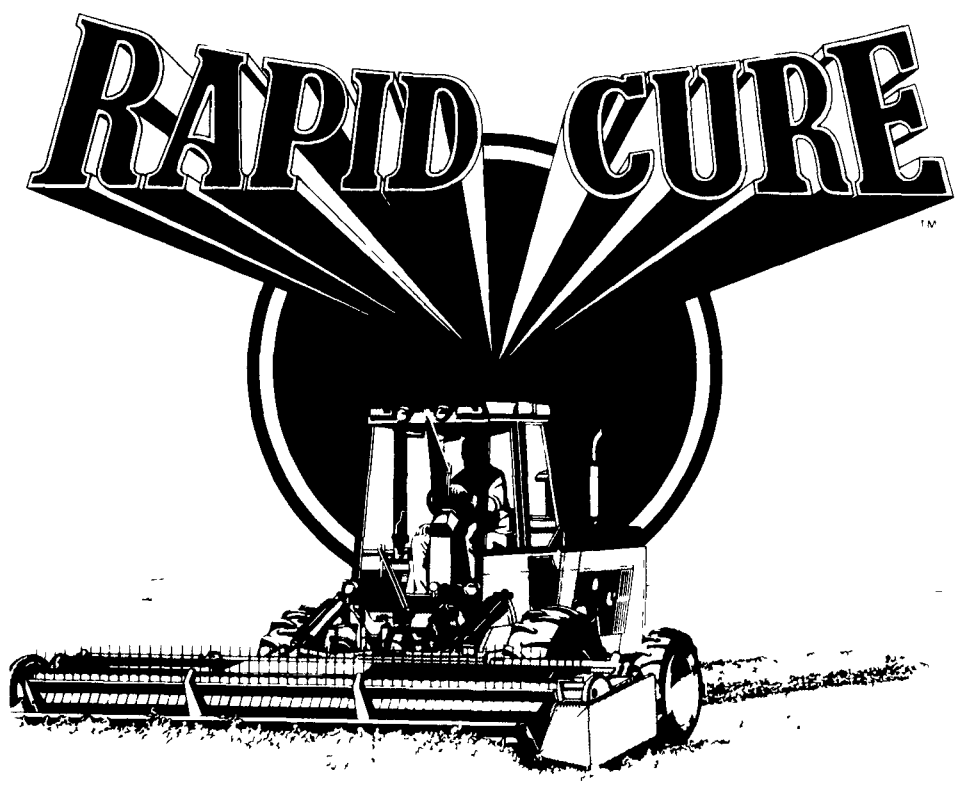
Was Your First Cutting Of Hay RAIN DAMAGED?

ABC GROFF, INC. WANTS TO HELP REDUCE YOUR CHANCES OF BEING CAUGHT AGAIN...



Chemical Hay Conditioner

When sprayed on alfalfa hay during cutting, the RAPID CURE mixture penetrates the waxy cutin layer on the stems, increasing the rate of water evaporation from the hay.

RAPID CURE:

1. Reduces chance of rain damage
2. Improves the quality of hay
3. Gets hay off faster and allows more days for new hay crop to grow.

RAPID CURE Doesn't Cost...It Pays!!!

Both university and farm tests have proven RAPID CURE Chemical Hay Conditioner pays for itself. RAPID CURE will cost about $6.00 to $6.50 per acre. Applied as directed, RAPID CURE will increase hay yield by 120 to 130 lbs. per acre. This increased yield pays the cost of RAPID CURE.

ABC GROFF, INC. has a quality line of RAPID CURE applicators in stock to fit your needs.

Understanding Soil Compaction Can Up Your Yields

RACINE, Wisc. – Many misconceptions exist on how and why soil compaction takes place, which often leads to overly simplistic claims about cropping methods as well as agricultural equipment choices.

The most popular misunderstanding may be that all soil compaction is harmful. However, some compaction is vital for optimum crop yields.

Harmful compaction has many causes. No single factor, such as tractor weight, accounts for the different kinds and degrees of soil compaction. For example, some soil structures are quite susceptible to compaction. Other structures resist compaction. Some soils gain and lose compaction readily.

Farmers can better manage their choice and use of equipment when they understand soil compaction tendencies.

Soil Structure

Soil particles vary in size from the coarsest sand grains to fine silt. Combined, these different sized particles create a countless range of soil mixtures that can create compaction occurring separately and simultaneously. Possible compaction locations are:

- a thin surface crust,
- throughout the tillage depth,
- a thin layer at the bottom of the regular tillage depth,
- in the subsoil.

Some soil compaction, properly located in the soil profile, is necessary for best crop yields. For example, surface soil must be adequately compacted around seeds to ensure that they are moist enough to sprout. Farmers want to manage equipment to enhance this beneficial compaction without producing harmful soil compaction.

Compaction Tendencies

To properly manage equipment, farmers learn and adjust to local soil compaction tendencies. Some examples of soil compaction tendencies are:

- coarse soils that may lack adequate seedbed compaction;
- coarse subsoils that may lack normal water holding ability (traffic can then actually increase yields);
- over-compacted silty-soil seedbeds that may cause seed rot;
- tillage depth compaction (plow pan) that can halt root growth;
- compacted subsoils with poor drainage that may prevent air from reaching plant roots and slow soil drying needed for harvest; or
- surface soils that tend to form large, hard clods, which can prevent proper planting and require wasteful tillage.

Timing

Research has demonstrated that the timing and frequency of farmers' equipment use are more important factors in controlling harmful soil compaction than equipment size, tire choices or using tracked equipment.

The time available to plant or harvest without harmful soil compaction is often measured in hours rather than days. To help avoid problems encountered by unpredictable weather, many farmers choose high-horsepower, high-production machines.

"High horsepower-to-weight ratio tractors are prime examples of machines designed to help prevent harmful soil compaction," according to George Mueller, manager of product information and training at Case IH.

"They enable farmers to quickly accomplish planting and harvesting in the narrow window of time that produces optimum yields."

These tractors are designed to operate efficiently at faster field speeds, producing high tractive efficiency with minimal harmful soil-compacting weight. Using the fastest appropriate field speed also reduces the amount of time the soil is compacted by tractor and implement weight. For example, a wheeled tractor farming at five miles per hour compacts any single soil location for only 0.4 seconds, which allows farmers to start and finish operations while reducing the possibility of creating harmful compaction.

Tractors with good horsepower-to-weight ratios also help farmers balance the pressure to plant early with the need to avoid working in compaction-producing conditions, such as waterlogged fields (see chart). Properly managing this balance applies year-round to all sizes and types of equipment, including fertilizer spreaders, tracked vehicles, combines and grain carts, Mueller said.

Field Traffic

Another immediate benefit to using high-horsepower-to-weight tractors is a reduction in the number of necessary field trips. Such tractors not only operate wider implements, but can also operate more implements at one time to reduce compaction-causing field traffic.

"Harmful soil compaction is inevitably reduced or even eliminated when field trips are kept to a minimum," Mueller said. "Tillage, planting and harvesting equipment that works a wide swath helps reduce the number of wheel tracks."

For example, a six-row-wide

READ LANCASTER FARMING FOR COMPLETE AND UP-TO-DATE MARKET REPORTS

Understanding Soil Compaction

(Continued from Page A17)

swath covers 15 feet for each set of tracks. Using 18-inch-wide tractor tires, six-row machines can make enough wheel tracks from the tractor alone to cover every square inch of a field approximately twice. A high-horsepower tractor uses tires a few inches wider, but cuts the number of wheel paths in half by using twelve-row equipment.

"With high-horsepower-to-weight tractors, farmers are cutting field traffic to new minimums by using the horsepower and tractive efficiency to farm wide swaths and operate more than one implement per trip," Mueller said.

Axle Loads

The balanced weight design of four-wheel-drive and mechanical-front-wheel-drive tractors also provides a soil compaction control benefit by carrying equal, or nearly equal, loads on both axles.

This is particularly significant in light of research that finds a strong correlation between hard-to-remedy subsoil compaction and total axle loads greater than 10,000 pounds.

As a result, the balanced weight distribution designed into tractors that drive both axles, such as four-wheel-drives and mechanical-front-wheel-drives, helps prevent subsoil compaction. This benefit is greatest when these tractors are high-horsepower-to-weight designs operated at higher field speeds.

Soil compaction can be managed by keeping axle loads down, field traffic reduced and scheduling field trips when moisture conditions and compaction tendencies will help produce optimum yields. With good compaction management farmers retain flexibility to choose equipment appropriate to all their soils and crop enterprises.

NCA Chief To Address Assoc.

BOZEMAN, Mont. — Jack Dahl, president of the National Cattlemen's Association, will be the featured speaker at the American Simmental Association's 13th Annual Summer Conference, scheduled for July 16-18 at Bismarck, North Dakota. Conference headquarters will be the Kirkwood Motor Inn in Bismarck.

Dahl, a rancher from Gackle, North Dakota, assumed the Presidency of NCA last February. He's a past president of the North Dakota Stockmen's Association and has been very active in animal health matters, both on the state and national levels. Dahl will be the keynote speaker at an awards luncheon, which will be held on Saturday, July 18.

Additional information on the conference may be obtained by contacting the American Simmental Association, One Simmental Way, Bozeman, MT 59715. Telephone number is 800-548-0205.

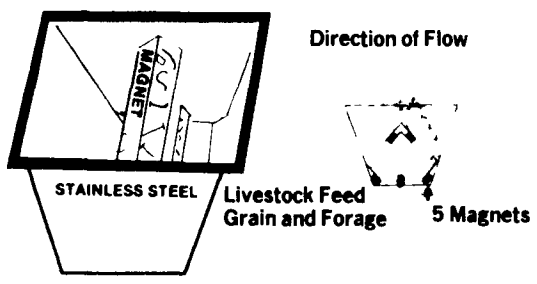
It's Wake Up Time



You Will Benefit By Using A Snatcher MAGNETIC FEED HOPPER

Made of Stainless Steel Size 14"x20" and 18"x20" tapered to 12"x14" at the bottom. Has 7 ft. of catching space 2" wide is loaded with strong magnets, it will handle all kinds of short feed, grain, or silage EXCEPT caked or hard lumpy feed - Silage It has no moving parts — will not rust or deteriorate. One steer or dairy animal will pay for several of these hoppers.

Other sizes available by request.

A TESTIMONY FROM ONE OF OUR CUSTOMERS

"I purchased a Snatcher in the fall of 1985 We installed it below the TMR Mixer Unit I am using a mixture of corn silage, haylage and ground ear corn The Snatcher is installed above the conveyor that carries feed to the feed bunk It is surprising the amount of metal we have collected since using the Snatcher It has picked up nails wire springs and pieces of metal My reasonf or purchasing the Snatcher was that I lost a high priced first calf heifer due to metal in the Spring of 1985 Since using the Snatcher we have had no problems with hardware in our cattle Yours, D Witmern, Lancaster Co , PA

Mr. Witmer is considered a good dairyman, but discovered that he still needed protection against metal. We must again claim that this is a very cheap type of insurance!

We also have Magnetic Bars covered with Stainless Steel, for use where the Snatcher does not apply.

National Grange Leadership Team Visits Pennsylvania

HARRISBURG — During the next few months, a four-member National Grange Leadership Team will visit 31 Grange-states for a series on leadership development in the Grange. As part of their nationwide tour, the team made their stop in the Keystone State. Five visits were made to various regions in the state. National Grange Master Edward Andersen was among the Grange dignitaries who visited Granges in Susquehanna, Montour, Clearfield, Indiana and Crawford counties.

"The National Grange Campaign for Leadership Development was well received by Grangers in the Commonwealth. The May meetings yielded over 500 Grangers," said Pennsylvania State Grange Master Charles E. Wismer, Jr.

"Pennsylvania is one of the few states that gains both in membership and in services each year," said Master Andersen.

The purpose of the meetings is to take a closer look at the Grange. "It is time to step back and take a look at the structure of the Grange," said Master Andersen. "This is the time to plan what the Grange will be tomorrow."

Master Andersen reminded the Grangers present that change is all around. Everything is changing. He continued, "Rural America is changing. Agriculture has to maintain a presence in rural America. We have to examine what role the Grange should play."

National Grange legislative director, Bob Frederick, informed Grangers of important legislation in Washington, D.C. In addition to his legislative news, he reminded Grangers of the importance of their involvement. Legislation is not a spectators sport. It entails exercising legislative efforts," Frederick said.

He warned those in attendance that there are a few myths about legislation that are floating around. "Legislation is not for professionals. It is important at the grassroot level."

Frederick urged everyone to get involved. "I often hear 'I don't have time.'" Well, according to Frederick, there is always time. "You can drop a postcard or give a quick telephone call to your congressman."

Another myth he warns Grangers of, is the common excuse "My voice doesn't count." He said, "You are the most important ingredients in our legislative process!"

Harry Massey, the membership director of the National Grange told Grangers there are three important aspects to the Grange. They are family, community service and agriculture.

In conclusion, Grangers had the opportunity to meet with the national officers and ask questions. Those in attendance gave the program rave reviews.

A KEYSTONE STOP — The National Team visited several Pennsylvania Granges during their 31-state tour. Pictured (left to right) are: Membership Director Harry Massey, Legislative Director Bob Frederick, Pennsylvania State Grange Overseer William Rangler, National Master Edward Andersen and National Lecturer Robert Barrows. William Ringler (center) is the newly elected trustee to the Penn State Board of Directors.

College Intern Program Offers Jr

Intern Completes First Term

BY MARTHA J. GEHRINGER

DOYLESTOWN — The College is looking for a few students who do not mind working hard under a new program which began in January.

Delaware Valley College, Doylestown, initiated a student intern program at the beginning of this year which permits students to "learn the nuts and bolts of the dairy" while at college, explained Paul Knight, superintendent of the dairy facility.

Laine Hellein became the first student intern at Delaware Valley College this year. The new program permits the student to manage the dairy when the superintendent is away.

The program offers a student experience and a lucrative financial package, according to Larry Hepner, agriculture department chairman. The financial package includes room, board, tuition and a stipend for one year.

"It gives the student one more step toward the responsibilities they will encounter later in their career. The program is very positive and gives the student a good insight into the management of the dairy and tremendous responsibility in short intervals," Hepner said.

Under the program, when the superintendent is away the management of the dairy falls to the student intern. "When they graduate they will be able to say they know more than how to milk cows," Knight commented. The program is open to juniors and sophomores at the college. Seniors are not candidates, Knight explained, because of the year-long commitment — two semesters and the following summer. "We don't want to prevent the seniors from being able to take a position because of their commitment to the college."

The students in the program must also ride what can be a fine line between management and their peers. "Although they earn the respect of their peers, it takes a special person to be able to fill the position," Knight observed. "I don't think we could get better students than the first two," he added.

The program began in January with the start of the spring semester. Laine Hellein, Emporium, at the time a second-semester sophomore majoring in dairy husbandry, claimed his part of the obscure history at the college by being the first intern.

During the school year, Laine noted, he is required to work 40 hours per week in addition to his normal class load. During the summer, the requirement increases to 50 hours per week. Laine commented that he attempted 16 credits at the beginning of the semester but later dropped one evening class and completed 13 credits for the semester.

"It gets rough," Laine admitted. Students in the program need to maintain a 2.5 cumulative grade point average on a minimum of 13 credits. By carrying 13 credits, they maintain full-time student status which permits them to live on campus.

To carry a high class load,

Working To

Student Management At Dairy

's Unique Experience For Students

students need to be disciplined to books, Laine said. He noted he had no problem being loyal to the job this past semester, however, he confessed to a lack of self-discipline to studying well in advance of a test. During spring semester, activities for campus clubs increase as well as the opportunities to socialize with friends, adding to the problem of loyalty to academic pursuits, Laine explained. "I love people and enjoy doing things with my friends."

"I didn't want to make the job a cop out. I didn't want to let it jeopardize my friendships," the junior explained as a reason for his priorities. "People don't mind my schedule once they realize that this is a regular job."

He noted that he is looking forward to the summer. Laine anticipates it will be less hectic because he will be able to focus his attention solely on the job.

Responsibilities of the job include just about everything — morning and evening milkings, cleaning pens, feeding, maintenance, health care, record keeping and personnel management.

Laine cites three of the more important abilities which he has gained from being an intern: being able to foresee a problem and prevent it from happening; administering drugs; and delegating duties without being bossy.

When Knight leaves, "you're in charge," Laine stated. "You try to look through his eyes to see what are the main points are to try to keep up on, or what he would do in certain situations." He noted that by attempting to look at a situation in this manner he has been able to do little things to prevent big problems, similar to what he would have to do on his own farm or as a herdsman for someone else.

Laine notes the most frustrating part of the job has been dealing with people who chronically do not show up for work. "We're all human. But it's sickening when they always have to leave early or oversleep," Laine said, adding that these acts hamper the efforts of other students with the same pressures. "I try to work through any major problems." He noted that only when a solution is not possible does he take the problem to Knight.

Hepner noted that when the concept of an intern was conceived, the student was intended to replace a full-time person who previously served as an assistant to the dairy superintendent. "We needed extra help at the dairy," he noted.

"I really believe the intern position is one of the most important positions. If you don't do it, it doesn't get done," noted the junior dairy husbandry major, explaining the importance of the position. "I think I've gotten as much out of it (the intern position) as I have gotten out of class work — maybe more."

The prime area of learning for Laine has been in the area of health care — administering drugs, noticing different symptons, and how to treat the same disease in different cows. He cites one of his major accomplishments in this area has been giving intravenous treatments as well as knowing drug uses and dosages.

Part of the reason Laine has been able to gain so much from the position is because of his dedication to the dairy. He admits

WORLD WIDE AND NATIONAL FARM WATCH

This national news summary is provided by ACRES, a copyrighted information service developed by the American Farm Bureau and available to Pennsylvania farmers on a daily basis through the Pennsylvania Farmers' Association Farm Management Services For more information call (717) 761-2740

STEADY WHEAT PRICES SEEN FOR 1987/88---Wheat market analysts seem to agree that this year's production will outstrip the 1986 crop, but they tend to think exports will rise enough under the continued use of the export bonus program to offset the larger amount and keep prices steady for the year with lows at the harvest peak of the winter wheat crop and again later in the fall.

Prices are expected to fall below the loan rate in the low periods and cause wheat to move into CCC storage. The carryover could be slightly higher than last year's 1.848 billion bushels.

There is some feeling that poor crop conditions in China could cut yields there of all crops, while poor weather could make it necessary for the Soviet Union to import more than the 36 million tonnes estimated by the USDA.

HOT, DRY WEATHER PREVAILS---Continuation of above average temperatures and below normal rainfall seems in store for most of the nation's key grain producing areas and markets continue to reflect the uncertainty that such weather brings. Corn, wheat and soybeans all closed higher in Monday trading. Jim Newman, Indiana extension climatologist said in the next 30 days, "about 15 of them will reach 90 degrees in many areas."

PRESIDENT STILL COMMITTED TO FREE MARKET—In his televised speech Monday night, President Reagan said he thought it notable that so many of America's farmers would like to see agriculture returned to a free market basis.

Reagan said our farmers realize that subsidies to farmers in other countries are causing a worldwide glut of farm products and a shrinking market for American goods. He reaffirmed his commitment to work toward elimination of farm subsidies by the year 2000.

CATTLE ON FEED UP BUT TOTAL BEEF SUPPLY DOWN—The USDA report issued yesterday on cattle on feed in the seven major beef producing states showed a 6 percent jump in cattle being fed for slaughter but May marketings were only 93 percent of last year's total. However, says the department's Economic Research Service, "beef production in 1987 is expected to decline 5 to 7 percent because the increase in grain fed-cattle slaughter will be more than offset by a decline in non-fed slaughter this spring and summer."

REFORM OF BUDGET PROCESS CALLED FOR---President Reagan called this week for reform of the budget process "to stopall the delays, missed deadlines and broken commitments. We can start," he said, "by getting Congress to vote–yes or no, up or down–on an amendment to the Constitution that will bring an end to deficit spending once and for all, an amendment that will mandate under the law a balanced budget."

He also reiterated his request for a line-item veto, which would allow him to "cut out the waste" from a particular bill without resorting to veto of the entire bill.

ECONOMICS GETTING THE LEAD OUT—Leaded gasoline may soon become a relic of the past, at least in many gasoline stations in larger cities. Chicago Tribune reporter Michael Arndt, writing for this morning's edition, quoted Robert Jacobs of the Illinois Gasoline Dealers Association saying, "Leaded gasoline is becoming a thing of the past." It seems that demand has fallen off markedly in recent years and many of the leaded gas pumps in high volume stations are going unused for weeks at a time.

They say it is no longer the federal government or environmental organizations that are pushing for the ouster of leaded gas, but pure economics is working in that direction.

Not to worry that all leaded gasoline will vanish. Many major oil companies say they will continue to make the fuel available to farmers and others whose equipment needs leaded gas to run properly. EPA is now about to reconsider the effective date of its total ban on leaded gas after a study showed the adverse effect such a decision may have on some farm machinery engines.

But, say the man acturers of gasoline, with the lower lead content, leaded gasoline costs as much to make as unleaded and could actually cost more in the near future than its unleaded counterpart, as demand slides further and refiners' economies of scale are lost. The market share of leaded gasoline has dwindled from 53 percent in 1981 to just over 25 percent in 1987. Says Vic Rasheed, executive director of the Service Station Dealers of America, "It's never going to get to the point where you can't find it, but it's not going to be part of the menu of the major brand refiners. And I don't think it's going to be missed all that much either."

BILL TO REDUCE LOAN RATES USES FALSE PREMISE--The issue of farm commodity loan rates under the farm bill and the degree of budget exposure continues to boil in Congress. It has now boiled over into a bill to raise the loan rates on wheat and corn for the 1988 crops and on corn for the 1987 crop. The bill, H.R. 2610, sponsored by Rep. Dan Glickman (D-Kan.), is being touted under the false claim that it will prevent a loss of income to farmers and save the government around $500 million.

The budget exposure would indeed be reduced by raising corn and wheat supports a dime a bushel higher than the farm bill calls for each year, says American Farm Bureau economist Ross Korves, but the current policy wouldn't affect farm income because farmers would be paid higher deficiency payments if the loan rates are lowered as planned. The '85 farm bill provides 1987 loan rates of $1.82 for corn and $2.28 for wheat. Glickman would raise those to $1.92 for corn and leave wheat the same. In 1988 Corn should drop to $1.73 and wheat to $2.17 under the farm bill, but Glickman would set them at $1.82 and $2.28.

"Also," adds Korves, "if forfeitures on CCC loans go up because of the higher loan rates provided in Glickman's bill, the budget saving could be less, nonexistent or negative."

Most damaging effect of the bill would be the signal it would send to the rest of the world that we are already willing to abandon the course of competitiveness in world markets established by the 1985 farm bill.

IT'S TIME TO SELL WHEAT—"Farmers should be aggressive sellers of wheat," said Bill Tierney, Kansas State University agricultural extension economist, after the release Thursday of the USDA World Agricultural Supply/Demand report. Tierney said that with production increases expected in the United States, the European Economic Community and Canada, there is nothing to encourage optimisim in the wheat market.

Father's Day Is 'Beef Day'

HARRISBURG — "In recognition of the importance of beef to our diets and the state's economy," Governor Robert P. Casey proclaimed Father's Day, June 21, as Pennsylvania Beef Day during noontime ceremonies at his office this week.

Crystal Shaffer, York County, 1987 Pennsylvania's Cattlemen's Queen, presented the Governor with a package of sirloin strip steaks. Accompanying the "Beef Queen," were Pennsylvania beef industry representatives, including Ella Roush, director of public relations for the Moyer Packing Company, Souderton; Robert R. Coleman, Harrisburg, executive director of the Pennsylvania Beef Council and the following council officers: Paul Heffner, Gettysburg, chairman; Conrad Grove, Downingtown, chairman-elect; and Mildred Bunting, Lancaster, secretary-treasurer.

The Governor noted the PA Beef Council's role in promoting the sale of beef and beef products. "Consequently," he continued, "our Commonwealth consistently ranks among the top 20 states in the nation in production and annual sales of Pennsylvania beef approach $300 million."

College Intern Program

(Continued from Page A22)

that it would be easy to slough through the job doing the minimum to earn the room, board, tuition and stipend that come with the job. However for Laine it has become more than a job. "I'm addicted to this place. You build such a concern for the place — how it looks, the cows, little details."

He credits Knight with a making the program run smoothly and helping him to learn as much as he has. "I really appreciate Paul for his trust. He has always been very helpful and congenial," Laine remarked.

Despite the long hours and demands of the job, Laine has not fallen behind in class requirements and will graduate in 1989. He was able to accomplish this by taking a heavier credit load in his first three semesters at the college.

This fall's intern, Al Jenkins, is taking classes this summer to get a jump on course work as well as easing into the program by working at the dairy. By doing this, he plans to learn more about the cows and the farm to be better prepared for the responsibilities he will encounter. Al has worked at the dairy for the past two years under work study.

"It is going to be a lot of responsibility quick," Al observed. The junior dairy husbandry major notes that he is looking forward to the challenge of the intern position.

Al, originally from Baltimore, Md., relocated when his family moved to Fawn Grove in York County. Without benefit of a farm background he calls the position "imperative." He added, "Without this position I couldn't say that I've had any kind of leadership position on a farm."

One of the appealing parts of Delaware Valley's program for Al was the practical aspect. Al first became familiar with agriculture through the Future Farmers of America chapter at his high school. He remained undecided about his future until the summer after graduation from high school when he worked on a dairy farm.

Like Al, Laine did not come from a farm. However, Laine did work for 10 years on a nearby dairy farm prior to college. At this farm, Gordon Turk's dairy in Centerville, he did just about everything.

Knight reiterated his praise for both students. He noted that their enthusiasm for the job has created a more enthusiastic environment at the dairy for everyone. Knight explained that the intern program gives the students something to work for. "They have one year to shine," he commented.

He admits that students who enter into the program will see their grades slip somewhat. However, he feels the practical experience they gain and the first-hand knowledge they learn will do more for them in the workplace than a straight A grade point average will.

Hepner explained that the intern program has been expanded to the orchard. However, because of the different seasonal work pressures, the orchard internship is for two semesters as opposed to the dairy which is year-round. College administrators are also considering expanding the intern program into other areas of the college, depending on the success of the initial project and financing possibilities.

Financing for the intern program comes from within the college and not from any type of grant program, Hepner explained.

Officials at the college are optimistic about the future of the intern program which follows the college's philosophy of a hands-on type of practical experience. They feel this type of experience creates a total learning package and makes students more marketable in the workplace.

Seed Wheat Field Checked

To prepare a field of seed wheat on the farm of Levi Rohrer, Lititz, Sam Reist of Reist Seed Company, Mount Joy, cuts the garlic and obnoxious weeds along the edge of the field. Lancaster Farming Editor Newswanger happened by on Thursday afternoon and found out that the field was planted with Saluda wheat and was in good condition to be harvested for seed about July 4.

Reist reported that a few fields of early barley had already been cut and that next week the barley harvest would get into full swing. Grain yields look good in this area with adequate moisture to grow the crops.

Russell To Represent Pennsylvania At Holstein Convention

BY JOYCE BUPP
York County Correspondent

ALEXANDRIA — As the junior programs get underway this week at the National Holstein Convention in Indianapolis, Pennsylvania's distinguished junior Rusty Russell will be among the state's representatives taking part.

Walter W. "Rusty" Russell Jr. was named one of the two outstanding junior Holstein members during the Pennsylvania Holstein Association's February convention in Wilkes-Barre. And, although he was not selected a national finalist, Russell is looking forward to participating in the convention activities with the state's delegation of juniors.

An ag business management junior at Penn State University, with three semesters left to complete his degree, Rusty Russell knows what he wants to do with his life — be a dairyman.

For the moment, however, Russell tries to visit many diverse dairy herds and milking setups, "pick the brains" of successful cattle breeders, study sires and their daughters, and spends endless hours on the driving end of a pair of cattle clippers.

"I was lucky. Someone took a chance on me," he figures of his initiation into the cattle fitting business.

It was one of those quirks of time and circumstance which led Russell into his first clipping job. While he had offered to help the PSU's Dairy Science club work the 1986 Pennsylvania Holstein Spring Sale, there were already adequate hands available to clip and fit the cattle consignments. So, Russell offered his time to the Terry Branstetter family, Tyrone Holstein breeders, who sent him to Harrisburg to help their show string. Fitting the Branstetter cattle was Marty Unholtzer of Ontario.

"It was my first time to work with a pro," Russell recalls. "I watched him a lot." Looking back, he calls that week his "apprenticeship."

Classification was scheduled in Russell's area soon after the show, and the Branstetter's called him to help get cattle ready. That led to several other pre-classification clipping jobs; within about a month, Russell had barbered nearly 400 head of cattle.

Word of his abilities had gotten around and Russell was asked to help prepare consignments for the 1986 Ag Progress Sale. Fall show season brought more fitting jobs, along with return work periodically at the Branstetters, several days of fitting for the Fall Classic sale, and more pre-classification customers in December.

What began almost as a volunteer job has thus become a part-time, between-school profession for Russell. In fact, Russell and his frequent fitting-job partner, Dan Kyper, recently began advertising their fledgling business — Picture This.

Picture This is geared toward the dairyman who wants cattle photos for promotion and merchandising, but who can spare little time for the intense preparation of cows for a picture session. Russell and Kyper not only fit the animals for the photographer, but help during the posing session as well.

The enterprise is a far cry from a rookie Blair County 4-H'er in 1977, with an interest in "bugs, rocks and forestry."

Although W. Wayne Russell and his wife Diana wanted to dairy farm, Wayne spent several years working for the railroad after his boyhood years helping to milk cows. After renting a farm and milking a small herd while Wayne worked away, the Russell family bought their present farm in Huntingdon County in 1979. Here, at age 12, Rusty's interest in dairying could take root.

His first project heifer was a Guernsey junior calf, eventually winning Russell his first grand champion trophy when she was exhibited as a 2 year old.

"And my only grand champion trophy," he quickly adds, noting that his Holsteins proved to be better brood cows than show stoppers.

"But my best nearly got beefed as a 2-year-old, when she had a 10,000 lactation," adds Russell, of the Ransom Rail Pacemaker daughter. Rallying her next time around, she made 22,000, and then 27,000 as a 4-year-old, even after a bout with milk fever. When she threw her calf bed at next freshening and died, she left Rusty a legacy of three daughters and a Mars Tony bull.

Today, the distinguished junior member independently owns 15 head, and jointly owns another 14 head of registered Holstein.

Rusty and his mother, Diana, review the scrapbook he submitted for the Pennsylvania Holstein Distinguished Junior Member contest.

"Our county agent got me involved in the Junior Holstein program when I was about 13 or 14," Russell credits, "because he thought I'd be interested. Initially elected an officer of the group, he became local president in 1982. The Holstein youth group activities have ranged from selling potholders for fundraising to participating in judging schools, dairy bowl and awards programs. Their Fun Nite at the Huntingdon County fair stirs outside interest in cow milking contests, hay bale relays and the perennially popular calf dressing.

Encouraged to submit a distinguished junior Holstein member scrapbook, Rusty won at the county level and became a state junior division finalist. Then unfamiliar with the state's youth programs, he attended a junior executive meeting, was elected an alternate local delegate, and has been working with the state's junior program ever since. As state junior president in 1986, he helped organize the annual calf raffle, took part in the national convention in Wisconsin and assisted with two of the three summer junior judging schools.

Rusty Russell learned to fit and clip cattle by watching, working with professionals, and on-the-job practice with several hundred animals.

National Holstein Convention To Open On Sunday

INDIANAPOLIS, Ind. — The Holstein-Friesian Association of America will hold its 102nd national convention next week, June 21 to 25, here at the Indiana Convention Center.

The convention opens with the president's reception Sunday evening.

June 23 and 24 will be the days for the business meeting of the Association. An estimated 239 delegates will attend the meeting to discuss proposed bylaw changes and acceptance of the 1986 annual report. They will focus on the president's message and consider the state of the Association.

Delegates will also vote for national officers.

Other highlights of the convention include a technology fair, a discussion on the legal work of enforcing Association policy, and a genetic index report.

Registration and a cash breakfast buffet open each day. The complete schedule for the five-day event follows:

Sunday, June 21

6 30 p m — President s reception Convention Center

Monday June 22

8 00 a m to 9 00 p m - Golf tournament Speedway Course

1 30 p m to 3 30 p m - Buses to Speedway

3 00 p m to 9 00 p m - Host Day Activities at the Indianapolis Speedway

Tuesday June 23

8 30 a m to 10 00 a m — Early Bird Sessions Convention Center

9 00 a m to 5 00 p m - Dairy Bar Convention Center Art and Quilt Display Convention Center

9 00 a m to 5 00 p m - Committee on resolutions and bylaws Convention Center

10 30 a m to 5 00 p m - General session/Open forum Convention Center

Wednesday June 24

8 30 a m — General session/Dairy Bowl finals Convention Center

9 00 a m to 5 00 p m Dairy Bar Convention Center Art and Quilt Display Convention Center

9 00 a m Ladies Brunch Claypool Courts

10 45 a m — Ladies Style Show Claypool Courts

12 30 p m — Nomination committee Convention Center

5 30 p m — Social hour Convention Center

6 30 p m — Banquet Convention Center

Thursday, June 25

9 00 a m — National Convention Sale Convention Center

Kasten Bill To Aid Dairy Farmers

WASHINGTON — In an effort to save U.S. dairy farmers from "Drowning in a Tidal Wave of Paper," Senator Bob Kasten today introduced the livestock producers recordkeeping relief act.

"My legislation would repeal the requirement that farmers capitalize the costs of raising their livestock, their preproductive expenditures," Kasten said. "This requirement now threatens to force farmers to choose between tax accounting procedures that would artificially inflate their taxable income and capitalization, which would force them to keep records on virtually every expense associated with raising livestock."

The capitalization requirement was a provision of the 1986 Tax Reform Act, according to Kasten. The Act allowed farmers the option of not capitalizing their preproductive costs, but only if they agreed to use straightline depreciation on their farm-related assets.

"Straightline depreciation is much less generous than the method used up to now to calculate depreciation," Kasten said. "The alternative would be to make the typical dairy farmer keep records of the cost of artificial inseminations, feed and medicine for a cow during the gestation period, housing and medical expenses for calves.

"The farmer would have to do this even if an insemination did not result in conception, a calf turned out to be a male, or a cow proved unsuitable for milking," he said.

Kasten said that his bill, which is co-sponsored by Sen. Dan Quayle (R-IN), would pay for the repeal of the capitalization requirement by barring farms with sales of $5 million or more from the use of cash accounting. "It is ludicrous to continue to allow the largest farming operations of the country with sales of tens of millions of dollars to claim that they are 'family farms' for tax purposes. It isn't fair to the real family farmers and it isn't fair to the taxpayers," Kasten said.

"The Tax Reform Act last year made progress in tilting the tax code toward family farmers," Kasten said. "My bill represents another step in that direction."

Yost Passes Guernsey Torch To Kozak, Office Moves

BY SALLY BAIR
Lancaster Co. Correspondent

WILLOW STREET – The torch is being passed at the Pennsylvania Guernsey Breeders Association with well-known business manager Lee Yost entering retirement and Alan P. Kozak taking his place.

Yost's very considerable influence on the organization will not be lost, however, as he has spent much of the last two months working with Kozak and introducing him to the world of Guernsey enthusiasts in Pennsylvania.

It is a bittersweet time for Yost, who is firm in his belief that Guernsey breeders are "the best people in the world," a feeling that was confirmed during his five years as fieldman and nine years at the helm of the organization. The warmth of feeling has already been communicated to Kozak as he is introduced to the breeders at their farms. He said, "They have all been so nice and supportive – it's been super."

Yost says, "Alan appreciates now how important it is to get out and talk with the breeders." Indeed, with the 1987 National Guernsey Convention dedicated to Yost, it is evident that the breeders have appreciated Yost's philosophy. The convention was a high point for Yost, allowing him the opportunity to meet friends from across the country. He said, "I enjoyed myself so much there." He says he will continue to go to meetings in Pennsylvania to see those folks who have meant so much to him.

A native of Columbia County, Yost has enjoyed many honors throughout a lifetime of association with the Guernsey breed. He said, "The greatest thing for me personally was winning the Klussendorf Trophy." He said the award meant a lot to him because of the caliber of people to whom previous trophies had been awarded.

He added, "It was also a great honor to be asked to judge a national show." He recalls that he could once stand at the gate as cows entered the show ring and have them placed before they completed the circle around the ring. Now, he acknowledges that he "always watches judging real close," but he has given up judging shows. He said he never wanted to stay beyond his ability to do the job correctly.

There have been a wide range of changes which he has seen over the years, and one is in the area of classification. He noted that the classifying type committee "realized that we need to get the cow more competitive. When I started in the business the Guernsey cow was round-ribbed, had short legs and a tight udder. Now they are taller, sharper and more dairy."

Yost credits Lawrence Colebank of the University of Tennessee as being one of the great classifiers of Guernseys, adding, "He was a diplomat along with it."

Production has changed too. Yost says, "An 18,000 pound cow was unheard of 25 to 30 years ago. Now they are expected to make 20,000 pounds."

Yost remarked, "My biggest disappointment was when Golden Guernsey milk started going downhill." The first thing that contributed to its downfall was high cholesterol. Then, with fewer herds, that were scattered and it was difficult to get a truckload. And when bulk tanks came along that did it – dairymen couldn't keep Guernsey milk separate.

He explained that Golden Guernsey was a trademark, and companies had to pay royalties to the Pennsylvania Guernsey Breeders Association. "Needless to say, that is what built the Guernsey barn," he said. According to Yost, the bankruptcy of Abbott's Dairy is what really sealed the fate of Golden Guernsey milk. "That was the end of one of the big accounts."

At the time of marketing the special milk, anyone selling it had to get three inspections. Yost remembers spending time during his first month with the Association lining up truckers to haul the milk.

Yost likes to recall that Guernseys were the first dairy cattle brought to this country. "No one thought of anything else because they had golden milk. You couldn't sell Holstein milk then."

Alas, for the Guernsey breed, times and appetites changed, and the specter of rich milk was no longer as appealing to the consumer as it was in the early days of our country.

That rich milk, however, may yet be turned into gold for dairymen through the much talked-about component pricing. Yost says, "Component pricing is the greatest thing to hit this country since William Penn."

Kozak agrees, and says that promoting the concept will be one of his biggest jobs. "Protein is only worth money when it is going into manufacturing plants. There is interest among producers. The milk tastes better, but no one pays for it now."

He said he plans to work with dairies to promote sales and milk marketing, noting that colored breeds need to be given a high priority. He also plans to work closely with the Jersey breeders, who also have a lot to gain from component pricing of their product. There are 50 percent more Jerseys in the state than Guernseys, so he feels an informal partnership could be beneficial. Yost concurs, "The sooner we get with the Jersey people the better."

Component pricing would also be advantageous to manufacturing plants, Kozak contends, and one of his early goals will be to convince cheese plants of how they stand to gain.

Yost concurs that it would be advantageous, saying that some cooperatives are also admitting the positive benefits that could come about. A continuing problem in getting such a program in place is that less than 10 percent of the dairymen in the state have colored breeds.

Kozak sees his job as "helping people with Guernseys be more economically competitive," and he sees protein pricing as one avenue to help the breed be more desirable. He adds, "Genetically we're making a lot of progress. Things look positive." Lee comments, "The breeders have done a great job in the young sire program in the last 10 years."

Seeing the Guernsey barn sold was difficult for Lee, though he agrees the Association had no choice because of its cement block construction, no insulation and ineffective storm windows, plus the fact that its site became increasingly valuable. "It was definitely a loss. It was the last nice place to hold sales. People from across the country often told me, 'We never had a place so right to have sales,'" Yost notes. He said he feels the Association needs to look in the Carlisle or Shippensburg area for a possible sale site.

Kozak agrees that sales are an important function of the Association. "It is kind of a service, helping people buy and sell. It takes a lot of time."

With Kozak taking over as business manager, the headquarters of the Pennsylvania Guernsey Breeders Association will be located in State College, with P.O. Box 257, State College, 16801.

Lee Yost (right) recently resigned as business manager of the Pennsylvania Guernsey Association. Assuming the position is Alan Kozak. Along with this change in personnel, the office of the Association will move from Waynesboro to State College.

Chore-Time Poultry Feeders Save Labor and Feed.

Feed costs soar and you're looking for every possible way to reduce man hours. Chore-Time's pan-type feeders offer you the capability of cutting costs while increasing productivity.

FOR BROILERS: New Model 2000 (shown) and famous Model C deliver fresh feed to pans all over the house at a low feed level for less waste.

FOR TURKEYS: Chore-Time's Turkey Feeding Systems are the standards of the world in feed conversion features, ruggedness, and ease of operation.

Chore-Time, the industry leader, offers feeders especially designed to fit the type and size of your birds. Contact us today and learn how you can benefit from a Chore-Time feeding system.

Small Grains Featured

(Continued from Page A1)

critical with wheat than with corn, said Dr. Greg Roth. A Penn State research assistant, Roth's research involves timing and application rates of nitrogen on winter wheat. "The best thing to do is manage each field separately," he advises.

As a general rule, said the researcher, fields that receive regular annual manure applications should get from zero to 30 pounds of additional nitrogen, fields manured every two to three years will need from 30 to 60 pounds, and fields that receive no manure will benefit from 60 to 90 pounds of nitrogen.

In general, splitting applications is most beneficial on fields that are normally low in nitrogen. It doesn't pay to split nitrogen applications on fields previously used for legumes or receiving heavy manure applications. Where split applications are used, Roth recommends one-third at green-up and two-thirds in April.

Roth also evaluated single applications of nitrogen at different growth stages and found that applications at growth stage 3 increased yields about 5 bushels per acre over plots receiving nitrogen at growth stage 5. Late applications are risky, said the researcher, since evidence of nitrogen deficiency may show up before application and wet weather could cause further delays in getting nitrogen on the crop.

Small Grains as Forage

Why use winter cereal grains for forages? In addition to providing erosion control, they increase your total livestock feed production per acre and serve as a hedge against running out of feed in the summer, said Extension agronomist Sidney Bosworth.

Bosworth's research involves the effects of different seeding rates and nitrogen applications on rye, wheat and triticale. He found that seeding three bushels per acre resulted in a six-tenths to nine-tenths yield advantage over the 1.5-pound rate on all three crops.

In this year's trials triticale topped silage yields at 9.6 tons using 135 pounds of nitrogen. Wheat followed, with 8.8 tons at the same nitrogen rate and rye registered its top yield of 6 tons after receiving 90 pounds of nitrogen.

From a quality standpoint, the rye was 16.3 percent crude protein, triticale came in at 9.6 percent and the wheat was 9.3 percent CP, with a 135-pound nitrogen rate for all three crops.

Varying the nitrogen rate made no significant difference in the amount of total digestible nutrients in any of the grains. Wheat registered the highest TDN, followed by rye and triticale.

Bosworth says his experiments indicate a good return on the nitrogen investment for both wheat and rye up to the 90-pound level. Triticale, on the other hand, continued to respond up to the 135-pound level.

The agronomist noted that double cropping wheat or triticale with corn may hurt corn yields, since both grains are harvested later than rye. "I still think rye is the best and cheapest way to go in a double-crop situation," he said.

Growth Regulators and Barley

Extension small grains specialist Dr. Elwood Hatley outlined research investigating the effects of Cerone and Modown on winter barley. A growth regulator, Cerone retards growth in the barley stem to help prevent lodging. Modown is a pre-emergent herbicide. Experiments at Landisville involve investigating the effects of these two materials with respect to seeding rates and different nitrogen application rates. "It appears that barley may respond to increased seeding rate and increased nitrogen rate if we can control lodging," said Hatley.

Oats Variety Trials

Plant breeder Harold Marshall reviewed the characteristics of numerous varieties of spring oats on test.

A new variety called Hercules has shown good resistance to lodging, according to Marshall who estimates that the variety will probably experience 10-percent or less lodging under the same conditions that would lodge 40- to 50-percent of Ogle. No other varieties have been able to beat Ogle's consistently high yields, though, said Marshall.

Pa. Senate Approves RCMA Resolution

HARRISBURG – With a vote of 48 to 0, the Pennsylvania Senate unanimously adopted a resolution encouraging dairy farmers to become members of the Regional Cooperative Marketing Agency Inc. The resolution was adopted on Tuesday evening, reported Senator Edward W. Helfrick, R-27, chairman of the Senate Agriculture and Rural Affairs Committee and prime sponsor of the resolution.

"It is our concern as legislators that farmers be given every opportunity to improve their economic situation," commented Helfrick. "With RCMA, dairy farmers can work together to better their financial position by improving their milk marketing capabilities. "Helfrick noted it is up to each individual dairy farmer to decide whether becoming a member of RCMA is in his or her best interest.

RCMA was organized in 1973. Until recently, only dairy cooperatives could become members of RCMA. Now, following a restructuring of RCMA, any dairy farmer located in the Northeast can join.

RCMA's purpose is to obtain over-order prices. Members of RCMA will still receive milk checks from handlers for milk shipped at the blend price. Once over-order pricing is instituted, milk processors will pay the difference of blend price and over-order price to RCMA and the members will receive the premium on an equal basis.

Only RCMA members can benefit from the over-order system. Those dairy farmers who do not join, do not receive the premium. It is estimated that 95 percent of the milk producers in the Northeast are needed as RCMA members for the system to be most successful.

An RCMA marketing agreement is an annual contract with a Jan. 1 withdrawal date. However, until the first of January following a full year membership, a member may withdraw with ninety days notice, the Republican Senator noted.

There are 35 areas in the United States with provisions for over-order pricing. In the eleven state northeast region, roughly 91 percent of the dairy farmers have signed an RCMA agreement. In Pennsylvania, there have been roughly 29,000 of the 32,000 dairy farmers enrolled in RCMA.

Senate Resolution 65 was supported by the Pennsylvania Farmers' Association, the Pennsylvania Farmers' Union and the Pennsylvania State Grange.

New Feed Mill Set To Use Latest Technology

BY EVERETT NEWSWANGER
Managing Editor

MOUNT JOY — A car load of soymeal arrived at the new Pennfield dairy, hog and horse feed production mill at the time of this recent tour of the plant. So we watched as the Conrail train engineers maneuvered the feed car into the siding. The crunching of the tight, steel wheels against the train tracks gave ample indication that everything was new. And as the receiving room swallowed up the whole train car under roof, the process to take raw feed stuffs and turn them into "designed" feeds for each farm customer was ready to begin.

By the time this editor caught up with Ray Lehr, vice president and general manager feed marketing, and Kenneth Greenwood, director of milling operations, the 75-ton-per-hour feed mill located just east of town was in the prelimanary stages of testing the fully-automated machinery run by computer programs.

A computer system makes the mill fully automated as a two-man operation with very little paper work. Mike Bermel is at the controls.

The mill that is designed to operate at maximum efficienty can give each farm customer up to three or more different feed formulas at the push of a computer key. The new facility is expected to be in full production by July of this year. A menu of premixed pellets to adjust protein and energy needs to the customers on-farm grains and forages forms the backbone of the feed mill's formulations.

"By pelleting the premix, we can blend protein, energy and fiber into a precise mix for the dairymen," Greenwood said. "This works better than sending the fully mixed feed to the pellet machine. In addition, the new computerized mill can add any combination of minerals, feed suppliments or buffers on demand. A different combination for each order."

Of special interest is a new mixer of the type that puts the candy on frosted flakes in a cereal box. With this machine, any type of liquid can be coated on the outside of feed particles to help increase palletability or add additional nutrients to the ration. Special air currents lift the feed in the mixer so the paddles don't crush the feed particles.

While the mill is planned for efficient feed production for the coming decade, an additional facet of the facility involves research. Pennfield has allowed extra space in the plant to accommodate an agreement with Sprout-Bauer, a milling equipment manufacturer, to use the Mount Joy facility for research and new equipment trials in the future. This willl give Pennfield and Sprout-Bauer the opportunity to study various pieces of equipment and processes under production conditions over an extended period of time.

"Service is important," Greenwood said. "It is the area where you have the best chance to do something different and better. In light of this, the company has installed a central dispatch system which uses radio controlled trucks to give a quicker response to customers' requests. When I talk about quick response, I'm not talking about 24-hour notice. I'm talking about 6- to 10-hour notice. Something on that order," Greenwood said.

The facility has two hammermills, a 250 horsepower and a 100 horsepower unit. It also has a single-stand roller mill with 18 inch diameter rolls. In-line scales will be implemented to monitor the flow of whole grain ahead of the mill and ground grain out of the mill. Two four-ton mixers, a 250 horsepower pellet mill with a 32 inch dye and 300 horsepower pellet mill with a 26 inch dye with a variable speed drive also are installed in the plant. The 300 horsepower pellet mill will be used mostly for dairy feeds. "We are looking for big things out of this mill," Greenwood said. The plant

(Turn to Page A29)

Any number of micro ingredients or feed additives can be added to any ration with the push of a computer key.

Supply Management Pros And Cons Outlined At Meeting

BY MARJORIE KEEN
Chester County Correspondent

ATGLEN — Increasing producer prices and eliminating or reducing government dairy supports are the two main objectives of milk supply management, according to Robert Deaver, assistant general manager of Atlantic Dairy Cooperative. Deaver addressed approximately 20 dairy farmers at a special meeting Monday evening at Octorara High School, Atglen. Producers at the meeting sponsored by Octorara Young Farmers Association included Atlantic's district 11 and 15 plus others who wished to attend.

The co-op will be polling its members on supply management at the end of July, Deaver said. So that producers have "as much background and insight as possible" to make "an intelligent non-emotional decision." Atlantic Dairy Cooperative is discussing the various ramifications as it sees them.

"It's a complicated subject," Deaver remarked as he explained the historical basis for the supply management proposal in the local milkshed. He predicted that if the industry is behind the program it will take five years for it to come into being. "It will be a long-term program," he added.

The two largest U.S. dairy cooperatives, Associated Milk Producers, Inc. and Mid-American Dairymen both support development or implementation of supply management programs, according to Deaver. Although, he said, those positions were taken in 1986 when there was more of a surplus than there is now.

"The basic purpose of supply management," according to Atlantic, "is to limit milk production so as to achieve a desired producer milk price." To achieve that aim, Deaver stressed the need to tie production to consumer demand. He explained that the dairy buyout has brought about a good relationship between supply and demand this year.

Deaver compared milk producers to automobile manufacturers, who traditionally practice "supply control" by reducing output so as to hold prices at desired levels. Controlling milk production is considerably more difficult for four reasons: there are many more milk producers; there are large differences in producers' costs; production is a biological process; and weather influences production.

An effective milk production control program could work, in the co-op's opinion, if all U.S. milk producers decide to implement it with enabling Federal legislation.

"Supply management is a base program," Deaver told the producers. "It gives you a quota that generates a certain dollar. Anything you produce above that quota gets you nothing." Benefits are a desired producer milk price and elimination of the government's purchase of the excess. Drawbacks are elimination of free enterprise, limits on expansion, and difficulty for new producers to enter the business.

If supply management attains a desired price for producer milk that's higher than one that would otherwise exist, there would be associated costs. First, the right to produce milk (the quota) takes on value. A new producer would not only have to buy cows and equipment but, also the right to produce. On the other hand, a retiring farmer can reap a "windfall" by selling his quota. Second, if producers raise milk prices beyond those that would exist without the program, consumers will buy less. Third, administrative costs will be incurred.

In Canada, where supply management programs took effect in the early 70's, farms have dwindled faster proportionately than in the United States, Deaver cited. The cost of entering the business have become higher because of the added value given the right to produce.

Deaver mentioned also the current supply management programs in California and in the European Economic Community. To be effective, he stated, a program has to consider both regional and local characteristics.

To help producers better understand milk supply management, Atlantic has published a 15-page booklet. This brochure is available to all members by request from Atlantic Dairy's Southampton office.

New Feed Mill

(Continued from Page A28)

also has a totally automatic bagging system.

"While we want to give an efficient feed service now," Lehr said, "we also want to be geared up for whatever comes in the future. We can make a good feed for a 20,000 pound cow, but when we get increased production, say up to 30,000 pounds, we want to use every new technology that comes along to feed her the caloric and nutritional ingredients she needs for this high production.

This mill is way ahead of just blending corn oats and soy and adding some minerals to make a good 16 percent feed. We believe we have planned for future needs that will keep this plant on the leading edge of technology for years to come," Lehr said.

Milk Promotions Go To Bat In August With The Phillies And Orioles

TOWSON — MAMMA, the Middle Atlantic Milk Marketing Area's advertising and promotion agency, will be encouraging young Phillies and Orioles fans to remember to drink their milk when they go back to school. MAMMA is sponsoring, "Back To School" milk promotions in late August with the Phillies at Veterans Stadium and with the Orioles at Memorial Stadium.

Each fan, 14 years or younger, that attends the Phillies vs. Los Angeles Dodgers game on Sunday, Aug. 23, will receive a free three-ring notebook, compliments of MAMMA. On the cover of the notebook is a picture of a milk carton and the slogan, "Milk. It's Fitness You Can Drink." Inside the binder will be manufacturers discount coupons for dairy products.

In Baltimore, a similar notebook will be given out on Sunday, Aug. 30, as the Orioles take on the California Angels. Inside these notebooks Giant Food will be inserting cents off coupons for dairy products and other food items.

These promotions continue an ongoing association between milk and baseball, America's favorite summertime sport. The popularity of the sport and of MAMMA's milk ambassadors, Cal Ripken, Jr. and Mike Schmidt, have proven to be a great association for milk. Broadcast baseball games command large viewer and listener audiences. For this reason MAMMA has been a major advertising sponsor of both the Phillies and Orioles, placing milk commercials featuring Schmidt and Ripken on broadcasts of their games.

A milk print ad of Schmidt appears in "Phillies today," the team's official scorecard magazine sold at all home games. Likewise a milk ad featuring Ripken appears in the Orioles scorebook. The stadium promotions reinforce the milk-fitness message to baseball fans. Advertising milk on the notebook will give the message, "Milk. It's Fitness You Can Drink," a high residual value, as children view the message every day through the school year.

The Aug. 23 Phillies, Back To School game begins at 1:35 p.m. Tickets are available at all Ticketron locations.

The Orioles, Back To School game begins at 2 p.m. on Aug. 30. Tickets can be ordered by phone and charged to your major credit card. In the Baltimore Metro Area call 792-4001,. outside this area call toll free 1-800-448-9009.

Order 2 Milk Priced At $11.30 For May

NEW YORK — Dairy farmers who supplied milk plants regulated under the New York-New Jersey marketing orders during May 1987 will be paid on the basis of a uniform price of $11.30 per hundredweight, 24.3 cents per quart; the price for the corresponding month last year was $11.25 per hundredweight. Market Administrator Thomas A. Wilson also stated that the price was $11.55 in April 1987. The uniform price is a marketwide weighted average of the value of farm milk used for fluid and manufactured dairy products.

The seasonal incentive plan removed 40 cents per hundredweight from the dairy farmers' uniform price for May, a total of $4.3 million. Deductions will continue through June and will be returned in the August through November uniform price calculations.

A total of 14,934 dairy farmers supplied the New York-New Jersey Milk Marketing Area with 1.1 billion pounds of milk during May 1987. This was a decrease of 4.6 percent, about 52 million pounds, from last year. The gross value to dairy farmers for milk deliveries was $12.3 million. This included differentials required to be paid to dairy farmers but not voluntary premiums or deductions authorized by the farmer.

Regulated milk dealers used 386.2 million pounds of milk for Class I, 36.0 percent of the total. This milk is used for fluid milk products such as homogenized, flavored, low test, and skim milks. For May 1987, handlers paid $13.58 per hundredweight, 29.2 cents per quart, for Class I milk compared with $13.57 a year ago.

The balance 685.7 million pounds or 64.0 percent, was used to manufacture Class II products including butter, cheese, ice cream, and yogurt. Handlers paid $10.88 per hundredweight for this milk.

The uniform price is based on milk containing 3.5 percent butterfat. For May 1987, there was a price differential of 15.9 cents for each one-tenth of one percent that the milk tested above or below the 3.5 percent standard.

All prices quoted are for bulk tank milk received from farms in the 201-210 mile zone from New York City.

Milk Priced In Order 4

ALEXANDRIA, Va. — Middle Atlantic Order Market Administrator Joseph D. Shine announced a May 1987 base milk price of $12.39 per hundredweight and an excess milk price of $10.80.

The weighted average May price was $12.32 and the butterfat differential for the month was 15.9 cents. The base milk price was down 21 cents from April but was 3 cents higher than last May. The weighted average price was down 20 cents from April but was 5 cents higher than a year earlier. The gross value of May producer milk was $69.8 million, compared to $70.5 million a year ago.

Shine said that producer receipts totaled 568.3 million pounds during May, a decrease of 8.5 million pounds from last May, and the average daily delivery of 2,844 pounds per producer increased 14 pounds or 0.5 percent from a year earlier.

Class I producer milk totaled 251.1 million pounds and was up 5.7 million pounds or 2.3 percent from last May. Class I milk accounted for 44.18 percent of total producer milk receipts during the month, compared with 42.55 percent in May 1986.

Base milk accounted for 89.34 percent of total producer milk receipts in May, compared with 88.50 percent last year. The average butterfat test of producer milk was 3.58 percent, up from 3.57 percent last May.

Middle Atlantic Order pool handlers reported Class I in-area milk sales of 211.7 million pounds during May, an increase of 2.4 percent from a year earlier after adjustment to eliminate variation due to calendar composition.

Dairy Promotion

(Continued from Page A1)

also explained that the butter coupon was included to get couples started on using real butter.

The promotion is expected to reach at least 90 couples. Franklin County issued 99 marriage licenses during the month of June 1986. Thirty-four packets had been given out as of June 11, 1987.

Clerk of Courts Robert J. Woods (left) gives a dairy promotion packet to marriage license applicants Lucinda Allison and Arthur Coldsmith, Shippensburg.

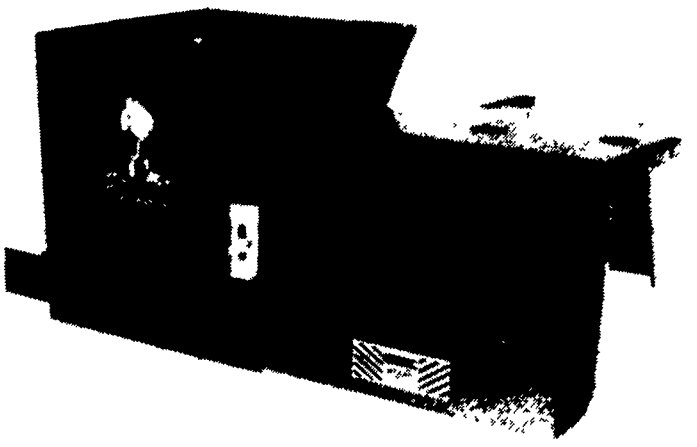
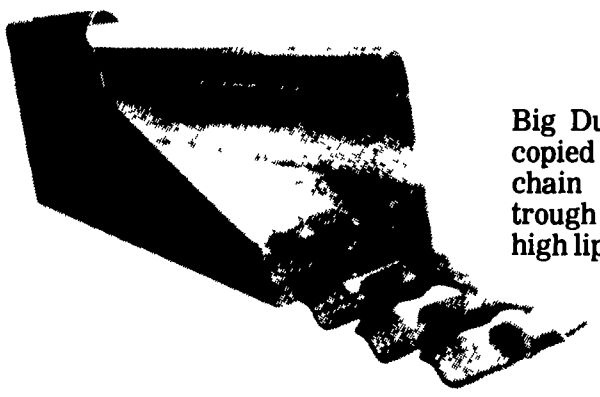
BIG DUTCHMAN FEEDING SYSTEMS FOR LAYER AND PULLET CAGES

Built on Thoroughly Proven Designs. No Other Feeder Beats it for Reliability and Performance

The straight hopper drive unit is easy to work with and simplifies maintenance. The standard hopper is powered by a helical gear-motor drive.





Big Dutchman feeder chain is the original, which is now copied by nearly all poultry equipment companies. The chain literally carries feed in the trough. The Big Lip trough effectively reduces spillage because of the extra high lip and curl.

Corner wheel assembly guides the chain and feed around the turns to make the endless flat chain conveyor possible. The fluted idler wheel and corner rail keep the chain running true.

Suzanne Hash, York County dairy princess, gets a special view of the Buck Tractor Pull last Saturday evening from the Super Tiger tractor owned by Alfred Wiles from Mount Airy, Maryland.

This special event was the Show Ease dairy night sponsored by Show Ease stalls and supported by six local dairies who donated free milk. These dairies include: Oregon Dairy, Kreider Dairy, Maplehoff Dairy, Pine View Dairy, Ridge View Dairy and Turkey Hill Dairy.

Approximately 1800 people attended the annual event.

30 YEARS AGO
THIS WEEK

-Now is the Time... To Inspect Lightning Rods... To Keep Steer Stables Clean... To Be Alert For Armyworms... To Take Your Time Combining.

-The State Department of Agriculture said today 1957 Pennsylvania fruit prospects are near normal, but peach crops in the southeastern counties are variable because of low temperatures in early May.

-A disastrous fire at Manheim some time ago which partially destroyed the Farm Bureau feed mill caused no serious inconvenience to either the farmers, who obtain their feed supplies there, or the half-a-hundred employees who work there, according to Farm Bureau spokesmen.

First estimates were that it would take six to nine months to put the mill back into operation, mill superintendent I.A. McFarland said. But a Lancaster County firm, the Daffin Company, moved a large mobile unit into the plant after the debris was cleared.

-The new plastic greenhouse is getting a hard field trial by the Wissler Flower Co. of Lancaster this year.

The Wisslers plan to build 10 houses 200 feet long to be placed over field-grown mums this summer. The houses, built in sections, will be portable, thus allowing them to be moved from one bed to another.

The idea of a plastic greenhouse is relatively new. It was first introduced into this county by the firm that manufactures the plastic at a meeting of florists this spring. The plastic, one of the film type sheets, comes in rolls of various widths.

-The State Department of Agriculture warned farmers and gardeners Wednesday to be ready for an earlier than usual arrival of Japanese beetles.

-Tourists returning to the United States from abroad this summer should resist spur-of-the-moment urges to bring back unprocessed foods, plants, and seeds, the U.S. Department of Agriculture says.

Enticing though they may taste, smell, or look, foods and plant materials from abroad can harbor insects or diseases harmful to the U.S. Agriculture, says USDA's crops regulatory officials. Even the soil attached to plant roots can transport microscopic pests.

Jersey Summer Seminar Set

CHAMBERSBURG — The Pennsylvania Junior Jersey Cattle Club will hold its annual summer seminar July 10 and 11 at the farm of Ted and Carolyn Small, Chambersburg.

All youths with an interest in Jerseys are invited to attend the seminar.

Activities begin at 2 p.m. July 10 with games, swimming and fellowship. Saturday's program will feature a fitting and showing clinic presented by Doug Martin. Those attending the two-day seminar should bring appropriate clothes, clippers and an extension cord.

There is no charge for the seminar but pre-registration is required. To register contact Carolyn Small at 717-264-3839 before July 4.

Central PA Championship Show, Huntingdon Fairgrounds, Huntingdon.
September 1- 9:30 a.m.
Centre County Holstein Show, Grange Fairgrounds, Centre Hall.
September 11- 9:30 a.m.
Fall Championship Show, Ag Arena, Penn State.

Dairymen Plan To Maintain Or Increase Herd Size

SHAWANO, Wis. — Dairy farmers throughout the county agree on one thing: reduction of herd size is not in their future. That's one conclusion to be drawn from a recent 21st Century Genetics study.

Farmers in the Upper Midwest, however, are leaning toward keeping their cow numbers stable while other regions are indicating aggressive expansion plans.

The Upper Midwest, Northeast and East central states reported a uniform 2.9 percent with plans to reduce herd size while not a single Western dairyman indicated smaller herds were in the future.

The nationwide survey is one of the first taken in the wake of the federal whole herd buy-out program.

Taken by region, 15.4 percent of the dairy farmers in Wisconsin, Minnesota and Iowa are eyeing larger herds while 43.5 percent of western dairymen are considering more cows.

Farmers in the Northeast and east central states have similar aims with both regions reporting about 23 percent of the herds may be expanded in the coming months.

The answers contrasted sharply with those given by farmers to a similar question in 21st Century Genetics' 1985 survey. The 1985 survey was completed prior to the federal farm bill's enactment.

In that study, the national sample showed expansion was on the minds of 26.9 percent of those responding. Holding their herds at the same size was the plan for 67.5 percent and reduction in numbers was the goal for 5 percent.

The 1985 study did not analyze responses by region.

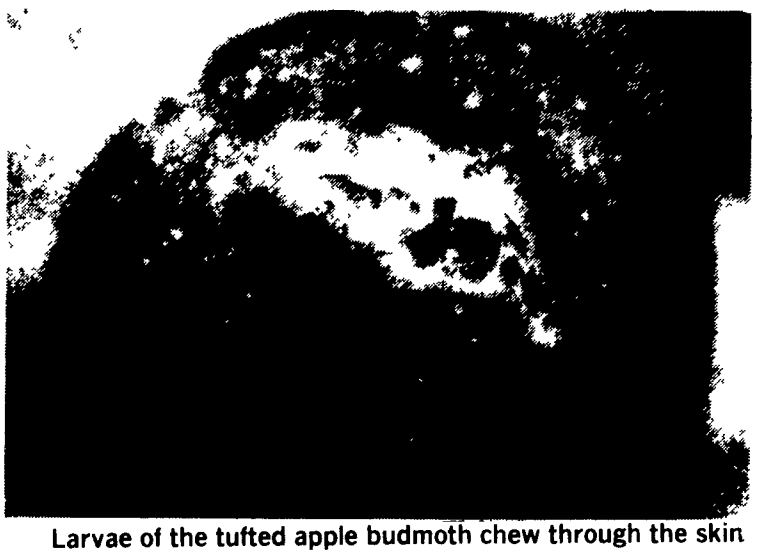
Apple Growers Need Balanced Pesticide Program

For most apple growers throughout the mid-Atlantic region, successful Integrated Pest Management programs depend on a carefully managed balance between chemical use and natural predators. Many growers reduce the volume of insecticides applied to an orchard by spraying alternate row middles while relying on natural predators to help control pests such as European red mites.

Understanding how most commonly-used insecticides affect beneficial insects as well is the first step in maintaining the delicate balance between pests and predators. This is particularly important when it comes to controlling tufted apple budmoth – the number one insect pest for most growers in the mid-Atlantic region including Pennsylvania, Maryland, Delaware, New Jersey, Virginia and West Virginia.

"Many growers in Pennsylvania have a good integrated pest management strategy that uses the mite predator, ***Stethorus punctum***, a ladybird beetle, to help control mites and eliminate or reduce the use of miticides," says Dr. Larry Hull, associate professor of entomology with the Pennsylvania State Fruit Research Laboratory in Biglerville, Penn.

"Unfortunately, ***S. punctum*** is susceptible to some insecticides used to control tufted apple budmoth. During key application times growers generally try to use the least amount of insecticide they can to control budmoth without killing mite predators. It's a balancing act.



Larvae of the tufted apple budmoth chew through the skin of apples, causing unsightly scars.

"For tufted apple budmoth control, most growers use a combination of an organophosphate, such as Lorsban, Guthion, Imidan, Penncap-M or Zolone, plus methomyl (Lannate or Nudrin)," Hull says. "The combinations are popular because methomyl is slightly toxic to mite predators, especially when used as a full rate. It's important to keep the rate of methomyl fairly low.

"On the other hand, the mite predators are tolerant of many organophosphates, so growers often use a broad spectrum insecticide like Lorsban in combination with methomyl to help control tufted apple budmoth as well as other pests," notes Hull.

While several other insect species are also considered major pests, tufted apple budmoth is of primary concern to most mid-Atlantic apple producers because of its potential to cause economic damage. Tufted apple budmoth larvae are notorious for chewing through the skins of apples, causing unsightly scars and leaving the fruit undesirable for fresh market sales. The amount of damage typically ranges from 5 percent to 20 percent of the crop each season.

A member of the leafroller family, some budmoth larvae feed on leaves as well as the fruit. They cut partway through the leaf petiole, causing the leaf to wither and hang limp on the tree. The worm then spins a web and wraps the dead leaf around itself.

Two generations of tufted apple budmoths per season can cause fruit injury. First generation egg hatch typically occurs from about June 10 to July 10, with the second generation hatching around mid-August.

"Properly timed insecticide sprays are important because tufted apple budmoth, like other leafrollers, has the ability to protect itself inside rolled leaves," says Dr. Henry Hogmire, West Virginia University Extension entomologist with the Experiment Farm in Kearneysville, W.V. "Once inside a rolled leaf, growers usually can't kill them because they don't come into contact with the spray

"Our objective is to get growers to begin insecticide applications just prior to egg hatch and to maintain a fresh spray deposit on the leaves throughout the egg hatching period," Hogmire explains. "The young larvae are killed as they crawl across the leaves and don't have the chance to injure the fruit."

Most fruit damage is caused by the second generation of larvae, Hogmire adds. "There are a number of reasons why the second generation does more damage. It's more difficult to spray trees later in the season because foliage canopy is fuller and the fruit is larger. Also, some growers may stop spraying before second generation egg hatch is complete."

Hogmire recommends that growers keep spray intervals short, applying insecticide sprays about five to seven days apart when following an alternate row middle program or allowing 10 days between full cover sprays. Growers also need to be aware of special product restrictions, such as preharvest intervals and limited applications per season

USDA Buyout Report Update

WASHINGTON — An estimated 5,500 head of dairy cattle were slaughtered in federally inspected plants during the week ending May 30, as a result of the Dairy Termination Program, the U.S Department of Agriculture announced Wednesday.

This total includes all cows, heifers and calves identified as dairy animals designated for disposition in compliance with the program requirements.

The cumulative total of cattle slaughtered under the program from April 1, 1986 through May 30, 1987 is an estimated 1.1 million head.

The purchases of meat in addition to normal purchases are to help offset the effects of the DTP on the domestic meat market. The cumulative purchases, reported biweekly as of June 13, total 383.4 million pounds. For the two-week period ending June 13, the government purchased 3.9 million pounds of meat.

Dairy cattle reported for export under the program for the buyout program to date totaled an estimated 58,637 head. A total of ,662 head were exported during the week ending June 13.

Agmark Intermodal Systems, Inc.

Dear Dairy Farmer:

I would like to thank all of my customers for including whole cottonseeds in their feeding program this past season. We have shipped thousands of tons of this unique feed ingredient into this region and with spring planting now complete it is time to make plans for next years usage.

Whole Cottonseeds have proven to be a feed ingredient that works. In the past five years (1981-1986) seeds fed whole have grown from just over 7% of the available crop to well over 40%, an incredible increase!! Agricultural Outlook (May 1987) has reported that acreage planted for cotton has increased 3% over last season, and a return to normal yields should equate to a production increase of 12-20%. We hope this will mean lower prices in the coming season.

For more information on "**Natures Little Dairy Pellets**"™, current price quotes, and crop conditions call me toll-free (USA) 1-800-424-6275 or (PA) 1-800-424-7770. I look forward to hearing from you!

Sincerely,

Mary Beth Hagemeyer

Elevated Radium Levels Found In SE Pa. Groundwater

HARRISBURG — A map showing areas of southeastern Pennsylvania where groundwater may contain elevated levels of radium has been released, Department of Environmental Resources officials said recently.

The potentially-affected area is in the Chickies Geologic Formation, a 112-square mile quartzite formation in portions of Bucks, Chester, Lancaster, Montgomery, York, Adams and Berks counties.

Elevated radium levels were found in three public water supplies which resulted in a co-sponsored study by the United States Geological Service and DER. That study began in October 1986. The USGS Water Resources Division, Malvern, found radium exceeded the 5-picocurie-per-liter maximum contaminant level established for public water supplies in 19 of 56 private drinking water supply wells.

Margaret Reilly, DER's chief of environmental radiation, explained that drinking two liters of water daily containing 5 picocuries per liter poses a risk of 0.7 to 3 cancer possibilities per million persons per year which may result in bone cancer. The body absorbs radium in much the same way as calcium and therefore, could lead to radium being deposited in bone.

Private water supplies are not regulated by DER. However, the Bureau of Community Environmental Control will explain the results of private testing that well owners may choose to have done.

L. Dewayne Cecil, USGS hydrogeologist said water from 130 additional wells will be tested as part of the continuing study.

For information on appropriate tests and commercial laboratories that accept samples from private wells, contact:

Reach For The Sky!

New Holland "Super Boom" loaders lift the payload forward as the boom rises. So you get more forward dump reach where you need it most. Extra dump reach means you can load the center of a tandem-axle dump truck.

Super Boom loaders also feature a longer wheelbase for increased stability and fast cycle times for more productivity.

Models range from 28.5 to 75 horsepower with SAE load rating up to 2,050 pounds.

Ask us for a demonstration. You'll see how much better a skid-steer loader can be

Dairy Of Distinction

(Continued from Page A1)

ılsteins, Jack Miller, manager, Jım Taranto, herdsman, Kempton; Hubert and Grace Sell, Crystal Spring Farm, Schnecksville.

After dinner, Russell Rooks, district chairman, welcomed the group and along with county agent Jack Erway showed a few slides of the winning farms and families.

Sue Reynolds, executive secretary of the program, told of the success of the new venture in Pennsylvania and announced plans for additional recognition at the state level during Ag Progress Days this fall.

Everett Newswanger, state board chairman, made the presentations.

Lancaster Holstein Club Announces Summer Schedule

LANCASTER — The Lancaster County Holstein Show will be held on July 23 at 10 a.m. at the Solanco Fairgrounds in Quarryville.

Entry fees for the show will be $3 per head for those entries which are received before June 26. The late entry fee is $6 and will be accepted until July 3. All entries should be sent to Sandra Thomas, 101 Dorianne Drive, Willow Street, Pa., 17584.

Dennis Wolff will serve as judge for the event. Jack Remsburg will be available throughout the day for photos of show cattle as well as non-show cattle. However, health papers are required for all animals which arrive on the fairgrounds.

The annual field day of the Lancaster County Holstein Club will be held at the farm of Harold and Cindy Shellenberger, Mount Joy, on Aug. 6 at 7 p.m.

The Conestoga Classic is scheduled for Aug. 13 at the Lampeter Fairgrounds. Anyone interested in consigning to the sale should contact Arlen Keener, 717-285-7426, Paul Welk, 717-548-2597, or Elvin Hess, 717-687-6697.

PM Magazine Hosts Lancaster Dairy Royalty

Lancaster County Alternate Dairy Princesses Mary Witmer, second from left, and Lorri Rutt, third from left, took their ice cream making skills to television this week as they filmed a segment for WGAL's "PM Magazine." PM Magazine producer Duane Brozek said the purpose of the ice cream making spot is to get viewers at home thinking of ice cream and, hopefully, to get out their own freezers.

The spot will be aired Tuesday, June 23 on WGAL Channel 8 starting at 7:30 p.m. In the above photo, the dairy promoters show PM Magazine co-hosts Doug Allen and Nancy Byrne how much milk is needed to create a perfect, creamy result, while cameraman Max Zug zooms in for a close-up.

Farm Safety

(Continued from Page A1)

Of particular concern, said the safety expert, is the rash of accidents occurring with ATV's, or all-terrain vehicles, popular as both work and recreational machines on many farms. "The majority of the accidents involve kids and new riders," Murphy pointed out.

University of Maryland Extension agricultural engineer Gary Smith says that machinery accidents top the list in his state, but two surveys uncovered some surprising facts. A farm accident survey conducted in 1984 involved 585 randomly selected farms across the state. Even though dairy farmers made up only 15 percent of the the respondents, they accounted for 50 percent of the accidents. Almost all the mishaps involved machinery, primarily tractors.

Ironically, it appears the group closest to the problem doesn't have a good handle on the situation. With the help of five county agents, Smith surveyed farmers from a large area of Maryland concerning their perceptions of the safety issue. Only 3 percent of those responding listed the tractor as the most dangerous piece of equipment on the farm, while 41 percent ranked the combine number one. "So somehow our safety message isn't getting through," Smith said.

The survey also showed that older farmers were the most safety conscious. Of the respondents over 40, the majority said they had safety guards on all or most of their equipment, while the under-40 group only had some of their machinery guarded. Smith suspects economic concerns come into play here, since the younger farmers may have less money and time they're willing to devote to safety measures.

Tractor and equipment-related mishaps head the list in New York, too, according to Dr. David Pratt of Mary Imogene Bassett Hospital in Cooperstown. Behind equipment injuries come animal-inflicted injuries, followed by agrichemical problems, stress and hearing loss.

The solution to many of the tractor-related mishaps is obvious says Pratt, pointing out that, of the 45 farm deaths in 1985, nearly half involved tractor overturns that could have been prevented by roll-over protective devices.

More incidious, though, are lung problems, says Pratt, a pulmonary specialist who is concerned about the incidence of lung problems among New York's dairy farmers. Two diseases familiar to most farmers are silo fillers disease and farmer's lung. But a third malady, organic dust toxicity syndrome, is also taking its toll.

Although ODTS elicits symptoms similar to farmers lung, the former is actually a poisoning caused by breathing toxic dust and spores, while farmers lung is an allergy. ODTS is associated with handling haylage and corn silage, and symptoms include chills, fever and night sweats, according to Pratt.

To minimize the dangers of ODTS Pratt recommends leveling the silage after the silo is filled and covering it with plastic to reduce spoilage on the top layer. When removing this top material, wet it down to minimize dust and wear an approved dust mask. Also, running the blower maintains downward pressure in the silo, minimizing the "chimney effect," or natural upward movement of air and dust particles.

Pratt also pointed out that the increase in confinement livestock farming may be responsible for a corresponding increase in pulmonary problems. Hog producers, for example, are exposed to a variety of pollutants in buildings, including hydrogen sulfide and methane gas, animal hair and dander and grain dust. "Those workers all ought to wear masks," Pratt cautioned.

Pratt also emphasized that hearing problems aren't taken seriously enough in the agricultural community. "The equipment on farms is extremely noisy," he said, estimating that from 25 percent to 30 percent of New York farmers suffer from some degree of hearing loss.

In general, observed the pulmonary specialist, farmers need to take the potential downtime resulting from farm-related hazards more seriously. "The economic costs are unacceptably high," he stressed.

How can you raise healthier calves?

fiberdome INC. CALFhutches are your answer

Raising calves is a tricky business. That's why modern calf raisers are going to individual hutches ...to help save more calves by cutting down on pneumonia, scours and hoof problems. Properly made hutches help eliminate the dampness, crowding and poor ventilation that plague many calf barns.

You can be assured of this kind of healthier environment with Fiberdome CALFhutches. Their unique one-piece construction of heavy gauge fiber glass makes them weather-proof, so they will last indefinitely with normal care. No joints for moisture and bacteria to creep through. A white gel-coat finish keeps them cool in summer.

When not in use, stakes can be removed and strong U-bolts on top let you conveniently pick units up to clean or stack for compact storage.

CARTER 1987

Patriarchal Houseplant Traces Roots To WW II Era

BY BARBARA MILLER
Lycoming County Correspondent

DUSHORE — How old is your oldest houseplant? Most of us are quite proud if our houseplants survive to the ripe old age of five and occasionally even 10 years. And some, if we confess, are proud if one survives beyond a month, excepting cacti.

Therefore, one has to admire the meticulous perseverance of 74-year-old Florence Toothaker of Dushore who possesses an attractive philodendron plant she bought 42 years ago in August 1945.

Florence says she remembers exactly when she purchased the plant because she had gone to Sayre for his six week's check-up after the birth of her youngest child, Grade Ann. At the time Florence had been married nine years and World War II had just ended.

Florence's 42-year-old relationship with her plant has lasted well beyond that of most human relationships. There are few friendships that span 42 years and in our generation, even fewer still marriages that flourish 42 years.

Considering changes in her life since she bought the vine, Florence notes that her three children have now grown and moved away and that the infant mentioned above is now Mrs. James DeLong with a husband and five children of her own. And after 47 years of marriage Florence's husband, Elwood, passed away in November 1983.

According to Florence, for almost all of its 42 years the philodendron vine has occupied a stand in her small living room in front of a window. Since that room is about the best spot in the house for taking pictures, Florence says, the plant appears (and perhaps rightfully so) in numerous family photographs.

The attractive plant is covered with a multitude of healthy green leaves splashed occasionally with touches of white. Totally enveloping the stand, except for the legs, the vine, which is twined innumerable times around the table, has a diameter of 6 feet.

"In its younger days I used to take it out to the kitchen and wash the leaves, but now I use a turkey feather duster to dust the leaves," Florence says. "It's too big I can't lift it anymore and it's too big to go through the door," she explains.

What's Florence's secret for keeping her plant alive and healthy for so long?

"I think spring water had a lot to do with it. It was fed with spring water and that's a good window for it. I watered it twice a week and it never happened to get bumped over," she says.

As efficient as Florence appears to be, no doubt all her plants can feel it in their roots when Wednesday and Saturday mornings arrive. Those are the mornings each week when Florence has always watered her house plants. She sets aside the first Saturday morning of each month, she says to feed her plants. Doing a little arithmetic, one comes up with a figure of 4,368 consecutive times that Florence has watered her philodendron. The operative word here, of course, is consecutive.

Regular watering is at least partially responsible for Florence Toothaker's success with this 42-year-old philodendron plant.

Florence shows her favorite violet, a North Carolina violet that is deep purple and fully petalled.

Florence has used various fertilizers dissolved in water to feed the plant, but preferred one made especially for philodendrons that is no longer available.

It was just "ordinary ground," Florence recalls, which she used to pot the vine when she transplanted it from its original container to an old wooden butter bowl. She remarks that for several years thereafter she never fertilized the vine.

"It ate the bowl up," she says.

After a number of years she put aluminum foil under the old bowl so it didn't leak on the stand and when she eventually replanted it she found no trace of the original wooden bowl. Now, she reports, it is planted in a ceramic washbowl

Homestead Notes

Pa. Veal Queen Cindy Harnish Promotes State's Veal Industry

BY CRAIG BINGMAN
Snyder County Correspondent

MIDDLEBURG — Lucinda "Cindy" Harnish was recently elected Pennsylvania Veal Queen in a premier competition staged in Williamsport, Lycoming County. The first state veal queen, she is a 1987 graduate of Lancaster Mennonite High School.

The daughter of Clayton and Dolores Harnish of Willow Street, 18-year-old Cindy plans to attend Goshen College in the fall to study home economics.

As Veal Queen, Cindy feels good about her job of promoting the veal industry. "I want to inform the public of the basic facts of veal," she says. "Veal has very good nutritional benefits. It's low in calories and high in B vitamins."

One way Cindy plans to reach the public is through promotional materials, including brochures and pamphlets. She is also working on getting a veal recipe book to distribute at promotions. "A lot of people don't know how to cook veal," she says. "They don't know that it's really easy to cook."

Cindy is also compiling a list of stores and restaurants in Pennsylvania where veal is available. "A lot of people don't know where to get it," she says.

Since her coronation May 9, Cindy has conducted two promotions, one at the Triple G Farm Store in Denver and the other at Keister's Middleburg Auction. In addition to distributing printed information about veal, Cindy lures people to her booth by offering tastes of cubed veal.

"Everybody who tries it likes it," she notes, adding. "It's just getting people to try it."

Many people associate veal with breaded veal patties they purchase in the frozen foods section of the grocery store, but they often aren't a top quality product, she says. "Once people taste the milk-fed veal, they can't believe how good it is."

To help unsuspecting shoppers distinguish fancy veal from lower quality products, Cindy hopes to develop a "Fancy Veal" sticker similar to the dairy industry's Real Seal.

Cindy's family has been in the veal business for 15 years and their farm can accommodate as many as 220 calves at a time. Her experience growing up and helping on the family farm has given her the knowledge and experience she needs to be an effective spokesman for the industry.

"I've always wanted a chance to promote veal and I got my chance," she says, adding that the job of veal queen is taking more time than she anticipated. "It's really turning out to be a full-time job, but it's a lot of fun and I am really enjoying promoting veal.

"It's often what we talk about at the dinner table. It's my life."

While promoting veal takes a big chunk of her time, Cindy's interests and talents go beyond the farm. An experienced seamstress, Cindy took 4-H clothing projects for years and started a 4-H club to teach others how to sew. A 4-H'er for 10 years, Cindy also carried sheep projects.

Lancaster County does not yet have a 4-H veal project, but Cindy hopes to help organize one.

In school, Cindy was active in various clubs and sports and was a member of the Future Agriculturists of America, a club similar to FFA.

As 1987 Veal Queen, Cindy will work with two Veal Ambassadors, 17-year-old Stacy Bagley of Sullivan County and 20-year-old Lisa Shaffer of Somerset County. Together, the girls will travel across the state promoting veal in supermarkets at shopping malls and in classrooms.

The Pa. Veal Queen, as well as the Pa. Cattlemen's Queen Program, is funded by the check-off and is coordinated by the Pennsylvania Beef Council.

Cindy is available for promotions at fairs, banquets and other special events. She may be contacted at 414 Mt. Hope School Road, Willow Street, Pa. 17584 or by calling 717-464-2430.

Pa. Veal Queen Cindy Harnish, left, and Joan Liesau of the Pa. Meat Marketing Program prepare veal samples for distribution at the 6th Annual Pa. Agriculture Promotion in Snyder County.

Patricia Dunkleberger Wears 1987 Cumberland County Dairy Princess Crown

CARLISLE — Patricia M. Dunkleberger, the daughter of Mr. and Mrs. Robert D. Dunkleberger, will represent Cumberland County dairymen as the county's new dairy princess. Patricia was crowned by 1986 Dairy Princess Sherry Greegor June 12 during ceremonies at the Embers Convention Center on the Harrisburg Pike.

A 1987 graduate of Boiling Springs High School, Patricia also attended Cumberland-Perry Vo-Tech School. She is employed by Wayne Noss Flowers, Boiling Springs. Patricia enjoys gardening, floral designing, crafts, and reading.

Michelle A. Davidson, the daughter of Mr. and Mrs. Robert B. Davidson of Shippensburg, was selected as alternate dairy princess.

Each contestant had a personal interview with three judges prior to the coronation. They were judged on poise, personality, and knowledge of the dairy industry. They were also interviewed on stage by Master of Ceremonies Scott Smith of Shippensburg and each successfully answered questions relating to the dairy industry. They were also judged on their creative promotional skit.

Patricia Dunkleberger, right, was crowned 1987 Cumberland County Dairy Princess June 12. Michelle Davidson, left, was named alternate princess.

This year's junior dairy representatives were introduced as Jeanette Anderson, Darlene Coover, Kimberly Davidson, Christine Davidson, and Joann Glesner.

In her farewell speech, Sherry tearfully thanked those who were especially helpful during her reign. Adding, "I can't believe I'm giving this up."

Judges for the Cumberland County pageant were Corry Eaton, Clarksburg; Sandy Kling, Landisburg; and Peggy Morehart, Jersey Shore. Entertainment was provided by the talented Harrisburg area band, "Head Over Heels."

Red Rose County FFA Members Elect Officers

NEW HOLLAND — Red Rose County FFA members elected officers during a meeting at Garden Spot High School May 4.

The new officers are: president, Craig Kreider from Solanco; vice president, Sharon Zimmerman from Ephrata, secretary, Steve Gochenaur from Manheim; treasurer, Dave Cassel from Manheim; reporter, Gretchen Frederick from Grassland; chaplain, John Summy from Manheim; sentinel, Jeff Craig from Solanco; student advisor, Tom Wiker from Solanco; and corresponding secretary, Brent Fox from Ephrata.

The Red Rose County FFA will meet next on June 22 at 7:30 p.m. at Solanco High School.

Houseplant

(Continued from Page B2)

from an old pitcher and washbowl set. "I didn't think it would eat that up," she says with a laugh.

Over the years, Florence observes, people asked her for slips of the plant and she obliged them. Then she noticed sap ran from the plant in exorbitant amounts and it would take quite awhile for it to heal.

"It just seemed as though it was shedding tears," she recalls. At that point she decided to take no more slips from the vine.

Why has Florence kept the philodendron all these years?

"A couple of times I thought it was too big to manage. I was going to give it away but I changed my mind. I guess it was sentimental reasons... I got it when Grace Ann was a small baby and I needed something for that corner.

Despite a small stroke that required surgery and a broken arm in recent years, Florence, who retired in 1980 from the office of a local manufacturing firm after 22 years of service, remains active. She has helped with the cancer fund drive, is currently serving as a volunteer at the local library and is active in her church. Three years ago, at age 71, she ended a four year stint as nursery teacher for the Sunday school of her church. Efficient as always, attendance for Sunday school classes across the land would no doubt improve if they followed her unique example.

"I always took a plate of homemade cookies and we all sat at the table and folded our hands till we said the prayer. And then we would pass the cookies and there was no grabbing. While they were eating I would read the Bible story for that day."

Florence says her plant would grow forever as long as it was fed and watered but she hasn't put it in her will. If it outlives her, she says, "The kids will have to decide what to do with it."

On being a farm wife -And other hazards

Joyce Bupp

"Uh, we had some intruders overnight."

My head snaps up from where it was buried in the newspaper and panic thoughts wash by like waves in the wake of his announcement.

Intruders? Cattle rustlers like those who made off with heifers in past years? Baling twine thieves? Another drop-by who heisted a bag of corn and a new shovel?

"I guess the heifers decided they were extra hungry. A couple of 'em crawled through the fence."

Oh my. Intruder is much too nice a word here.

Calling escaped heifers intruders is like saying Atilla the Hun was a street vandal or that General Custer and the Indians had a minor disagreement at The Little Big Horn.

Escaped heifers equal a full-scale, major destruction and devastation derby.

Heifers are like all carefree adolescents. Like kittens unraveling yarn all over the living room floor or hanging from the dining room drapes. Or like puppies that chew up new boots and drag wet wash from the line and through the muddy flower beds.

Or, in other words, what they do, they do with eagerness and abandon. And with an unmistakable, undeniable, streak of mischieviousness.

First thing heifers on the lam do is classic escapism: they run.

Run, kicking heels and scattering dust. Run, making paths through tall, damp alfalfa, flattening stalks of corn. Run, in any direction but that which goes back to any fenced or walled area in which they might be corralled.

Then, once they get that out of their systems, it seems they tend to drift back toward home. Maybe just to see if anyone noticed yet. And, if someone hasn't, — as in the case of overnight escapades — then it's time to get down to some serious plundering.

Key plundering strategy on this farmstead inevitably zeroes in on the baby calf and weaning heifer facilities. Here, the sweetest grain mixes and select hay is kept stocked ahead. Younger calves often leave some of their molasses laced grain in their individual buckets and only nibble at hay rations.

That provides plenty of buffet-style pickings for rambunctious heifers with appetites sharpened by forbidden out-of-pen excursions.

After sampling several buckets of leftover feed, plus scattering a few just to see how far the grain flies over the calf nursery floor, it's on to the bales of hay. Everyone knows that the greenest, sweetest, tastiest hay is buried somewhere in the middle of the bale. And there's only one way to get at it.

How heifers can so thoroughly rip, shred and scatter to the winds tightly tied bales of hay defies the imagination. Especially when I need a knife to cut the doggone things apart.

And, by gosh, when you finally get to the middle, the hay apparently doesn't taste all that much better than did those first couple of bites from the outside corners. So it makes sense that it be scattered and strewn to all corners of the feed alley, with the random senselessness of tornado-like forces.

Then, like artists signing their work, marauding bands of renegade heifers leave behind the inevitable scattered manure residue, one more bit of evidence that must be swept, shoveled and forked away. First, though, the shovels, forks and brooms must be retrieved from where they, too, were knocked from their normal storage corners as the renegades rampaged through.

Like all adolescents, heifers eventually grow up, settle down (well, most of them) and become reasonably well behaved producing members of bovine society.

Just in time for the next batch to grow into puberty.

Some days, I wonder just how many more years I can cope with ensuing generations of these four-footed, teenage, bovine "intruders."

Farm Vacation Directory Available

HARRISBURG — City dwellers tired of trading crowded streets for crowded beaches can plan a refreshing vacation alternative with the 1987 Pennsylvania Farm Vacation Directory.

The 36-page booklet, prepared by the Pennsylvania Farm Vacation Association and the state Department of Agriculture's Bureau of Markets, contains photos and describes the features of 30 family farms participating in the program. For quick reference, a state map pinpoints each listing.

The booklet lists accommodations for a weekend stay or an extended vacation. On an introductory page, Agriculture Secretary Boyd E. Wolff points out that many of the farms have added cold-weather activities such as skiing, tobogganing and sledding for people who prefer winter vacations.

Copies of the free directory can be ordered from the Pennsylvania Farm Vacation Association, PA Department of Agriculture, Bureau of Markets, 2301 N. Cameron St., Harrisburg 17110-9408.

Serve Your Family Delicious Dairy Dishes

Irresistible ice cream, fluffy frozen desserts, creative casseroles and delightful dairy dishes top the list of this week's dairy delights.

If the recipes we received in response to our plea for dairy dishes is any indication, dairy products are in frequent use in farm kitchens. Sour cream, milk, ice cream, whipped cream, butter and cheese add a fresh, wholesome flavor and irreplaceable nutrients to each recipe below.

Try one (or several) today — and clip the rest for another time.

OREO COOKIE DESSERT

1 15-ounce package Oreo cookies
1 stick margarine
1 large box instant chocolate pudding mix
8 ounces cream cheese, softened
2⅔ cups milk
12 ounces whipped topping

Crunch up cookies fine using rolling pin. Melt margarine and mix with cookie crumbs. Press into 9x13-inch pan, reserving a few crumbs for topping.

Beat ⅓ cup milk cream cheese; add pudding mix and remaining milk. Beat well. Fold in whipped topping and pour on top of crust. Garnish with remaining crumbs. Chill before serving.

Norma Van Horn, Middleburg
Brenda M. Kramer, Newmanstown
Rosie Stoltzfus, Ronks

HAM AND CHEESE MUFFINS

1⅔ cups sifted flour
⅓ cup yellow cornmeal
2 tablespoons sugar
3 teaspoons baking powder
¼ teaspoon salt
⅔ cup diced cooked ham
⅔ cup shredded Swiss cheese
1 cup milk
¼ cup vegetable oil
1 egg, beaten

Into medium bowl, sift together first 5 ingredients. Stir in ham and cheese. In small bowl, mix together milk, oil and egg until blended. Add to dry ingredients; stir just until moistened. Spoon batter into 12 paper-lined 2½-inch muffin-pan cups. Bake in 400°F. oven for 20 minutes or until toothpick inserted in center comes out clean. Remove from pans. Serve warm. Makes 12 muffins.

Kathy Jo Wolfe
Milton

COTTAGE CHEESE SALAD

1 quart cottage cheese
1 pint crushed pineapple
1 cup cream, whipped
2 boxes lime-flavored gelatin
2 cups boiling water
Nuts, optional

Dissolve gelatin (any flavor may be used) in boiling water. Let cool. Add whipped cream, fruit and cottage cheese.

Martha Beller
New Holland

GRAPE JULIUS

¾ cup grape juice concentrate
1½ cups cold milk
¼ cup sugar
½ teaspoon vanilla
9 ice cubes

Put all ingredients in blender on high speed until ice is crushed — about 25 seconds. Serve immediately. Serves 3.

Donna Gockley
Mohnton

MILK CUSTARD

2 quarts milk, scalded
1 cup sugar
2 teaspoons vanilla
12 eggs, beaten
Coconut

Mix eggs, sugar and vanilla with scalded milk. Pour into baking dish. Sprinkle coconut on top. Bake. Set the dish in a shallow pan filled with water to bake.

Elizabeth Nolt
New Holland

CARAMEL DESSERT

16 caramel candies
24 large marshmallows
¼ cup chopped pecans
1½ cups crushed graham crackers
4 tablespoons melted butter
½ cup milk
1 cup whipping cream
1 tablespoon sugar

Mix sugar, crushed crackers and melted butter. Save ¼ cup of this mixture. Pat rest into a 2-inch deep cake pan. Melt in double boiler caramels, milk and marshmallows. Cool, then fold in whipped cream and nutmeats. Pour into crust; sprinkle with remaining crumb mixture. Chill well in refrigerator.

Linda S. Glick
Gap

CHEESE SAUCE FOR VEGETABLES

4 tablespoons fat
4 tablespoons flour
2 cups (½ pound) cheese, any variety (sharp or cheddar is recommended)
2 cups milk
½ teaspoon salt

Melt the fat; blend in flour. Add cold milk and salt. Heat and stir until thickened. Shred and add the cheese. Stir until cheese melts. Serve over your favorite vegetables.

Note: This is a great way to get children to try vegetables they don't like.

Kathy M. VanNort
Columbia

EGG CUSTARD

5 eggs, beaten
½ cup sugar
1 teaspoon vanilla
4 cups milk

Bake for 1 hour only in a 2-quart baking dish. Put dish in a 9x9-inch cake pan filled with a half inch of water. Bake at 350°F.

Mrs. Shirley Luse
Centre Hall

MOCHA PECAN SAUCE

1 6-ounce package semi-sweet chocolate pieces
½ cup firmly packed brown sugar
¼ cup water
1 teaspoon instant coffee granules
1/8 teaspoon salt
1 cup dairy sour cream
1½ teaspoons vanilla extract
½ cup coarsely chopped toasted pecans

Combine chocolate pieces, sugar, water, coffee granules and salt in medium-sized heavy saucepan. Cook over moderate heat until chocolate is melted and sugar dissolves, stirring frequently. Do not boil. Remove from heat. Stir in sour cream, vanilla and nuts. Serve warm or cold over ice cream.

TROPICAL TOPPING

1 cup whipping cream
2 tablespoons confectioners sugar
2 tablespoons orange juice
1 cup toasted shredded coconut

Combine whipping cream, sugar and orange juice in small mixer bowl. Beat on high speed until stiff. Fold in coconut. Refrigerate, covered, until ready to serve as topping on ice cream.

BURNT SUGAR CRUNCH SAUCE

2 cups sugar
⅔ cup boiling water
3 tablespoons butter
⅔ cup whipping cream
1½ teaspoons vanilla extract
Crushed toffee candy

Heat sugar in 12-inch heavy skillet over medium heat until sugar begins to melt around edges. Reduce heat to low. Cook, stirring constantly, until sugar is completely melted and turns an amber color. Carefully and gradually stir in boiling water. Sugar mixture is very hot and may spatter as water is added. Stir in butter until well combined. Cook until slightly thickened, 3 to 5 minutes. Remove from heat. Cook 10 minutes. Stir in cream and vanilla. Refrigerate several hours. Sauce thickens as it cools. Spoon over ice cream. Sprinkle with crushed toffee.

FROZEN BERRY DESSERT

1 package graham crackers, rolled fine
2 egg whites
1½ cups sugar
1 cup cream, whipped
3 tablespoons butter
1 tablespoon vanilla
2 cups strawberries

Mix crumbs and butter. Press into serving dish. Put egg whites, sugar, berries and vanilla in blender. Blend well. Pour into mixer bowl and beat at high speed for 15 minutes. Fold in 1 cup whipped cream. Put in freezer until firm.

Mrs. Samuel C. Brubaker
Seven Valleys

HOT MILK CAKE

3 eggs
1½ cups sugar
1½ cups flour
1½ teaspoons baking powder
½ teaspoon salt
¾ cup milk
2 tablespoons butter
1 teaspoon vanilla

Beat eggs until light. Add sugar gradually. Beat until blended. Resift flour with baking powder and salt. Heat milk with shortening and add to batter. Add vanilla and pour into greased and floured pans (2 9-inch pans). Bake 20 to 30 minutes at 350°F.

Phyllis B. Grantham
Kearneysville, W. Va.

Do-it-yourself sundaes are an ideal way to entertain, especially when there's a trio of tempting toppings to choose from.

DRIED BEEF CASSEROLE

1 can cream of mushroom soup
1 cup milk
1 cup grated cheese (sharp)
1 cup uncooked elbow marcaroni
3 tablespoons finely chopped onion
¼ pound dried beef
2 hard-boiled eggs, sliced

Cut dried beef into bite-sized pieces. Stir soup to creamy consistency. Add remaining ingredients except eggs. Fold in eggs. Turn into buttered 1½-quart casserole. Store covered in refrigerator at least 3 to 4 hours or overnight. Bake at 350°F. for 1 hour, uncovered. Serves 4 to 6.

Mary D. Elvis
Coatesville

HAM STUFFED POTATOES

6 large baking potatoes
¾ cup ham
2 tablespoons onion, finely chopped
½ teaspoon salt
¼ teaspoon pepper
2 tablespoons butter
1¼ cup cheese, shredded

Bake potatoes 1 hour or until done. Cut off one side of potato. Scoop out hot potato and mix with ham, onion, salt, pepper and butter, chopping up potato with spoon. Pile mixture back into potato shells. Place in baking dish. Top with cheese. Bake 15 minutes or until golden.

Featured Recipe

All of the recipes we've been collecting this month use dairy products. But no matter if the recipe calls for cheese, yogurt, sour cream, whipped cream or milk, the source of those fresh dairy products is the same — the cow. This recipe from Mrs. Judy Araway, McClure, reminds us of the ingredients that are needed to produce the most basic dairy product — milk.

M-I-L-K

Pasture
Grain
Hay
Water
Straw
Calf

Mix above ingredients (alternately in amounts appropriate for maintenance) to calf. Add water, enough for growth and prevention of dehydration. Spread straw around to desired consistency — this helps to prevent sticking. Let rise until breeding desired. After mothering has occurred, apply 2 hands (or 4 metal vacuum cups) to milk container. Apply gentle pulling/squeezing motion constantly to allow proper emptying. Chill and serve. Makes a delicious drink.

If you tried to make the scrumptious Strawberry Cream Pie that was last week's featured recipe, you may have been a bit confused when you got to the directions and were told to beat sour cream with pudding, milk and lemon rind. Unfortunately, we forgot to tell you how much sour cream. The correct version of the recipe is printed below. Please clip it and give it a try!

Strawberry Cream Pie

1 graham cracker pie crust
1½ pints strawberries
1 small package instant vanilla pudding
1 cup sour cream
¼ cup milk
2 teaspoons grated lemon rind
2 cups frozen whipped topping

Make graham cracker crust. Beat pudding, milk, sour cream and lemon rind together. Blend in frozen whipped topping. Put half of mix on crust and top with halved berries. Cover berries with remaining mixture. Garnish with whole strawberries and refrigerate for 3 hours.

Recipe Topics

If you have recipes for the topics listed below, please share them with us. We welcome your recipes, but ask that you include accurate measurements, a complete list of ingredients and clear instructions with each recipe you submit. TRACTORS

385 • 485 • 585 • 685 • 885 TRACTORS

/35 to 72 PTO HP (26.1 to 53.7 kW)

New! A complete line of mid-power tractors offers new comfort, convenience and productivity.

Unlimited visibility in every direction.
The new cabs on the 585, 685 and 885 models feature exceptional visibility. For greater operator efficiency, there's an almost unbroken line of vision all around, including clear view of the hitch and drawbar. There's plenty of big-tractor comfort and convenience, too, with a fully adjustable seat and controls that are close at hand. You can enter or leave the cab from either side through doors that open easily with gas-assist cylinders. The cab is quiet, too, with deluxe padding all around.

Easy operating convenience.
To maximize your productivity without clutching, all five 85 Series tractors can be equipped with electro-hydraulic two-speed power shift, controlled by a dash-mounted toggle switch. The power shift system provides for a fast shift speed reduction which increases pull power and field performance. Fields speeds, as well as loader and hauling speeds, meet your everyday needs. Power shift is standard on the 885, optional on other models.

Traction boosting MFD
is available on all 85 Series row-crop and utility tractors. Simple, reliable center-line Mechanical Front Drive increases your traction and your pulling power. Shift in and out of MFD on the go with electro-hydraulic ease (optional on 385 and 485 tractors).

Cook's Question Corner

If you are looking for a recipe but can't seem to find it anywhere, send your recipe request to Cook's Question Corner, care of Lancaster Farming, P.O. Box 366, Lititz, Pa. 17543. There's no need to send a SASE. If we receive an answer to your question, we will publish it as soon as possible.

Answers to recipe requests should be sent to the same address.

QUESTION - Anna Ruth, Elizabethtown, would like a recipe for making gelatin pops.

QUESTION - V. Martin of Springfield, Va , would like recipes to prepare chicken that tastes like Weaver's Batter Fried Chicken and Weaver's Fried Chicken (made with bread crumbs).

QUESTION - Elizabeth Hlubik, Columbus, N.J., would like a recipe for Irish Whiskey Coke.

QUESTION - Mrs. Stanley Sherry, Berkshire, N.Y., would like a recipe for Monks Bread, a raisin-cinnamon loaf.

QUESTION - Mrs. Ruth Kopp, Tower City, would like a recipe for a jelly roll type of cake filled with sliced bananas and a creamy filling.

QUESTION - Jeanne Kenna, Ottsville, would like a recipe for spinach bread, a non-yeast type of bread preferably made without cheese.

ANSWER - Barbara Allsopp, Summerhill, requested a recipe for lemon balm tea. Thanks go to Patricia Kowalchick, Bloomsburg, for sharing the following recipe.

Lemon Balm Tea

For average strength tea use 1 teaspoon dried herb for 1 cup. If using fresh herbs, allow 3 teaspoons and crush the leaves before adding to boiling water. Cover the cup and let stand for 5 minutes before straining and drinking. For iced tea follow the same method, strain the tea, cover and leave to cool in refrigerator.

Note: Lemon Balm is also said to be used for nausea (travel sickness), nervous tension, sore throat and mouth, headaches, and in cleansing lotions, chopped in salad dressings, soups, sauces and chicken dishes

ANSWER - Martha Oberholtzer, Mifflinburg, requested information on freezing sweet corn Thanks go to Eva Brubaker, Myerstown, for the following suggestions.

Freezing Sweet Corn

The best sweet corn for freezing is Merit sweet corn and Silver Queen. Merit is yellow corn and Silver Queen is white I blanch the corn on the cob, bring water to good boil, then put corn in cold water Change the water as soon as it gets warm and continue changing until it stays cold or the corn is cold. Cut corn off cob and put in freezer containers. Very delicious! Note: A corn cutter makes removal from the cob easier.

ANSWER - Lance Sutton, Parkton, Md , requested a recipe for beef jerky Thanks go to Debbie Russell, New Enterprise, for sharing the following recipe.

Beef Jerky

3 to 5 pounds lean beef
½ teaspoon black pepper
1 tablespoon salt
1 teaspoon onion powder
1 teaspoon garlic powder
2 tablespoons liquid smoke

Slice beef very thin Mix seasonings with liquid smoke and 1 cup warm water Place meat flat in rows in a pan Pour marinade over meat and cover Refrigerate overnight Drain and pat meat with paper towels Set oven to lowest temperature Place meat on racks and prop oven door open Bake until meat is dry Seal in plastic

ANSWER - Ronnie Czebotar, Wading River, N Y , requested instructions for roasting a pig outdoors on a spit. Thanks go to Janice Wright, Spring Grove, for sharing the following

Roast Pig

Get or make a 5-by-4 foot (or to fit the pig) metal barbecue cooker that has a removable cover and a door on the side near the bottom for shoveling in coals A metal bottom is preferred, but it could be made to sit on the ground It must be high enough for a grate to sit 18 inches off the ground or floor, and the cover should fit so there is a 2-inch to 6-inch space above the pig Use one 90-to 100-pound pig, gutted and trimmed of head, but with the skin intact Crack the ribs at the breastbone down the middle so it will lay flat rib side down on the grill Put a thin horseshoe shape of coals in the cooker with the open end facing the door, approximately 2 to 3 garden shovels full Let cooker warm before adding pig Put pig on grill and roast for 10 hours, adding 1 shovelful every 45 minutes, depending on type of charcoal used After 10 hours, turn the pig skin side down and fill the ribs with barbecue sauce Cook as above for 2 more hours or until done

FROZEN STRAWBERRY PIE

1 cup crushed strawberries
2 egg whites
1 cup sugar
1 cup cream

Beat strawberries, egg whites and sugar together. Then beat one cup cream and fold into strawberry mixture. Pour into pie crust and freeze. Makes approximately two 8-inch pies.

Amos S. Esh
Myerstown

MEAT LOAF

3 pounds hamburger
2 eggs, beaten
1½ cups dry bread crumbs
1½ cups milk
1½ teaspoons salt
1 medium onion, chopped

Mix all ingredients together and form into a loaf in roast pan. Bake uncovered for 2 hours at 250°F.

Mrs. Daniel Weaver
Boiling Springs

ICE CREAM ROLL

3 eggs
¼ cup water
1 cup sugar
¾ cup flour
¼ cup cocoa
¼ teaspoon salt
2 teaspoons baking powder
1 teaspoon vanilla
1 quart vanilla ice cream

Beat eggs until thick; add water and sugar; continue to beat. Sift salt, flour, cocoa and baking powder. Add to egg mixture. Add vanilla and beat. Grease jelly-roll pan and pour mixture in. Bake at 400°F. for 12 to 15 minutes on center oven rack. Remove from pan while still warm. Cool slightly, then spread ice cream over it. Roll up and freeze.

June Burkholder
Lebanon

CRACKER PUDDING

⅔ cup granulated sugar
2 tablespoons flour
2 tablespoons cornstarch
3 cups milk
2 slightly beaten egg yolks
2 egg whites (set aside in a small bowl)
2 teaspoons vanilla
1½ cups crumbled crackers
½ cup coconut (optional)

In a saucepan, combine sugar, flour and cornstarch; gradually stir in milk over medium heat, stirring constantly. When mixture starts to warm, add egg yolks and continue stirring until it thickens and comes to a full boil. Remove from heat and add vanilla. Pour pudding over crackers; add coconut and mix thoroughly. Make meringue from egg whites. Spread on top of pudding. Bake in 400°F. oven for a few minutes.

Mrs. Lillian Martin
York

GRAHAM CRACKER PUDDING

4 cups milk
1 cup crushed graham crackers
1 cup sugar
½ cup coconut
1 teaspoon vanilla

Mix all ingredients together; stir on stove until thick.

Shirley A. Horning
Stevens

STRAWBERRY YOGURT PIE

1 envelope unflavored gelatin
½ cup cold water
2 cups strawberry yogurt, well stirred (lowfat)
2 egg whites
½ cup sugar
1 cup sliced strawberries

Soften the gelatin in cold water; dissolve over boiling water in a double boiler; stir in the yogurt Chill, stirring occasionally; until the mixture mounds when dropped from a spoon. Beat the egg whites until soft peaks form; gradually beat in the sugar until stiff peaks form. Fold into the yogurt mixture. Pour into baked graham cracker crust. Garnish with sliced strawberries. Refrigerate until set, about 4 hours.

Miriam R. Groff
Stevens

STRAWBERRY YUM-YUM

1 cup flour
½ cup butter
¼ cup brown sugar
½ cup nuts, chopped

Mix the four ingredients until crumbly. Press into an 8x8-inch pan. Bake at 350°F. for 20 minutes. Cool and break into crumbs. Set aside.

2 egg whites
1 cup sugar
2 teaspoons lemon juice
1 10-ounce package frozen or fresh strawberries
1 cup cream

Beat egg whites; add sugar, lemon juice and strawberries. Beat the cream; add egg white mixture. Put half of crumbs into bottom of 9x9-inch greased pan. Spread strawberry mixture over crumbs and top with the remaining crumbs. Freeze.

Mrs. Linda A. Peachy
Winfield

BOSTON CREME PIE

Combine in mixing bowl:
2 cups flour
1½ cups sugar
1 teaspoon baking powder
1 teaspoon baking soda
½ teaspoon salt
Add:
¼ cup shortening
¼ cup butter
1½ teaspoon vanilla
1¼ cup buttermilk or sour milk

Blend on low speed. Beat 2 minutes on medium. Add 4 egg whites. Beat 2 minutes more. Bake in 2 9-inch cake pans at 350°F. for 30 to 35 minutes.

Creme Filling

Combine in saucepan:
⅓ cup sugar
2 tablespoons cornstarch
1/8 teaspoon salt
Gradually add:
1½ cups milk
2 egg yolks

Blend well. Cook over medium heat until mixture boils. Stir and boil 1 minute. Remove from heat. Blend in 1 tablespoon butter and 1 teaspoon vanilla. Cool 10 minutes. Put between layers.

Cocoa Glaze

Combine in small saucepan:
3 tablespoons water
2 tablespoons butter

Bring to a full boil. Remove from heat immediately. Add ¼ cup cocoa. Stir to blend well. Add 1 cup confectioner's sugar and ½ teaspoon vanilla. Beat until smooth. Pour on top of cake, allowing some to drizzle down sides. Chill.

C.J. Musser
Myerstown

CHOCOLATE SHEET CAKE

Bring to a boil:
2 sticks margarine
1 cup water
4 tablespoons cocoa

Remove from heat and add sifted together:
2 cups flour
1 teaspoon salt
2 cups brown sugar

Beat well and add:
2 eggs
1 teaspoon soda
½ cup buttermilk or sour cream

Beat and pour into large cookie sheet. Bake 30 minutes at 350°F.

Frosting

1 stick margarine
4 tablespoons cocoa
6 tablespoons milk
1 pound confectioner's sugar
1 teaspoon vanilla

Melt margarine; add cocoa and milk. Bring to boiling. Remove from heat and add remaining ingredients. Beat well and spread on cake while cake is still slightly warm.

Mrs. Sam B. Stoltzfus
Gap

BANANA MILKSHAKE

Blend:
2 bananas
4 cups milk
3 tablespoons sugar
2 scoops vanilla ice cream

in blender until mixed. Other fruits may also be used.

M. Musser
Myerstown

PEANUT VELVET FROSTING

¼ cup butter
2 cups sifted powdered sugar
3 tablespoons milk
1 teaspoon vanilla
½ cup creamy peanut butter

Heat butter over low heat until golden brown. Remove from heat. Beat in sugar, milk, vanilla and 1/8 teaspoon salt. Blend in peanut butter. Frosts one 13x9-inch cake.

Linda Zimmerman
Reamstown

MEAT-POTATO QUICHE

Preheat oven to 425°F.
3 tablespoons vegetable oil
3 cups coarsely shredded raw potato

Mix in a large pie pan and press evenly into pie crust shape. Bake for 15 minutes or until potatoes begin to brown. Sprinkle over potato crust:

1 cup grated cheese
¾ cup cooked chicken, ham or browned hamburger
¼ cup chopped onion

Beat together:
1 cup evaporated milk
2 eggs
½ teaspoon salt
1/8 teaspoon pepper

Pour over other ingredients. Sprinkle with 1 tablespoon parsley flakes. Bake 30 minutes at 425°F.

Eileen Stahl
Lititz

CREAMY MICROWAVE RICE PUDDING

¾ cup sugar
2 tablespoons cornstarch
¼ teaspoon salt
2 cups milk
2 eggs, beaten well
2 cups cooked regular rice
1 tablespoon butter
1 teaspoon vanilla

Combine sugar, cornstarch and salt in a glass casserole dish with milk; stir well. Microwave at high setting 8 minutes or until mixture comes to a boil and thickens, stirring every 2 minutes. Stir a small amount of hot mixture with beaten eggs. Then put rest of egg mixture into remaining hot mixture; blend thoroughly and microwave at high setting 2 minutes, Remove and stir in rice, butter and vanilla. Serve warm, or cover and chill and serve with a large scoop of whipped cream.

Anita Whipple
Towanda

HEARTY HADDOCK SOUP

1 pound chopped fish (no dark meat or skin)
1 block butter
4 tablespoons flour
2 cups chicken broth
2 cups milk
1½ cups grated Cheddar cheese
1½ cups peas
1 package dried vegetable soup
1 tablespoon lemon juice to sprinkle over chopped fish

Put butter in pot and melt. Add flour to make paste, then add dried soup. Add chicken broth, milk, and cheese. When cheese melts, add fish and cook 5 to 6 minutes. Add peas and eat.

Vivian Heffner
Windsor

CHEESE CUSTARD

1 pound cottage cheese, cream style
½ teaspoon salt
5 eggs, unbeaten
7 tablespoons sugar
5 tablespoons flour
1 quart milk
2 teaspoons vanilla
Few drops lemon flavoring
2 10-inch pie shells, unbaked

Add salt to cottage cheese and beat until smooth. Add eggs, sugar and flour, beating well. Stir in milk and add flavoring. Pour into two unbaked pie shells and bake 10 minutes in hot oven (425°F.), then reduce heat to 300°F. for one hour or until custard is firm. Silver knife will come out clean.

SPEEDY SALAD

Prepare 1 package vanilla instant pudding. Fold in 1 cup whipped cream. Add 1 can fruit cocktail, 1 can mandarin oranges and 1 4-ounce jar maraschino cherries, all well drained. Add 1 cup miniature marshmallows and chill.

Mrs. Clarence C. Sattazahn
Womelsdorf

FLUFFY TAPIOCA PUDDING

6 tablespoons minute tapioca
6 tablespoons sugar
2 egg yolks
4 tablespoons sugar
¼ teaspoon salt
4 cups milk
2 egg whites
1½ teaspoons vanilla

Mix tapioca, salt, sugar, milk and yolk in pan. Let stand 5 minutes. Beat egg whites until foamy; gradually beat in 2 tablespoons sugar, beating to soft peaks. Set aside. Cook tapioca mixture over medium heat to a full boil, stirring constantly for 6 to 8 minutes. Gradually add to beaten whites, stirring quickly just until blended. Stir in vanilla. Cool 20 minutes. Stir. Serve warm or chilled.

Mary Ellen Martin
Bernville

SCALLOPED POTATOES

6 medium potatoes, thinly sliced
¼ cup minced onion
3 tablespoons flour
1 teaspoon salt
¼ teaspoon pepper
¼ cup butter
2½ cups milk
1 cup shredded cheese

Place potatoes in greased 2-quart casserole. In blender, mix onion, flour, milk, salt and pepper; pour over potatoes. Dot with butter. Add cheese on top. Bake at 350°F. for 1 hour and 30 minutes. Cover for first 30 minutes.

Mervin S. Wenger
Womelsdorf

YOGURT DESSERT

½ cup butter, melted
8 graham crackers, crushed finely

Mix together and press in bottom of shallow dish. Mix:
2 cups peach yogurt
2 cups whipped topping

Place on crumbs. Top with 2 to 3 cups fresh, thick peaches.

Blueberries would also be good used with blueberry yogurt.

Norma Weaver
Kirkwood

CHOCOLATE FUDGE CAKE

1½ cups sugar
½ cup butter
2 eggs
1 teaspoon soda with a little vinegar to moisten
2 squares chocolate
2½ cups flour
½ cup buttermilk
1 teaspoon vanilla

Cream butter and sugar. Add eggs, one at a time. Alternate buttermilk and dry ingredients.

Mary B. Esch
New Providence

STRAWBERRY GLAZE PIE

9-inch baked pie shell
6 cups strawberries (about 1½ quarts)
1 cup sugar
3 tablespoons cornstarch
½ cup water
1 3-ounce package cream cheese, softened

Mash enough strawberries to measure 1 cup. Mix sugar and cornstarch in 2-quart saucepan. Stir in water and strawberries gradually. Cook over medium heat, stirring constantly, until mixture thickens and boils. Boil and stir 1 minute; cool.

Beat cream cheese until smooth; spread on bottom of pie shell. Fill shell with remaining strawberries; pour cooked strawberry mixture over top. Refrigerate until set - at least 3 hours. Beat 1 cup cream and put on top before serving.

Mrs. Leon N. Zimmerman
Leola

COTTAGE CHEESE JELLO SALAD

1 24-ounce carton cottage cheese
1 8-ounce container whipped topping
1 15-ounce can crushed pineapple (drained)
1 3-ounce package strawberry-flavored gelatin
1 pint fresh strawberries, halved

Mix cottage cheese, whipped topping and pineapple. Add gelatin. Mix well. Add strawberries.

Cordelia Reese
Dunlo

GRAHAM CRACKER FLUFF

2 egg yolks
½ cup sugar
⅔ cup milk
1 package (1 tablespoon) gelatin
½ cup cold water
2 egg whites
1 cup whipping cream
1 teaspoon vanilla
3 tablespoons melted butter
3 tablespoons sugar
12 graham crackers

Beat egg yolks and sugar and milk. Cook in top of double boiler until slightly thickened. Soak gelatin in the cold water. Pour hot mixture over softened gelatin and stir until smooth. Chill until slightly thickened. Add stiffly beaten egg whites, vanilla and whipped cream to chilled mixture. Combine melted butter, cracker crumbs and sugar to make crumbs. Sprinkle half of crumbs in bottom of serving dish. Add mixture and top with remaining crumbs. Let chill in refrigerator until set. Makes 6 to 8 servings.

AnnaMae Shirk, Mifflinburg
Rachel S. Glick, New Holland
Emma Martin, Leola

CORNSTARCH PUDDING

Heat 2 quarts fresh milk; add 2 cups brown sugar. Let stand until sugar dissolves.

Stir 4 eggs, 2 tablespoons cornstarch, 2 tablespoons flour in 1 cup cold milk. Beat until flour is smooth. Then put this mixture in hot milk and bring to a boil. It will thicken.

To serve, put whipped topping in center and sprinkle with ground graham crackers.

Rebecca Zook
Quarryville

YUM-YUM PUDDING

60 Ritz crackers
¼ pound butter, melted

Make crumbs and bake about 5 minutes. Line dish with crumbs, reserving some for top.

2 quarts vanilla ice cream
1½ cups milk
2 3-ounce packages vanilla instant pudding

Beat milk and ice cream until thick like milk shakes; then add dry instant pudding. Mix thoroughly. Pour over crumbs; sprinkle crumbs on top.

CHIP DIP

3 tablespoons milk
3 tablespoons vinegar
3 egg yolks
3 tablespoons sugar

Cook milk, egg yolks, vinegar, and sugar over low to medium heat until thickened. Cool. After mixture is cooled, add:
1 small onion, chopped
3 8-ounce packages cream cheese, softened
1 4-ounce package pimiento cream cheese

Store in refrigerator. Serve with chips, crackers and raw vegetables. Very delicious!

Curvin Horning
Lebanon

POTATO PUFFS

1 cup mashed potatoes
½ cup sweet milk
2 eggs
2½ cups flour
2 teaspoons baking powder

Mix all ingredients together and fry in deep lard or oil.

Gladys M. Brandt
Palmyra

MISSISSIPPI MUD PUDDING

3 tablespoons butter
4 cups milk
2 tablespoons flour
2 tablespoons cornstarch
3 bananas
¾ cup granulated sugar
¾ cup brown sugar
2 eggs
2 teaspoons vanilla
½ pint whipped cream
Graham cracker crumbs

Brown the butter, add 3 cups milk. Heat. Blend 1 cup milk, flour, cornstarch, sugars and eggs. Add to hot milk and boil 1 minute. Add vanilla. Cool. Put in layers just before serving — pudding, bananas, whipped cream and cracker crumbs (2 layers each).

Linda Hartranft
Bernville

GRANDMA'S CARAMEL PUDDING

1 stick butter
1 cup brown sugar
½ cup granulated sugar

Brown the sugar and butter in a kettle; add ½ cup water until lumps are gone; add 1½ quarts milk. In blender, mix:
5 eggs
¾ cup flour
1 teaspoon vanilla

Put 2 cups of milk mixture in with ingredients in blender; then pour into kettle, stirring constantly. Remove from burner at first sign of cooking. For thicker pudding, add more flour.

Mary Ann Zimmerman
Womelsdorf

BAKED MACARONI AND CHEESE WITH TOMATO

1 cup uncooked macaroni
1 quart tomatoes, approximately
½ cup sugar
1 teaspoon salt
1 teaspoon pepper
1½ pounds sharp cheese, shredded and cubed
Butter

Cook macaroni as directed on package. Drain macaroni and rinse with cold water. Add macaroni, tomatoes, sugar, salt and pepper. Mix well. Turn into a casserole or pan and top with shredded or cubed sharp cheese. Add butter. Bake at 350°F. for 1 hour. If still juicy, bake a little longer.

Grace Ikeler
Bloomsburg

PRETZEL SALAD

2 cups crushed pretzels
¾ cup butter
4 tablespoons sugar
8 ounces cream cheese
1 cup sugar
1 pint whipping cream, whipped
1 6-ounce package strawberry-flavored gelatin
1¾ cups boiling water
10 ounces frozen strawberries

Mix crushed pretzels, butter and 4 tablespoons sugar. Pat into a 9x13-inch pan. Bake at 400°F. for 8 minutes. Cool. Cream together cream cheese and 1 cup sugar. Fold in whipped cream. Spread over cooled pretzel mixture. Prepare gelatin using 1¾ cups boiling water. Stir gelatin mixture into frozen strawberries. Pour on top of cream layer and refrigerate until firm. Enjoy!

Karen Mohn
Womelsdorf

WALNUT LOVELIGHT CAKE

2¼ cups all-purpose flour
1 cup sugar
1½ teaspoons soda
¾ teaspoon cream of tartar
1 teaspoon salt
⅓ cup cooking oil
1 cup sweet milk
2 eggs, separated
½ teaspoon walnut flavoring
1 cup chopped nuts

Mix the first five ingredients with cooking oil and milk. Add egg yolks and walnut flavoring. Beat egg whites until frothy and gradually add half cup sugar. Fold in nuts and egg whites. Put in greased 9x13-inch pan. Bake at 350°F. for 45 minutes.

Rebecca S. Glick
New Holland

HOMEMADE YOGURT

1 to 2 cups powdered milk
1 heaping teaspoon gelatin
½ gallon milk
¼ cup plain yogurt

Dissolve 1 to 2 cups powdered milk in a cup of water. Heat a half gallon of milk and powdered milk mixture to 120°F. (Don't heat milk any higher or you will destroy the live enzymes.) Dissolve 1 heaping tablespoon gelatin in a cup of milk or water and stir into milk. Cool slowly to 110°F.

Stir occasionally while cooling to help dissolve gelatin. Now stir in about ¼ cup plain yogurt (as a starter). Strain to prevent curdling and pour into quart jars. Put on lids and set in warm water in a warm place for 5 to 8 hours. Refrigerate and it will be thick and creamy. Add ¼ cup sugar if desired.

Anna Mae Stoltzfus
Lancaster

GELATIN CHEESECAKE

Crust:
2 cups graham cracker crumbs
½ cup melted margarine
2½ tablespoons brown sugar
Filling:
1 large can chilled evaporated milk
1 3-ounce package lemon-flavored gelatin
1 cup boiling water
1 8-ounce package cream cheese
1 cup sugar
1 teaspoon vanilla

Dissolve gelatin in boiling water and let cool to lukewarm. Cream cheese, sugar and vanilla. Add gelatin and mix well. Whip chilled can milk and fold into cheese mixture. Pour filling into prepared pan and sprinkle with graham cracker crumbs. Chill several hours. Top with pie filling. Pan size: 9x13 inches.

Beverly Bishop
Landisburg

PINEAPPLE SUPREME

1 envelope unflavored gelatin
½ cup cold water
1 tablespoon pure lemon juice
1 9-ounce can crushed pineapple, undrained
2 3-ounce packages cream cheese

Sprinkle gelatin over water in a small saucepan. Dissolve over medium heat, stirring constantly. Stir in lemon juice. In a blender, liquefy pineapple with half the cream cheese. When completely blended, add the remaining cream cheese and liquefy. Combine with gelatin. Pour into individual dessert dishes. Chill until set.

Mrs. L. Eugene Martin
Reinholds

BAKED BREAD PUDDING

2 cups bread crumbs (several days old)
4 cups milk, scalded
2 eggs
½ cup sugar
¼ teaspoon salt
½ teaspoon cinnamon
1 teaspoon vanilla
1 teaspoon butter, if desired

Soak bread crumbs in milk until soft. Beat eggs until light. Add sugar, salt, cinnamon and vanilla. Mix thoroughly with bread mixture. Pour into a greased baking dish and set in pan of hot water. Bake in moderate oven (350°F.) for 1 hour or until table knife inserted in center comes out clean. Very good served warm or cold.

Mrs. Carol Hoch
Berrysburg

DELICATE CHEESE STICKS

1 cup grated yellow cheese (sharp)
½ cup butter
¼ teaspoon baking powder
½ teaspoon salt
½ teaspoon dry mustard or chili powder
¾ cup sifted flour
4 teaspoons ice water

Blend shortening with grated cheese. Sift dry ingedients together. Blend into cheese mixture, alternately with the water, 1 teaspoon at a time. Chill well and roll out like pie dough. Cut into 6x¼-inch strips. Bake at 350°F. on an ungreased cookie sheet until just lightly browned — about 8 to 10 minutes.

Esther Lantz
Paradise

ICE CREAM BARS

Crumbs:
½ cup butter
½ cup sugar
2 cups graham cracker crumbs
Scald:
½ cup sugar
1½ cups milk
¼ cup flour

Add 6 beaten egg yolks and ¼ cup sugar; boil until thick. Cool.

Beat:
6 egg whites
¾ cup sugar
¼ teaspoon salt
Add:
2 cups whipped cream or evaporated milk and 2 teaspoons vanilla

Fold these together with plate scraper and add the egg yolk mixture. Put half of the crumbs in bottom of a cake pan and pour the ice cream mixture over it. Put the remaining crumbs on top. Freeze at least 12 hours; cut into bars and serve.

Sarah Z. Glick
New Holland

CHOCOLATE CHIP PUDDING

2 cups milk
1 pound small marshmallows
2 cups whipped cream
1 teaspoon salt
½ square chocolate, chipped

Heat milk; dissolve marshmallows in hot milk. Add salt and set aside until mixture begins to jell. Add cream to jelled mixture. Fold in chocolate chips or put on top. Can also put chocolate sprinkles on top. Refrigerate.

Steven Horning
Lebanon

MAUI MILK PUNCH

1½ quarts vanilla ice cream, softened
3 cups chilled pineapple juice
⅓ cup orange juice
1 tablespoon lemon juice
4 cups cold milk

Gradually add fruit juices to ice cream, beating constantly. Blend in milk, beating well. Makes 3 quarts.

Chris McGillvray
Hanover

CHICKEN AND NOODLE CASSEROLE

¼ pound noodles
1½ teaspoons salt
3 hardboiled eggs
1 can cream of chicken soup
1 cup milk
2 cups diced, cooked chicken

Cook noodles in salt water until tender; drain. In a buttered casserole, place alternate layers of noodles, chicken, eggs, soup and milk. Top with bread crumbs and dot with butter. Bake at 350°F. for 40 minutes.

Mrs. Esther E. Reichenbach
Richfield

SCALLOPED CORN

1 pint creamed corn
2 eggs
1 tablespoon flour
1 tablespoon butter
1 tablespoon sugar
1 teaspoon salt
1 cup milk

Combine all ingredients in order given. Pour into buttered casserole. Bake at 350°F. for 45 minutes or until solid on top.

Mrs. Stephen Fisher
Paradise

TAPIOCA CREAM

3 tablespons quick-cooking tapioca
1/8 teaspoon salt
5 tablespoons sugar
2 cups milk
2 eggs, separated
1 teaspoon vanilla

Mix the tapioca, salt, milk, slightly beaten egg yolks and 3 tablespoons of the sugar. Let stand 5 minutes. Cook over medium heat, stirring constantly, until mixture comes to a full boil only. Remove from heat. Beat the egg whites until foamy, slowly adding the remaining 2 tablespoons sugar, and continue beating until stiff (not dry). Slowly stir into the hot tapioca mixture, then add the vanilla and blend. Serve warm or cold. Serves 4 to 6.

Dinosaurs May Have Nested Near Man-Made Texas Lake

WASHINGTON — The remains of large numbers of dinosaurs, from hatchlings to adults, have been found in central Texas, giving scientists a rare opportunity to study the growth of the prehistoric reptiles and to investigate the behavior patterns of young dinosaurs.

Because so many dinosaur offspring, all of a single type, were found together in what appear to be holes or dug pits, scientists excavating them believe they have found clues to dinosaur nesting, or at least to the ways in which the ancient animals gathered in a group shortly after hatching.

Two-Legged Vegetarians

The dinosaur bones, about 115 million years old, are from a primitive, two-legged, fruit-and-vegetable-eating creature known as a hypsilophodont. They were found last fall in sedimentary deposits on the shores of Lake Proctor, about 85 miles southwest of Fort Worth. Lake Proctor was created by the Army Corps of Engineers as a flood-control project in the early 1960s.

Dale A. Winkler of Southern Methodist University, who is leading the scientific study of the fossilized bones, says the site is unusual because, except for a handful of ancient crocodile bones and a single tooth from a carnivorous dinosaur, it has produced only hypsilophodont remains.

Winkler's team, with support from the National Geographic Society, had expected to find at least some bones or teeth of primitive mammals, or the bones of a variety of dinosaurs. "I don't really understand why they're not there," Winkler admits. The team includes Louis L. Jacobs, also of SMU, and Phillip A. Murry of Tarleton State University in Stephenville, Texas.

But the absence of other animals is one factor that leads Winkler to believe the site can provide information about hypsilophodont behavior. He speculates that the dinosaurs returned over a long time period because the locality had certain characteristics that attracted only them and no other creatures of that period.

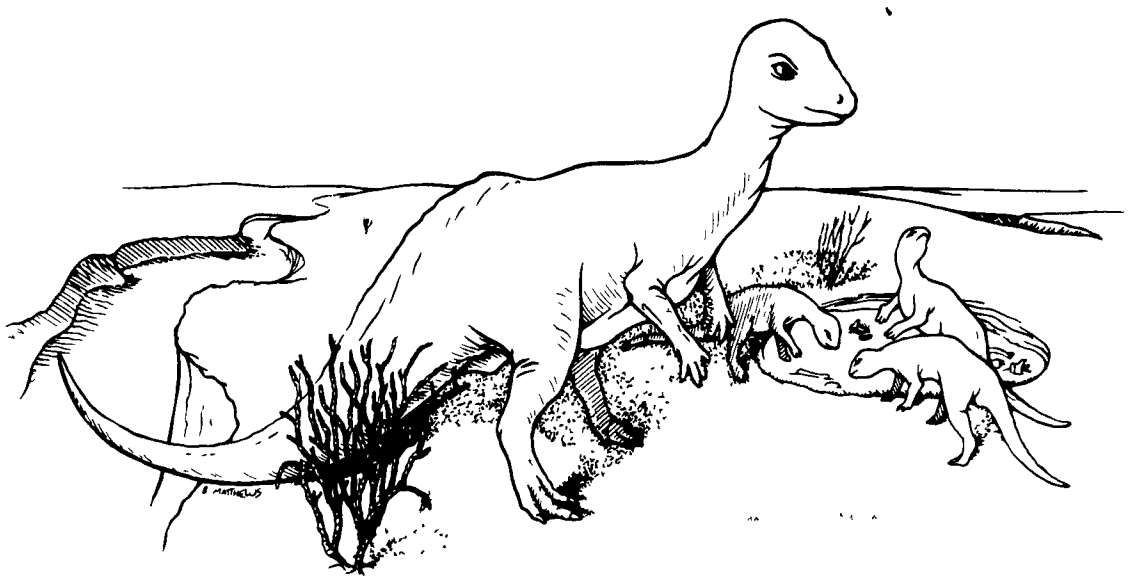
"There may have been some particular resource there," he says. "Perhaps they had their nest where there was a certain abundant food available, or water, or a lack of predators. Since the site was semi-arid, they may have gone there to seek out fresh water, and the environment was limiting to most other dinosaurs, particularly predatory ones."

Nests In Mongolia, Montana

If the Lake Proctor site turns out to be a dinosaur nesting area, it will join a short list of places where nests have been found, notably in Mongolia's Gobi Desert and in western Montana. Unlike the Gobi and Montana sites, the Texas deposits have produced no eggshell remains.

Hypsilophodonts were among the dinosaurs found in Montana. John R. Horner of Montana State University's Museum of the Rockies, who found the Egg Mountain site in Montana and has been examining it for almost a decade, says they typically left their nests after hatching, but remained in the nesting area. This would account for the absence of eggshells at Lake Proctor.

"They were fast runners who lived in semi-arid environments," Horner says. Their remains have been found in groups only from Egg Mountain, the Isle of Wight, and an African site that hasn't been studied yet. "The rest that have been found are isolated finds," he says.



Dinosaur nests? That may be what these young hypsilophodonts are playing in. Fossils of the 115-million-year-old creatures were found near Lake Proctor in Texas. The depressions where the bones lay could yield valuable clues to the dinosaur's behavior patterns. Hypsilophodonts were vegetarians from the early Cretaceous period. Their young were the size of chickens or turkeys and adults were 10 to 12 feet long, scientists say.

Winkler's team has prepared one complete adult specimen, other adult bones, and numerous juvenile specimens, including at least 10 that were found together in one small block of sediment. By comparing the size of the creatures' thigh bones, from the thin, tiny bone of a very young dinosaur to the longer, thicker bone of an adult, the scientists will be able to learn how dinosaurs grew and how they functioned as they matured.

The juveniles were the size of chickens or turkeys, and adults were 10 to 12 feet long from head to tail, Winkler says.

Scientists began studying the Lake Proctor site in 1985, seeking the remains of poorly understood mammals from the early Cretaceous period. Instead they found dinosaur bones, leading them to start mapping and quarrying.

Lake Level Fluctuates

Work stopped for a while in 1986 because the lake's level rose, burying some of the areas where the team was digging. But when the level dropped last fall, the scientists discovered that new fossil-producing sites had been exposed.

Lake Proctor was opened in 1963. The area where the dinosaur remains were later found was maintained at the time by the Corps of Engineers as a recreation site for off-road vehicles.

Since the bones were found, the Corps has cooperated with the scientists in preventing vehicles from using the area. But the site is isolated, and the scientists are concerned about further damage from erosion and human intrusion.

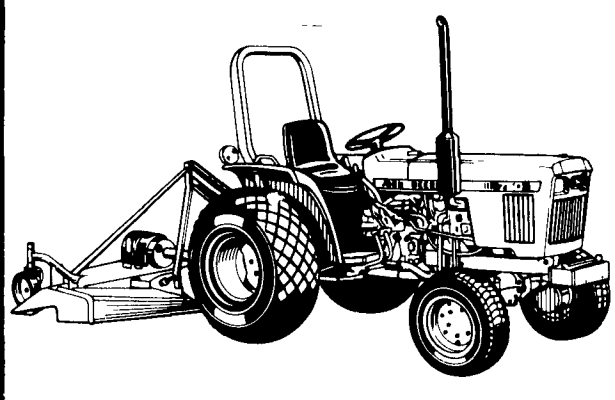
John Deere 750



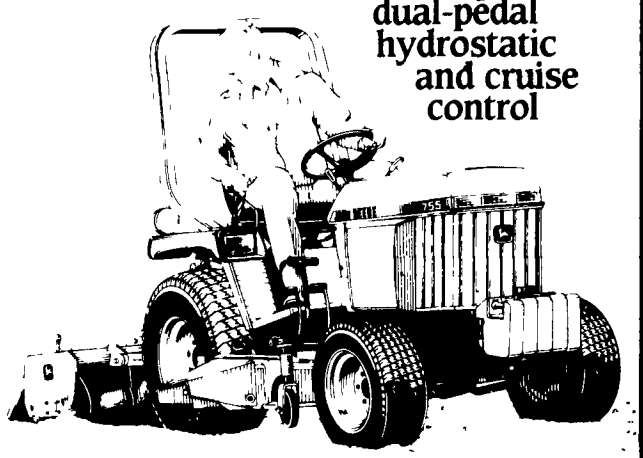
The John Deere 750 produces 20 hardworking horsepower from a fuel-efficient liquid-cooled diesel engine. Optional front-wheel-drive is available if you need 4-wheel traction. Capacity-matched attachments are available to keep your tractor working all year long.

Features include 8-speed transmission, 540-rpm rear PTO, Category 1 three-point hitch, differential lock, adjustable tread width, Roll-Gard* roll-over protective structure.

Stop in for a test drive soon — and get the details on the John Deere 2-year limited warranty.

John Deere 755

20 horsepower, dual-pedal hydrostatic and cruise control



Unique dual-pedal hydrostatic drive lets you change speed and direction on the go, in high or low ranges. That and standard cruise control keep your hands free for steering and other operations, keep you productive with less fatigue. Quik-Tatch feature lets you switch attachments in two minutes. Liquid-cooled 3-cylinder diesel. Optional front-wheel drive. Call for a demonstration.

Kathy JoAnn Weant Wears Carroll County Dairy Princess Crown

BY SHARON SCHUSTER
Maryland Correspondent

WESTMINSTER, Md. – Kathy JoAnn Weant of Taneytown was crowned Carroll County Dairy Princess at the Ag Center Saturday. Outgoing princess Nancy Powel relinquished her crown to the 17-year-old Francis Scott Key High School student after judges, Eloise Woodfield and John Witiak, made their selection.

As the contestants made their way to the stage, the audience did a doubletake. Kathy competed for the title with Sally Clas and her own twin sister, Karen Weant. The only way to tell the two apart were their peach and blue dresses.

The new princess, Kathy, and first runner-up, Karen, live with their parents, Clyde and Rhoda Weant, on a 113-acre Guernsey farm near Taneytown. Kathy was a member of the Carroll County Dairy Bowl team which won first place at the state competition last year and fourth place in the national contest. A member of the National Honor Society, she is also a member of the Spanish Club and shows dairy animals and swine.

Kathy said her goal is "to promote the dairy industry and 4-H." In answer to the dairy bowl question, "Do you think small farmers have a place in the dairy industry?", Kathy said "It's not the quantity, but the quality that is important."

Jean Fender, chairman of the contest, announced that the Dairy Princess committee is seeking donations to fund a newly-established scholarship program.

Kathy JoAnn Weant was crowned the Carroll County Dairy Princess during ceremonies at the Ag Center. During the coming year she will promote the dairy industry.

Engle Wins DeKalb Ag Accomplishment Award

ELIZABETHVILLE – Terry Engle, son of Mr. and Mrs. Clair Engle of Elizabethville, was recently named winner of the 1987 DeKalb Agricultural Accomplishment Award. The award, sponsored nationwide by DeKalb-Pfizer Genetics, is presented to the senior agriculture student attaining the highest degree of proficiency in scholarship, leadership and a supervised agricultural program.

Terry recently graduated from Upper Dauphin Area High School, where he has been treasurer and historian of the local FFA chapter, a member of the National Honor Society and the track team. Terry has also achieved special recognition for his accomplishments in the state FFA contests held at Penn State, receiving a silver award in land judging, a first place in safe tractor driving. This year he will compete in the extemporaneous public speaking contest.

His agricultural program consists of home garden, potatoes and dairy-beef finishing. Following

Terry Engle

graduation, Terry plans to attend Millersville University to major in industrial education.

As this year's winner, Terry receives a pin and certificate, and his name will be inscribed on a special plaque displayed in the school's main lobby. The DeKalb Award, often considered the highest honor a vo-ag student can receive on the local level, is presented at nearly 4,000 schools annually.

DeKalb-Pfizer Genetics conducts research at 33 stations across the United States and also operates seed production plants at 22 locations. Based in DeKalb, Ill., the company is an international researcher, producer, and marketer of corn, sorghum, soybeans, and alfalfa seed.

Broiler Production Up

HARRISBURG – Placements of broiler chicks in the Commonwealth during the week ending May 30 were 2,442,000, six percent above the previous week and 16 percent above the corresponding week a year ago.

Average placements during the past nine weeks were up 16 percent from a year ago. Settings for broiler chicks were 3,158,000, 10 percent above the same period last year but down six percent from the previous week. The current three-week total of eggs set is 13 percent above the comparable period a year ago.

Expected marketings for the week ending July 25, 1987 will be up 21 percent to 2,338,000. This figure is based on placements seven to nine weeks earlier less a mortality allowance.

Broiler-fryers slaughtered in Pennsylvania under federal inspection for the week ending May 20 totaled 1,913,000 with an average liveweight of 4.22 pounds.

Josie Hess Selected Adams County Dairy Princess

BY GINGER SECRIST MYERS
Adams County Correspondent

BIGLERVILLE — Josie Hess, 18, was crowned the 1987-88 Adams County Dairy Princess at the county's 20th Annual Dairy Princess Pageant held Saturday evening, June 13th, at the Biglerville High School Auditorium, Biglerville. She is the daughter of John and Bonnie Hess, 200 Tall Oaks Road, Gettysburg.

A recent graduate of the New Oxford High School, Josie served last year as one of the county's alternate dairy princesses. While in high school, she was on the field hockey team and president of her FFA Chapter. She is currently serving as president of the Adams County 4-H Dairy Calf Club.

Josie is actively involved in her family's farming operation which includes 1,000 acres of crops and a milking herd of 155 registered and grade Holsteins. Her responsibilities include milking and record keeping on the milking herd. She plans to attend a computer technical school in Harrisburg this fall where she will study accounting and computer programming.

When asked for a description of the type of person needed as a spokesperson for the dairy industry, she listed enthusiasm, personality, a healthy appearance, and knowledge of the product as vital attributes.

Selected as the county's Alternate Dairy Princess for the upcoming year was Janet Ludwig, 17, daughter of Frank and Bertha Ludwig, 514 Latimore Valley Road, York Springs.

Janet will be a high school senior this year at Bermudian Springs High School where she is active in sports and is the secretary of the FFA Chapter.

Janet was a National Awards Winner in 4-H, attending the National Club Congress in Chicago last fall. She was recently selected as one of the top 15 4-H'ers in the state.

Janet's responsibilities in her parents' dairy operation include milking, mating selections, feeding claves, and keeping records. She plans to pursue a career in the dairy industry.

Serving as judges for this year's contest were: Betty Cole, Hampstead, Md., a dairy farmer's wife and Baltimore County Dairy Princess Committee Person; Patricia Gerkin, Hanover, home economics teacher in the South Western School District; and Jay Kopp, Middletown, state Holstein director and director with the Atlantic Dairy Cooperative. Mistress of ceremonies was Susan Rush, the morning personality for WGTY Radio in Gettysburg.

As a special feature highlighting the pageant's 20th anniversary in Adams County, all the past county princesses were invited to this year's contest. Over a dozen former princesses returned for a special introduction, presented a bried autobiographical sketch, and offered a few remarks on what being an Adams County Dairy Princess had meant to them.

The evening concluded with a dairy dessert sampler. The contest is sponsored annually by the Adams County Holsteins Association.

Adams County dairy princess royalty pose with a few friends at the county's annual dairy princess contest. Shown here, from left, are 1987-88 Adams County Alternate Dairy Princess Janet Ludwig, Adams County's 1987-88 Dairy Princess Josie Hess, and last year's princess Jenny Weimer.

Twin Valley FFA Elects Officers

ELVERSON — Rich Hicks, the son of Mr. and Mrs. Robert Hicks of R2 Elverson, was chosen recently to serve as president of the Twin Valley FFA for the 1987-88 school year.

Rich is currently a junior vocational agriculture student at Twin Valley, where he is serving as a chapter vice-president. Rick's projects include sheep breeding, market lambs and work experience project on the Andrew Stoltzfus farm.

Other chapter officers include: vice presidents, Sue Burkhart, daughter of Mr. and Mrs. Richard Burkhart, R1 Mohnoton; Kim Brossman, daughter of Mr. and Mrs. David Brossman, R3 Birdsobor; and Mike Stoltzfus, son of Mr. and Mrs. Wilmer Stoltzfus, R2 Elverson.

Chapter secretary will be Richard Slonaker, son of Mr. and Mrs. James Slonaker of R2 Elverson.

Duane Stoltzfus, son of Mr. and Mrs. Harvey W. Stoltzfus of R1 Morgantown, will be chapter treasurer. Dwight Stoltzfus, son of Mr. and Mrs. Harvey W. Stoltzfus of RD1 Morgantown, will be chapter reporter.

Chapter sentinel will be Tom Morgan, son of Mr. and Mrs. Thomas Morgan, of R1 Birdsboro. Bob Carlson, son of Mr. and Mrs. Robert Niblick of R2 Elverson was elected chapter chaplain. Bob Bell, son of Mr. and Mrs. Robert Bell of R1 Mohnoton, and Sue Wilson, daughter of Mr. and Mrs. Bruce Wilson of R1 Birdsboro, will serve as chapter historians.

Assistant officers will be: Bunny Hicks, assistant secretary; Chuck Stoltzfus, assistant treasurer; Scott Ritchie, assistant reporter; Lisa Kimball, assistant sentinel; and Dan Nonnemaker, assistant chaplain.

*New York is the nation's third leading dairy state, ranking behind Wisconsin and California. The Empire State produces approximately 8 percent of the nation's milk, with an annual production of 11.7 billion pounds of milk.

Participants Hone Ag Knowledge At Women's Farm Leadership Forum

BY SHARON B. SCHUSTER
Maryland Correspondent

WASHINGTON, D.C. — Approximately 150 women from 32 states attended the Women's Farm Leadership Forum in the nation's capital last week. Agri-women representing small family farms to operations encompassing thousands of acres converged on the capital to voice their concerns, learn more about key agricultural issues, sharpen communication skills and meet with representatives of congress.

"Women are a hidden resource," declared Pat Pembroke, a participant in the three-day convention. "While they may not like detail work, they are good at it. They are clever and innovative."

Dennis Avery, agricultural analyst for the U.S. State Department, delivered a paper with the theme, "Can U.S. Farmers Compete in the World?" Avery's address was a repeat performance of the paper he delivered at the Maryland Ag Women's Forum last fall, with the emphasis on farm subsidies.

"The biggest immediate problem for the farmers of the U.S. and the other affluent countries is that farm subsidies have raised their production costs." Avery offered a solution for the problem that he warned would not be a quick or painless cure — farm trade reform.

"It will take at least three years of tough, single-minded negotiations to get it. Far better to put our chips on a farm trade reform that offers American farmers a long-term opportunity to compete them to waste more and more capital on doomed subsidy regimes."

The participants had the opportunity to hear and meet with Howard "Bud" Kerr, Jr., Director of the U.S.D.A.'s Office for Small Scale Agriculture. Kerr, who heads the one man department, said, "It is important for agriculture in the future to embrace diversification. American and foreign consumers have changing preferences. We have the opportunity to take the bull by the horns."

Howard "Bud" Kerr, director of USDA's Office for Small Scale Agriculture, invited women attending the forum to consult his office for advice.

He also posed this question to his attentive audience — "If you can't sell it, why grow it?" Kerr suggested alternative methods to meet the ever-changing demands of society, such as aquaculture, low input agriculture and focusing on industrial materials and value added crops.

"The U.S.D.A. stands ready to help farmers," he added. "Light up my number!" Kerr gave his office number, 202-535-0234, and encouraged participants to call. "I hope to be your best Washington receptical."

Outlining some initiatives of his department, Kerr announced that he will issue a bimonthly newsletter focusing on technology appropriate for small farms. He will "assay what research we have ongoing," and "do something like the "Successful Farming" sponsored Adapt 100 to offer ideas for alternative crops for small farms.

Throughout the informative sessions, the women's group heard presentations on groundwater contamination, biotechnology, a credit update and had the opportunity to meet with local media and members of congress at an evening reception.

Nancy Vail Wears Wayne County Dairy Princess Crown

RILEYVILLE — Nancy Vail earned the opportunity to represent Wayne County dairymen in the coming year as the county dairy princess during pageant ceremonies at Hickory Grange Hall June 6.

The daughter of Mr. and Mrs. Milton Vail of R3 Honesdale, Nancy lives on the family's 330-acre dairy farm. The Vails have 117 head of cattle and milk 58 Holstein, Jersey, Brown Swiss and Ayrshire cows.

Nancy is employed by her parents and plans to start a goat farm and work in photography. She is a past member of the Cold Springs 4-H Club. Her hobbies consist of three-wheeling, truck pulling, raising goats and giving puppet shows.

Alternate Wayne County Dairy Princess is Jeannette Warring, the daughter of Jean Warring of R2 Pleasant Mount. She owns five Holsteins which she keeps on a neighbor's farm. Jeannette is a member of the Pleasant Mount Go-Getters 4-H Club.

Pageant judges also selected a dairy maid and an alternate dairy maid. Carolyn Weist, the daughter of Mr. and Mrs. Andrew Weist of Honesdale, was named 1987 Dairy Maid. Carolyn plans to attend college to study medical technology. She is active in track and field and cross country and is a member of the Laurell 4-H Club. The Weist family milks 53 head of Holsteins and Jerseys on their 135-acre farm.

Alternate dairy maid is Anna Rutledge, the daughter of Mr. and Mrs. Harold Rutledge of R1 Equinunk. The family's 200 acre dairy farm, located at West Damascus, is home to 50 Holsteins.

Anna is a member of the Tri-Gal 4-H Club, 4-H County Council, Missy League Clubs and president of Student Council.

Judges for the event were Norma Barber of Fleetville, Dairylea legislation committeeman; Donald Hibbard of Montrose, district manager for Sire Power Inc. of Tunkhannock; and Allen Rosyel, a Franklin Township dairy farmer who is also director of American Dairy Association and Dairy Council of New York and director of United Dairy Association.

Festivities included a turkey dinner served by the Grange, a milk toast from 1986 dairy princess Julie Worobey and square dancing to music provided by the Ole Time Fiddlers.

Pa. Veal Cook-Off Set For August

HARRISBURG — The first Annual Pennsylvania Veal Cook-Off Contest, featuring more than $575 in cash and prizes, will be held during National Veal Month in August.

The contest, to be held at the Williamsport Area Community College during the second week in August, is sponsored by the Pennsylvania Beef Council through beef/veal check-off funds.

Any Pennsylvania resident, 18 years or older with non-professional cooking status may enter. Recipes using all cuts of veal may be submitted. Each recipe must contain a minimum of one-half pound of milk fed fancy fresh veal. No other meat may be included in the recipe, which must serve two people.

Veal recipes will be screened by a panel of three experienced judges for taste, ease of preparation, originality, appearance and low calorie appeal. A professional chef will prepare each of the top ten finalists' recipes which will be judged by a committee made up of a restauranteur, a chef, a home economist, and a nutritionist.

A complete set of rules and entry forms can be obtained by sending a self addressed, stamped envelope to: Pennsylvania Veal Cook-Off, Box 125, Monroeton, PA 18832 or by calling Chip Thomas at 717-265-7871. Entry deadline is July 15, 1987.

Summer Assistants Take Their Places In Lancaster Extension Office

BY SALLY BAIR
Lancaster Co. Correspondent

Editor's Note: Three new faces have appeared at the Lancaster County Extension Office for the summer. Two summer assistants and a summer intern will be helping the busy county agents with their jobs while learning about the Extension Service at the same time. So when you call the office, don't be surprised if a new voice greets you on the other end of the line.

LANCASTER — Michelle Dean is spending a lot of time this summer working on 4-H programs in Lancaster County. A 4-H'er for 11 years, this is not unusual, except that this year she is carrying no projects — she is working as a 4-H summer assistant in the Penn State Extension Office in Lancaster County.

Although this is different from carrying 4-H projects, this former Outstanding 4-H'er in Lancaster County is still finding it a learning experience. She says, "I am familiar with the program, but I am learning a lot behind the scenes."

While she is working with the entire program, she will have special responsibility for seven clubs in Lancaster city and Columbia, organized through the Expanded Foods and Nutrition Program. These clubs will emphasize foods and nutrition, and Michelle notes, "It will be as much a learning experience for me as for them. A lot of children are really excited about the program, and I hope to keep that excitement going. We want to get their interest and enthusiasm in 4-H so that they will want to come to county activities."

She will meet about 100 young people through the clubs which will operate for six to seven weeks. She will be encouraging not only teen interest, but also parental interest, in the hope that the clubs could continue year round. Part of the project may be planting seeds, so those children have something to care for during the summer.

Michelle is heavily involved with all the summer 4-H activities, including soliciting donations for the 4-H auction to be held during the three-day 4-H Fair, scheduled this year at Solanco Fair Grounds on Aug. 18, 19 and 20. With it being held over three days, she said they are hoping to bring in more community interest, and include other activities which may acquaint people with 4-H.

The daughter of Mr. and Mrs. William Dean, Strasburg, Michelle has always worked in the family hog operation, and also with the family stand at the produce market in Germantown. She says, "This is the first summer I'm not going to market." She explained that her family raises 10 to 12 acres of vegetables for the market, and now fattens hogs over the winter.

An active member of the Red Rose Beef Club, Michelle is experiencing her second summer without a steer. She says, "I really miss the steers." Fortunately for her, a neighbor is housing his 4-H steer at her farm, and she is enjoying that 4-H project. She also had swine projects.

A member of the livestock judging team as a 4-H'er, Michelle is hoping to help coach this year's team. Her outstanding team traveled to five national contests, placing sixth as a team at the Louisville contest. Michelle was eighth high individual.

Michelle also participated in 4-H exchange trips to North Carolina and Massachusetts and was a teen leader.

A graduate of Penn State with a degree in ag business management, Michelle is currently looking for a full-time job. She said, "I hope to work in public relations. I don't want to sit in an office all the time."

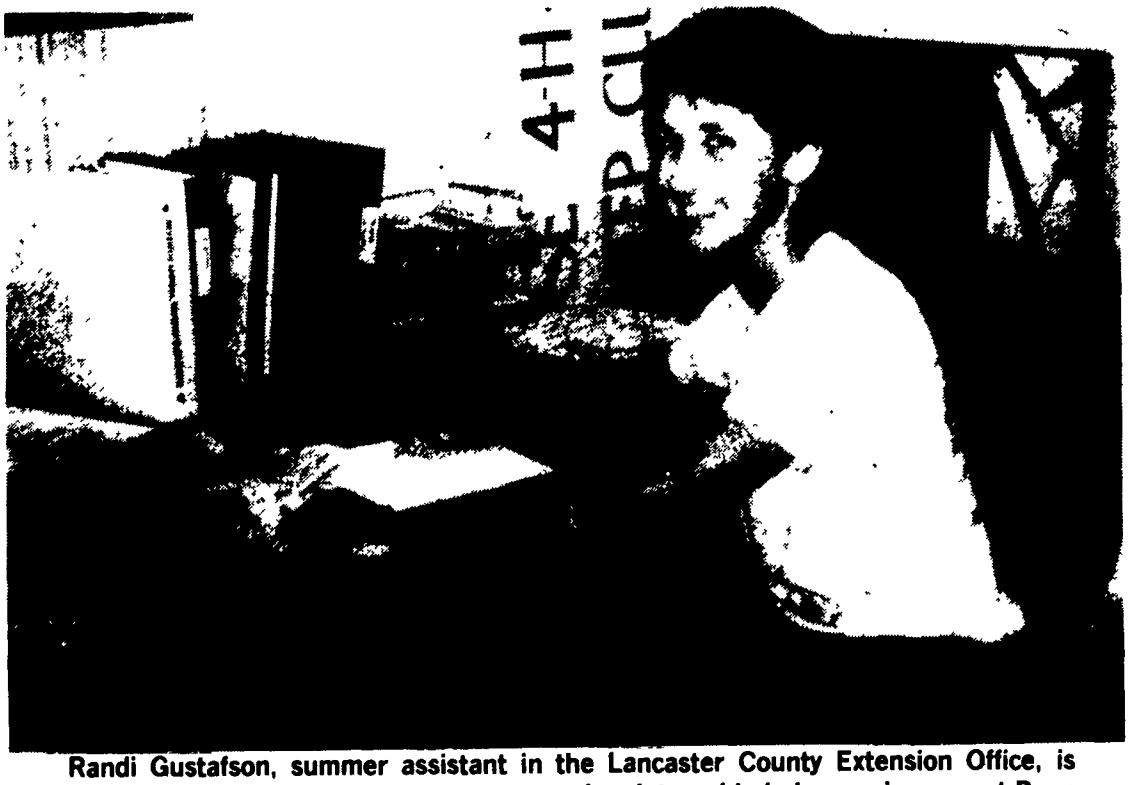
Because she had only worked with her family, she believes this opportunity in the extension office will add to her skills. "I thought it was important to work somewhere else."

She also made it clear that she is eager to give back to the 4-H program some of the advantages she was able to have. "I want to continue to work as a leader," she remarks.

Michelle credits 4-H with helping her develop and continue her interest in agriculture. "It was a learning experience. My interest in agriculture wouldn't have stayed without 4-H. Being in this county was very fortunate because it was more of a challenge."

Her years at Penn State were enhanced as well by her 4-H experiences. "Being experienced with competition helped when I was at Penn State. I also got involved with the Block and Bridle Club and I lived with kids who were in 4-H." When she went to the main campus, she already knew many people there, which helped smooth the transition.

As she looks for a career choice, she says simply, "I want to stay in Lancaster."



Randi Gustafson, summer assistant in the Lancaster County Extension Office, is helping with the livestock programs as part of an internship in her senior year at Penn State.

Rani Gustafson

Rani Gustafson, 22, grew up in a town near West Point in New York state, and did not belong to a 4-H Club, but she could not be more enthusiastic about the Penn State Extension Service.

In her last term at Penn State, Rani will graduate in August with a degree in animal production and a minor in extension education. Her last six credits are being earned in Lancaster County on an internship which is giving her a lot of insight into the work of extension agents. Indeed, she has become a sort of promoter for the extension service, explaining to family and friends just what Penn State Extension does.

Rani says, "It's nice. It keeps you busy, and the job is always changing. You are your own boss and design your own programs."

As part of her internship, Rani will be working on setting up a tractor driving contest to be held during the three-day 4-H Fair in August. She is also working toward establishing a regional livestock and carcass contest, which will take place sometime in the fall.

Her internship is being done under the supervision of County Agent Chet Hughes, and she is also working with him as he coaches the 4-H livestock judging team. She admits that she is learning right along with the 4-H'ers.

The 4-H program takes a lot of organizing and Michelle Dean, a former outstanding 4-H'er in the county, is working with the 4-H staff to carry out some of the many summer programs.

Part of the required work is to learn the work of the County Extension director and the objectives of the 4-H program. She adds, "I have to prepare a main educational program, which my advisor will come and evaluate." She said her grade will be determined by her advisor in consultation with Hughes.

This year eight people are working on such an internship, a requirement for anyone with an extension minor. Rani says, "The internship is the most helpful part — it is hands-on experience."

Actually, only half of Rani's time this summer is spent on the internship. The other half is devoted to working with Mitch Woodward, the manure management specialist. Together they are conducting a survey to determine the marketing opportunities for composted manure products.

Rani explained that they have mailed a proposed survey to county agents and hope to get responses and mailing lists to send the actual survey to companies who may have an interest. Once the results are complete, Rani and Mitch will summarize the results and inform farmers. She says, "Hopefully there will be a market."

They will also be working to set up demonstration plots to show farmers how to properly compost manure to make it marketable.

One of the challenges for the summer, according to Rani, is "managing my time. It's hard to try to fit everything in that you want to."

In addition to her full-time jobs, she is living and working on the dairy farm of Ruby and Darryl Bollinger, Manheim R7. "This is my first experience on a dairy farm, and it was one of my main objectives this summer to get some experience."

After graduation, Rani would like to get a permanent job in extension, though she is not limiting herself to Pennsylvania.

A long range goal includes the possibility of joining the Peace Corps to fulfill a dream of travel. "My main interest is in international agriculture." She would also like to get a master's degree, and perhaps become a professor and work in extension research.

No matter what the future holds, her practical experience in Lancaster County this summer has been an education for her and has convinced her that she has made the right career choice.

(Turn to Page B17)

Jay Irwin, County Extension director, explains to Mary Lou Zuck how the Extension office works. Mary Lou is a summer assistant for horticulture and helps to identify plant problems of every kind.

Summer Assistants

(Continued from Page B16)

Mary Lou Zuck

It is not unusual to find Mary Lou Zuck peering through a microscope looking at leaves, or studying a sick-looking branch of a tree. Mary Lou is the summer horticultural assistant in Lancaster County's extension office, and finding the answers to plant problems is her job eight hours a day.

She explains what she does this way, "I try to take care of all phone calls about home gardens, lawn care, fruits and vegetables. I have even answered agronomy questions. I get a wide range of questions."

She has even made some personal visits to determine the answers to problems, though she says most of her work is done by phone. Thaat can be interesting, since "everybody's description is different. "It's easier if I can see a specimen," she comments.

Mary Lou finds it challenging, though admits that she gets frustrated when she cannot find the answer. When that happens, she simply explains she'll get back to the questioner. She then turns to retired extension agent Arnold Lueck who is working at the office three days a week on a temporary basis, or to John Yocum, director of the Penn State Research Farm at Landisville.

She has found the people she works with to be very patient and understanding, traits about which she says, "I really appreciate it. The people are really nice. It comes with the type of people in Lancaster County."

Mary Lou grew up on a dairy farm near Elizabethtown, and finds her experience at home useful to her as she chats with farmers and homeowners. She says, "I always helped with the plants we planted around the farm buildings and with the garden." She adds, "Being a native is helpful."

Now a senior at Delaware Valley College majoring in ornamental horticulture, Mary Lou says she has always been interested in plants, and had taken the two-year floriculture course at Mount Joy Vo-Tech.

Although she was not in 4-H, Mary Lou says, "I knew about extension from newspapers. I knew what I was getting into." And now that she is into it, she says she would really like to get a permanent job in extension when she graduates, and would like to stay in Pennsylvania.

Mary Lou's work this summer is fulfilling part of the requirement for 24 weeks of work experience before she graduates next year. Last year she worked for Delaware Valley College for 14 weeks, in the nursery and the house where plants were between potting and planting.

She plans to attend the Pennsylvania Nurserymen's Convention and will work with the 4-H Fair this summer. She also helped carry out the strawberry round-up.

At college Mary Lou says she participated in the publications committee for the school exhibit for the Philadelphia Flower Show and is a member of the landscape nursery club and the Christian Fellowship.

As the summer progresses, Rani is looking forward to helping more Lancaster County residents with any of their plant problems. As she identifies the problems, and finds solutions, she is expanding her own knowledge and becoming better prepared for her career.

Franklin Co. 4-H Shepherds

Members of the Franklin County 4-H Shepherds held their market lamb weigh-in May 26 at the Boyd's farm in Nyesville.

Twenty-one club members had 37 lambs weighed and ear tagged for market projects. David Sheiss had the heaviest lamb at 80 pounds. The lightest lambs, at 38 pounds, belonged to Lee Golden and Gretchen Schoenberg. Average weight of all lambs was 60 pounds.

During June the group will have a breeding project show at Boyd's and a family picinc at Keener's.

Cathy Alt To Encourage Milk Consumption As Bedford Co. Dairy Princess

BY BETH GRAY
Bedford County Correspondent

NEW ENTERPRISE — When asked what could be done to alleviate the U.S. milk surplus, Cathy J. Alt of Bedford R4 noted, "We need people to promote that children and people of all ages should drink milk."

The answer helped Alt, 17, to the crown and cape signifying Bedford County's 1987-88 Dairy Princess. In a pageant here June 12, Alt also was chosen by fellow contestants as Miss Congeniality.

Selected first alternate princess was Jennie Clark of Bedford R4. Nicole Childers of Hopewell was named second alternate; Angie Kennedy of New Enterprise R1, third alternate, and Pennie Clark of Bedford R4, fourth alternate.

Judging the pageant were Dorothy Naugle of Hooversville, Ruby Edward of Huntingdon and Harold P. Kies of McConnellsburg.

Alt, the daughter of E. Jean and the late Herman Alt, helps her family farm 206 acres and care for a grade herd of 50 Holsteins. The princess's farm chores include making hay, feeding calves, assisting at milking time and "doing anything else that's necessary." In her new role she expects to promote dairy products through public appearances and says she wants to help dairymen toward greater production.

The Alt farm is managed by Cathy's brother, William, 28, and operates with the help of Mrs. Jean Alt and another daughter, Carol, 19, who was Bedford County's first alternate dairy princess in 1985.

Cathy, who will be a senior in the fall at Bedford Area High School, wants to pursue a career in criminal justice or law.

The new princess succeeds Heidi O'Neal of Hopewell, who continues as first alternate to the state dairy princess. At this ceremony, O'Neal received the incentive award provided by the County Dairy Promotion Committee for her active reign and a trophy from Bedford Rural Electric Cooperative.

A plaque was presented to Karl and Mid Beegle of Bedford R4 as they retired after serving 17 years as treasurer of the County Dairy Promotion Committee.

Beegle reported that in their 17 years of service, $102,000 was deposited and $99,220 spent for promotion of the dairy industry in Bedford County.

While many of the funds came from donations by dairy farmers and agricultural suppliers, Beegle said, approximately $2,000 per year was raised through operation of "Dairyland" at the Bedford County Fair. Those profits were realized, he added, because of the hundreds of hours of volunteer labor to sell milk, ice cream and milkshakes at the booth.

Some 300 people attended the pageant for which Peggy Henry of New Enterprise served as chairman and Betty Yothers of Bedford R4, co-chairman.

Cathy J. Alt, left, is helped into the cape of her new role as Bedford County Dairy Princess by retiring princess Heidi O'Neal.

Dasham Wins DeKalb Ag Accomplishment Award

SPRING MILLS — Howard Dashem, the son of Mr. and Mrs. John Dashem, Jr. of Centre Hall, was recently named winner of the 1987 DeKalb Agricultural Accomplishment Award. The award, sponsored nationwide by Dekalb-Pfizer Genetics, is presented to the senior agriculture student attaining the highest degree of proficiency in scholarship, leadership and a supervised agricultural program.

Howard attends Penns Valley High School, where he was president of the local FFA chapter, during 1986-87 school year. His agricultural program consists of a dairy herd, beef cattle, small grains, corn and hay. Following graduation Howard plans to farm in partnership with his father on their dairy farm.

As this year's winner, Howard receives a pin and certificate, and his name will be inscribed on a special plaque displayed in the Vocational Agriculture room. The DeKalb Award, often considered the highest honor a vo-ag student can receive on the local level, is presented at nearly 4,000 schools annually.

DeKalb-Pfizer Genetics conducts research at 33 stations across the United States and also operates seed production plants at 22 locations. Based in DeKalb, Ill., the company is an international researcher, producer, and marketer of corn, sorghum, soybeans, and alfalfa seed.

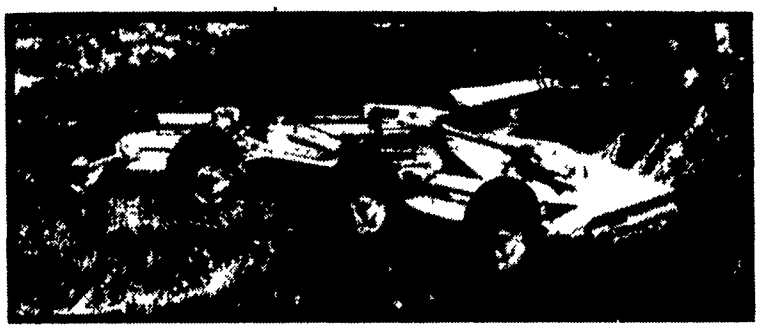
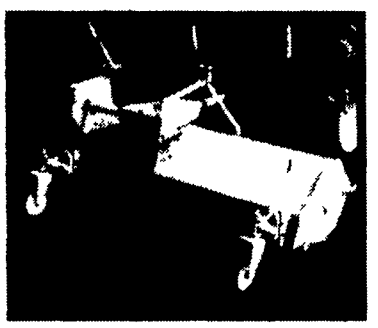
WOODS... The Growth Company!

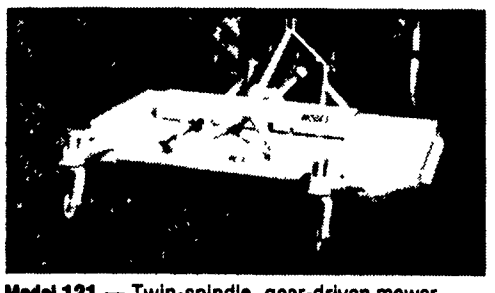


Model H-D315 — A new heavy-duty mower for big area work. Cuts a 15 ft. swath. Mows up to 13½ acres per hour. Heavier, stronger than previous Batwing® models.

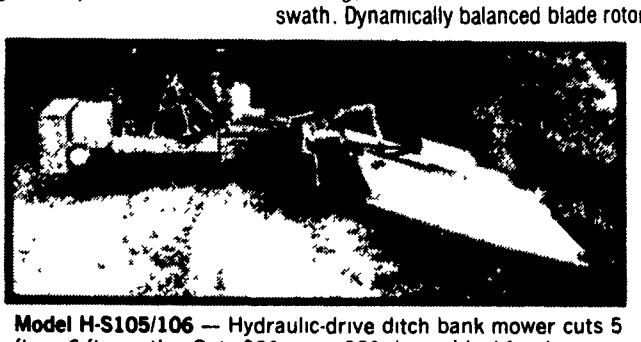


Model FM-72 — Flail mower with self-cleaning, airlift blades Mows a 6 ft swath. Dynamically balanced blade rotor

Model RB750/850 — Rear blades in 7 ft and 8 ft models for tractors rated up to 100 HP Adjust angle, tilt, offset and reverse



Model 121 — Twin-spindle, gear-driven mower cuts a 10 ft. swath. Offset model also available for orchards.



Model H-S105/106 — Hydraulic-drive ditch bank mower cuts 5 ft. or 6 ft swaths. Cuts 90° up or 90° down Ideal for drainage or roadway ditches.

WOODS
Division of Hesston Corporation

Model 312 "one pass" orchard mower cuts a 12'6" swath... mows grass and weeds, shreds prunings, clears brush. Available for 540 or 1000 rpm PTO tractors.

Model 312 illustrated with optional grove and chain shielding

Nobody understands your orchard mowing needs better than Woods. That's why we've engineered the model 312 "one pass" orchard mower. The 5' center section and two 4' wings mow a 12'6" swath... cuts mowing time in half for orchards and groves with 18' and 20' row spacing. The model 312 is engineered for heavy duty mowing and shredding. Hinged wing sections follow ground contour for uniform cutting over uneven terrain.

Rebecca Sonnen Named Lebanon County Dairy Princess

ANNVILLE — Rebecca Sonnen became the latest ambassador for the Lebanon County dairy industry June 13 at the county's annual dairy princess pageant.

Angela Bollinger received the alternate dairy princess title at ceremonies held at the Annville Elementary School.

The 1987 dairy princess will be a senior at Conrad Weiser High School this fall where she belongs to the Future Farmers of America and works on the school newspaper. Rebecca is a member of the concert band, marching band and the National Honor Society.

In the future the 17-year-old daughter of Paul M. and Marilyn Sonnen, Richland, plans to attend college to major in communications and public relations. The Sonnens raise a herd of 80 Holsteins on their 200-acre farm.

As part of her presentation, the newly crowned princess portrayed Little Red Riding Hood carrying a basket of dairy products to her Grandmother's house. She explained the facts of and need for each dairy product in her basket. 'Little Red Riding Hood' noted that Grandmother always said, "A dinner without cheese is like a kiss without a squeeze."

The alternate princess is the 16-year-old daughter of Donald and Rosene Bollinger, Newmanstown. Angela will be a senior at Elco High School this fall. In high school she is active in the FFA Chapter and the National Honor Society. She is a member of the Elco 4-H dairy club and the county's junior Holstein club.

Upon graduation, Angela plans to enter college and major in dairy science. She presently lives with her family on their 130-acre, 100-head Holstein farm.

Also competing for the title were Marcy Barnhart, Sherry Donmoyer, Sheila Hostetter and Laura Harding.

Judges for the event were Phoebe Bitler, coordinator for Berks County Dairy Farmers Association; Cecilia Deck, senior home economist in the test kitchens at Hershey Foods; and J. Harold Bare, Chester County dairy farmer. Mike Firestine of Lebanon Valley Bank served as master of ceremonies for the evening.

Rebecca Sonnen (right) was crowned in the 1987 Lebanon County dairy princess in ceremonies held last weekend. Angela Bollinger will serve as alternate dairy princess.

Ida's Notebook

Ida Risser

Recently I attended "Craft Days" at the Landis Valley Museum near Lancaster. I went with several of my children — in fact our milk tank driver said our place looked like a lot for used cars. Considering the fact that I purchased a new one not so long ago that statement didn't make me too happy. One was a rented car as our daughter flew from Atlanta as a consultant for her recent employer.

But back to the craft show at the museum. There were some 30 volunteers demonstrating their particular interests. I'd guess we saw only half of them as they were scattered over the grounds.

Many brought back memories. Broom making was in process and I remembered that my grandfather grew broom corn and then had it made into child-sized brooms for his grandchildren.

The blacksmith shop reminded me of the times that I led our two work horses, Ben and Fred, to the shop five miles away. No, I wasn't allowed to ride them. I had to lead them to the shop.

The most interesting demonstration to me was the flax and wool processing. I'm always amazed at the time consumed in making a small amount of thread. And, then when I considered that it had yet to be woven into cloth. Even the preparation of the flax plants, before spinning could begin, was tremendously time consuming. When I grew flax in my garden, I always enjoyed the beautiful small blue flowers that it had.

This year I didn't notice that they showed filling "chaff bags" with straw. However, I well remember spending my youth sleeping on a bag stuffed with straw. It was fine at first but after a few months it surely flattened out. Ah, memories!

Broken Bit Horse And Pony 4-H Club

The Broken Bit Horse and Pony 4-H Club will hold a horse show June 21 at the Lower Hopewell Horse Center. The show is scheduled to begin at 10 a.m.

The show will offer 31 classes, including adult's and children's equitation, pleasure and racing classes. There will also be adult, children and racing championships.

For more information call Helen Farrington, 717-626-7258, or Jean Immel, 717-626-5864.

Red Meat Production

HARRISBURG — Commercial red meat production in Pennsylvania during April 1987 totaled 82.8 million pounds dressed weight basis. This is down eight percent from last April according to the Pennsylvania Agricultural Statistics Service.

Beef slaughter at 106 million pounds liveweight was down 12 percent from April 1986. Total head slaughtered was 89,100, down 14 percent. The liveweight averaged 1,189 pounds, up 29 pounds. Veal slaughter was down 16 percent to 3.5 million pounds liveweight. Calf slaughter of 19,400 head was down 17 percent, and the average liveweight increased five pounds to 179.

Hog slaughter at 30.4 million pounds liveweight was down three percent from last year. Total head slaughtered at 127,200 was down five percent but the average liveweight was up four pounds to 239. Lamb and mutton slaughter was 1.3 million pounds liveweight, up 12 percent. The number slaughtered was 13,500, up 12 percent from last April. The average liveweight was unchanged at 99 pounds.

Stephanie Meyers Presented With Franklin Co. Dairy Princess Title

BY BONNIE BRECHBILL
Franklin County Correspondent

KAUFFMAN STATION – Stephanie Meyers became Franklin County's dairy princess June 13 at Kauffman's Community Center at an event commemorating the 20th anniversary of the Franklin County Dairy Promotion Committee.

The daughter of Julia and J. Robert Meyers, Jr. of St. Thomas, the new princess graduated the evening before the pageant from James Buchanan High School. She plans to attend Virginia Tech in the fall as a dairy science major. Stephanie hopes to become involved in the marketing and advertising of dairy products, including the public relations aspects.

During her high school years, Stephanie, 18, was president of the James Buchanan band, president of Students Against Driving Drunk, and reigned as her school's 1986 Homecoming Queen. Her hobbies are showing cattle, skiing, and playing the flute.

Stephanie, who was crowned by Franklin County's 1986 Dairy Princess Debra Hall, milks 120 to 130 cows every evening on her parents' 600-acre farm, Meyers Brothers Dairy. She plans to promote milk to all age groups, and especially to athletes, as she thinks dairy products are very important for anyone involved in sports.

Stephanie's skit utilized her musical talent. She lamented to her stuffed cow, Molly, about the difficulty she was having writing a speech for school. She tried to play her flute to relax, but even "Old MacDonald" came out wrong. She drank some Gatorade, but after reading the ingredients, declared it fit only "for victory baths." Next she drank some milk, "the source of our family's income." The ideas for her school speech then flowed, extolling the virtues of milk, and she was able to play her flute well.

"Milk keeps me in tune, and it'll keep you in tune, too," she concluded.

First Alternate Patti Thomas, 17, is the daughter of Daniel and Joanne Timmons of Greencastle. A recent graduate of James Buchanan High School, she was a member of American Field Service, the James Buchanan Show Choir and the track team.

Second Alternate Melanie Hawbaker, 17, also received the Earl Strine Memorial Award for the best presentation. For her skit, she wore a white lab coat and instructed her "patient", Mr. Bunny, on the requirements of a good diet. She informed him of the health benefits of using dairy products, and told him to tell Mrs. Bunny. She concluded, "The family that diets together grows healthy together." The daughter of Harmon and Joyce Hawbaker of St. Thomas, she is a 1987 graduate of James Buchanan High School.

Also competing for the title were Lois Dice, 19, daughter of Herb and Marie Dice of Chambersburg, and Rhonda Stauffer, 17, daughter of Clarence and Darlene Stauffer of Mercersburg.

Present for the 20th anniversary event were 14 of the county's 19 former dairy princesses. Dairy Promotion Committee Chairman Robert Eckstine introduced the former princesses as each walked on stage. Among those attending the 20th anniversary event was Franklin County's 1970 Dairy Princess, Sharon Burkholder Engle, who went on to become the State Dairy Princess.

The new Franklin County dairy princess Stephanie Meyers, center, is flanked by first alternate Patti Timmons, left, and second alternate Melanie Hawbaker, right.

Eckstine also gave some statistics from the 20 years that dairy princess contests have been held in Franklin County. A total of 138 girls have participated, from a low of five per pageant to a high of 11, averaging out to almost seven girls per pageant.

Debra Hall, 1986 princess and daughter of Mr. and Mrs. Wayne Hall of Shippensburg, presented a gift to each contestant. She told the 260 people present that during her reign she traveled 4,000 miles, did 29 radio spots, 20 store mall promotions, 26 special events, and 80 school presentations. "The farmers in Franklin County work together as a group to promote milk," she said. "I am proud to represent them." She plans to attend school to become a dietician.

Judges for the event were Debra Brubaker, Manheim; Debbie Rode, Harrisburg; and Robert Gabel, Newport.

Richard Wagner, a teacher at James Buchanan High School, served as emcee.

The contest was sponsored by the Dairy Industry of Franklin County.

DE LAVAL The New DeLaval®

FEED CAR™ Stanchion Feeder

NOW...All the advantages of automatic individually controlled feeding is available for stanchion and tie-stall barns.

The principle of feeding little and often is now available and affordable. Now 30-40 cow operators can have the same benefits as large operators. You can give each cow an individually programmed ration based on milk production, stage of lactation and other factors you want to consider, feed small amounts up to 10 times every 24 hours. It's accurate and automatic, feeds 4-to-5 cows per minute with one or two types of feed; and has optional automatic refill. Travels around your barn on an overhead monorail. Owners report it can pay for itself in 18 months or less!

Farm Women

Lancaster Society 1

Members of Lancaster Society 1 met June 6 in the home of Barbara Hershey. Amy Brubaker was co-hostess.

Society president Ann Landis greeted members and guests and Sue Bollinger led the group in singing "America The Beautiful."

For devotions Dorothy Hollinger read an article entitled "O Saw God Wash The World," Psalm 146, and a prayer poem by Carol Ann Davis.

Ann Landis announced that the county board selected Make A Wish and The Water Street Rescue Mission for this year's county project. Members voted to donate $100 to the project.

County president Mary Shellenberger, a guest at the meeting, reported on the Spring Rally held May 20 at Elizabethtown College. She said there were 342 reservations and many favorable comments about the meeting, the food and the program.

Mary Clark announced plans for two bus trips the society is planning. On Saturday, July 25, the group will travel to Sandy Cove; the other bus trip is to Tangier Island on Wednesday, Aug. 12.

The trips are open to the public. Additional information and reservations can be obtained by calling Mary Clark at 626-5500 or Amy Brubaker at 733-7425.

Entertainment for the meeting was provided by Jean Roth of Millersville, an instructional aid at Reynolds Junior High School in Lancaster. She tutors learning disabled children in reading and mathematics.

She portrayed Harriet Lane, niece of President James Buchanan. She covered Harriet Lane's childhood through her school years and eventually as official hostess for her uncle during his years in government service. Many of her retirement years were spent at Wheatland and during her lifetime she instituted many worthwhile programs, some of which still exist today.

The society's next meeting, scheduled for July 11, will be a Millersburg Ferry Boat ride followed by dinner.

Lancaster Society 25

Thirteen members of Society 25 met at the home of Phyllis Reapsome on June 13.

Jean Breneisen read Psalm 8 and offered a prayer. Miriam Byers was acting secretary since Francis Greenawalt was absent. Bea Newswanger, a member of Society 25, was honored with a Distinguished Service Award by the Heart Association for over 1,800 hours of service.

The group made plans to play Bingo at Conestoga View on Aug. 20.

Dorothy Elmer, a member of Society 25, reviewed "Frau Doctor," a book by Grace Kaiser.

The group will not meet in July and the next meeting is set for Friday, Aug. 7 when the society will tour the gardens of Conestoga House, then return to the home of Edna Gerlach, 1257 Wabank Road, Lancaster, for business and refreshments.

Lancaster Society 26

Members of Lancaster Society 26 met recently in the home of Joan Summer. Lois Brubaker was co-hostess.

Janet Buchen led devotions and for roll call, each member shared a memorable hairstyle.

Lucille Buckwalter presided during the business meeting, Program was Spring Hairdos by Sheri and Ed Wagaman.

On June 25, the society will be entertained by Society 28 at the Farm and Home Center beginning at 7 p.m.

Berks Group 1

Eighteen members of Berks Group 1 met recently at the home of Mrs. Ellen Snyder, Limekiln.

Speaker for the evening was Mrs. Loraine Schutt, a registered nurse and certified CPR instructor; she is also certified to teach the Heimlich method to help a choking person. She also told members about the signs that indicate a possible heart attack.

Society president Agnes Noll conducted the business meeting. The group will meet next on July 8 at the home of Mrs. Ella Richards, R2 Oley, when members will hold their annual doggie roast; family members are invited to attend.

Cumberland Group 19

Cumberland Group 19 met June 10 at the Center for Industrial Training in Mechanicsburg.

Fourteen members and three guests enjoyed a delicious luncheon at the "Sassy Gourmet," the Food Serve training program division of the center. After lunch, the group toured the facility.

President Gladys Hoover presided over a short business meeting. Mary Weir reported on the county board meeting.

In July, the group will attend a play and August will feature a picnic at Hensel's mountain cabin.

F.W.S. Calendar

Saturday, June 20

Lancaster Society 3 meets at 2:15 p.m. for a program by state Rep. Terry Scheetz.

Lancaster Society 18 meets at 1:30 p.m. for a program on Cornwall by Ethel Harnish.

Thursday, June 25

Lancaster Society 11 picnic, Huffnagle Park, noon.

Lancaster Society 28 entertains Society 26 at the Farm and Home Center, 7 p.m.

Lancaster Society 10 sews at Lancaster General Hospital, 9 a.m. to 2 p.m.

Saturday, June 27

Lancaster Society 4 meets at St. Paul's United Methodist Church, Mountville, for a program by Elizabeth Swope, Lancaster County poultry queen.

Tioga County Dairy Princess Crown Goes To Jennie Groover

MANSFIELD – The fifth annual Tioga County Dairy Day activities ended Saturday at Mansfield High School with Jennie Groover of R2 Canton being crowned the 1987 Tioga County Dairy Princess, following a very sincere and tearful farewell by outgoing dairy princess Teresa Herman.

Jennie is the 17-year-old daughter of Mr. and Mrs. Charles A. (Chuck) Groover. She is a junior at Canton High School, where she is active in varsity basketball and softball, Foreign Language Club, and National Honor Society. She is also a member of the Society of Distinguished High School Students.

Jennie maintains two registered Holsteins for her 4-H project, and is a member of the Country Farmers 4-H Club and Jr. Holstein Association. Jennie went to state competition with her intermediate calf and received Reserve Junior All Pennsylvania and Reserve All Pennsylvania.

Jennie attended the 1986 Pennsylvania Governor's School for Agriculture at Penn State. She is a member of the Ogdensburg Church of Christ.

Helen Norman, the daughter of Mr. and Mrs. Donald Norman, of Liberty, and Dawn Stamets, daughter of Mr. and Mrs. William Stamets of Osceola, were named alternate dairy princesses to serve for the following year.

During the pageant the contestants answered questions, asked by Jim Welch, master of ceremonies. The questions were each about some aspect of the dairy industry.

Contestants were also required to give a milk promotion presentation. Jennie chose to do her skit as a carton of milk applying at the employment agency drink. Helen presented hers as a teacher reading a story of "Alice in Dairyland" to her class, and Dawn was an elderly lady with osteoporosis.

The Mansfield Men's Chorus entertained the audience with a selection of numbers, and a favorite of the audience was their version of "There Ain't Nothing Like a Dame" or "Cow" as the case might be.

The Tioga County recipients of the Dairy of Distinction Awards received their plaques and were honored for being selected as one of the ten regional award winners. The three Dairy of Distinction winners in Tioga County are Mr. and Mrs. Verne Bowen, Mr. and Mrs. Harold Robson, and Mr. and Mrs. Theodore Schmelzle.

During the day contestants participated in a parade and met the people in Smythe Park during the afternoon, which was spent passing out milk promotion stickers. They also had interviews with the judges: Greta Eichlin of Pittstown, N.J., Peggy Madigan, of Towanda, and Fred Epler of Lewisburg.

Before the pageant contestants, their families and the committee dined at the Canoe Camp Church of Christ.

1987 Dairy Day was considered a huge success having more activities, more people, and lasting longer than previous events. The day started with a 10K Dairy Dash at 9 a.m. Finishing first overall was Tom Jansen in 35.56 minutes, second went to Paul Marriccini with 36.03 minutes, and third to Donald Patterson with 36.43 minutes. The top three female finishers were Cathy Stamets in 44.59 minutes, second to Barb Morgan in 45.28 minutes, and third to Louise Young in 46.23 minutes.

The race was followed by a dairy parade consisting of numerous floats, bands, dignitaries, farm machinery, a milk tanker, a pink cow, clowns, Bossie Bingo, and other miscellaneous entries.

The float awards were as follows: Non-profit, first to National Farmer's Organization, second to Tioga County Learning Council, and third to Mansfield Jaycees. Youth, first, to Roseville 4-H Dairy Gang, second to Mansfield FFA; and commercial prize to Dietricks.

The afternoon was packed full of activities at Smythe Park with such things as chicken barbecue, and lots of other foods, petting zoo, horse-drawn hayrides, live music by Steve and Gloria Dziuba, face painting, Bossie Bingo, displays, games and contests. Some of the highlights were the annual outhouse race, bale throwing and stacking contest, barbed-wire splicing contest, and greased pig contest. There were numerous contests for children such as a three-legged race, feed bag race, balloon stomp, bale rolling, egg throwing, and calf bucket races. There was also the building and consuming of a 26-gallon ice cream sundae.

Jennie Groover, center, is Tioga County's 1987-88 dairy princess. She will be assisted by alternate princesses Helen Norman, left, and Dawn Stamets, right.

THE MICRO WAY

LANI BLOOMER

Microwave The Macho Way!

Since we honor the men in our lives on Father's Day, here's a column just for you male cooks out there! If you don't have a microwave, get one. It will be your best friend in the kitchen!

Today's recipes can both be made in one utensil (but not at the same time!) If you buy only one microwave utensil, get a round 2-quart glass covered casserole dish. This is one of the most versatile and adaptable utensils around.

"For Men Only: Mastering the Microwave," by CiCi Williamson and John Kelly is a new microwave cookbook, published last year by Barron's. The hardback book is available in bookstores for about $13, and would be useful for any beginning microwave cook!

This cookbook contains clear explanations, time charts, and substitution lists for many ingredients. The recipes use a minimum of utensils for you bachelor's who don't have a very well stocked kitchen. The book also gives you the preparation time and calories for each recipe.

The following recipe is from this book for you to try. It takes 20 minutes to prepare, and has 514 calories per serving.

Chicken Italiano

1 pound chicken parts, (breasts, drumsticks or thighs)
1 16-ounce can stewed tomatoes, with liquid
½ can (6-ounce tomato paste (freeze the rest!)
1 teaspoon dried basil
¼ teaspoon garlic powder
1 medium zucchini squash, sliced ¼-inch thick
Cooked noodles or pasta
Grated Parmesan cheese

1 Rinse chicken in cool water and pat dry using paper towels. Place in a round 2-quart casserole. Arrange chicken skin side down, with the meaty portions toward the outside Cover with casserole lid or plastic wrap and microwave on high for 4 minutes.

2 Turn each piece of chicken, skin side up and arrange as before. In a small mixing bowl, combine stewed tomatoes, (including liquid), tomato paste, basil and garlic powder. Pour over chicken. Re-cover and microwave on high for 6 to 7 minutes.

3 Add zucchini to casserole; re-cover. Microwave on high for 3 minutes. Serve over cooked noodles and sprinkle with cheese. Makes 2 servings.

This meatloaf recipe is not from Williamson and Kelly's cookbook. But it is quick and needs a minimum of ingredients to make. If you're cooking just for yourself, cook the full amount, then freeze the extra for another even faster meal!

Macho Meatloaf

1½ pounds ground beef
2 tablespoons of dry onion soup mix (half of one 1¼-ounce envelope)
1 egg, beaten
½ cup bread crumbs
8-ounce can tomato sauce

1. Combine the ground beef, 2 tablespoons of the soup mix, egg, and bread crumbs in a mixing bowl. Add half the can of tomato sauce and mix well. Press meat mixture into a ring around a 2-quart glass casserole dish. (Put a glass or custard cup in the middle if you want, but this isn't essential.) Spread remaining tomato sauce on top.

2. Cover with waxed paper and microwave on high for 12 to 14 minutes, until no longer pink. Rotate the dish in the oven every 5 minutes if your oven cooks unevenly. Cover with the lid and let stand 5 minutes before serving. Serves 4 to 6.

Tips: Let meatloaf stand on the counter, and microwave some baked potatoes. Serve with a salad for a quick and hearty meal!

— To prepare ahead of time: Prepare through step 1, then cover with lid and refrigerate. When meatloaf is chilled, it will need 2 to 3 minutes longer on high power to cook.

Note: The cooking times above are for microwaves with 650 to 700 watts. For 500 to 600 W, add 10 to 15 seconds to each minute.

AG-BAG EQUIP.
Custom Bagging Rye & Hay Silage & Round Bale Bags
Dealer: Larry Eckert
PH: 717 (626) 7596

Free Feed Test - Free Tape
Two Bags or More Better Price

Ag-Bag Compacts more feed per ton than others. Do not be misled, others claim to have a bag of equal quality. Our bag formulation has yet to be duplicated. Ag-Bag Corporation closely monitors the manufacturing process and specially prepared resin formulas necessary in producing lasting and durable Ag-Bags. Competitive bags show that nitrogenous gases have escaped from other bags leaving it a yellow color. Proving they do not have airtight feed storage bag to give you true sealed storage, like the Ag-Bag bags offer.

CUSTOM ROUND BALING
w/John Deere 530 round baler.
Variable bale sizes.
Reasonable prices.
Will travel.

SLICK CONCRETE CAN BE ROUGHENED

SCABBLING is an effective way to avoid unnecessary losses of cattle. The SCABBLER makes bands about two inches wide approximately 1/8" to 3/16 in. depth. This gives sufficient area for good footing while allowing you to scrape the smooth surface as before. It is near enough to the surface to give your cows full advantage of the roughness and deep enough to remain effective for years. It greatly aids in heat detection.

And the good news is that it is reasonably priced. You have the choice of doing it yourself or having us do it for you. We offer service right to your door. Call us for more details.

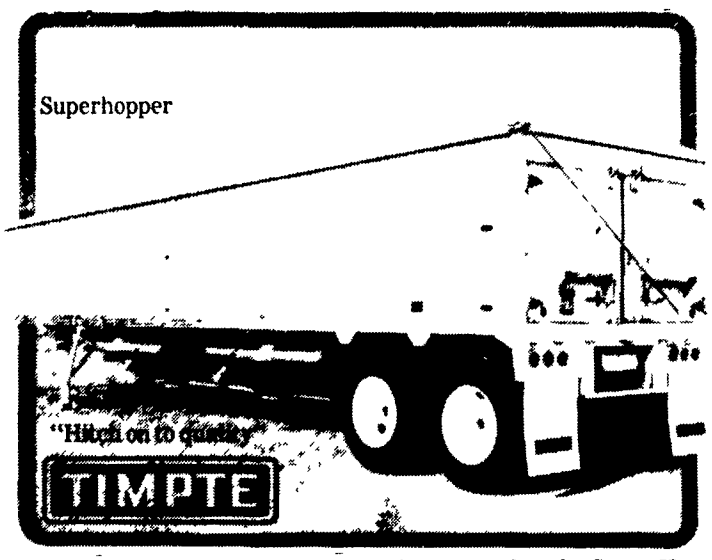
SUPER HOPPER

BUY A 1987 TIMPTE LIGHTWEIGHT GRAIN HOPPER NOW



Got Grain? Then get the trailer that is Timpte tough... the Super Hopper. It's not only built to take it...it's also built to cut fuel costs. The Super Hopper is lightweight and aero-dynamically designed to reduce wind drag. When there's grain to be hauled, Timpte does the haulin' best and pulls a lot easier than the rest.

New Timpte, 42'8"x65" Sides, Hopper Bottom In Stock

USED HOPPERS FOR SALE

- 1986 Timpte 42'8" Long x 65" Sides, Hopper Bottom
- 1984 Crescent Steel, 42'x65" Sides, Hopper Bottom
- 32' Level Floor Grain Trailer

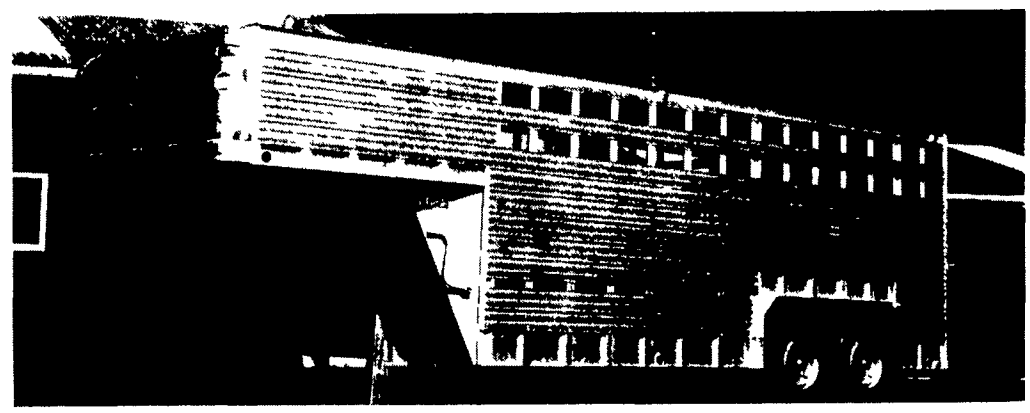
ALUMINUM GOOSENECK TRAILERS



20' Gooseneck Trailer

A versatile, lightweight, Eby aluminum stock trailer is built to provide years of maintenance free service. An Eby trailer is custom built to fit your individual hauling needs - No mass production! We use only quality components and strong alloy aluminum to manufacture what may be the last trailer you'll ever buy.

- LIGHTWEIGHT - Eby stock trailers are 25-35% lighter than comparable steel trailers. Less weight means better fuel mileage or increased payload.
- MAINTENANCE - Eby aluminum trailers won't rust. Welding and painting can cost you dollars in down time and repairs.
- DURABILITY - Eby trailers are built tough. Quality components and 6061 alloy aluminum provide the ruggedness required in a livestock trailer.

How Can These Cottonseeds Give Your Fat Test A Boost Without Giving You A Feed Handling Headache?

NEW AGWAY TEST:RIGHT™
With Whole Cottonseed

FIRST PELLETED FEED WITH WHOLE COTTONSEED

- **Improved Nutritional Benefits**
- **Easier Storage and Handling**
- **Better Income Over Feed Cost**
- **Better Balanced Forages**

Is fat test a problem on your farm? New Test:Right dairy feed from Agway is the answer.

You're probably aware that feeding whole cottonseed can increase the fat level in your milk. But if you've fed cottonseed in the past, you're aware of the handling and storage problems.

New Test:Right is the only pelleted dairy feed that includes whole cottonseed, regulated protein solubility, and regulated carbohydrates in an easy-to-handle, easy-to-feed pellet. And it's also easy to see the difference that an increase in fat test can make in your milk check!

If you want to increase your milkfat content, and your profits, talk to your Agway Farm Enterprise Salesperson about new Test:Right. He can balance your feeding program with the on-farm Ration Balancing Computer System and prescribe the correct Test:Right feed for optimum milk production and fat test results on your farm.

Working for people who work the land℠

FARM ENTERPRISE SERVICE AGWAY®

We Keep Production Lines Going.

Besides hard work, it takes management skill and good instincts to run a farm. The right amount of sunshine and rain doesn't hurt, either.

Yet, by and large, a farm runs on money. And between harvests, money has a way of running short.

Farm Credit helps farmers meet operating expenses with production loans. For everything from seed, fertilizer and chemicals to labor costs and tractor tires. Production loans can also stock the fish pond and feed the feeder pigs.

And because livestock and crops don't grow to suit a payment schedule, we adjust yours according to your cash flow.

Unlike some other lenders, Farm Credit is owned and controlled by the farmers who use its services. Which means we're always here for farmers. Not just when it suits our profit needs.

So if you're in line for a production loan, the most productive thing you could do is call us.

EQUAL HOUSING LENDER

FARM CREDIT. A Bank Of Local Farmers.SM

Farm 'Open House' Features 25-Foot Banana Split

BY BETH GRAY
Bedford Co. Correspondent

SOMERSET — No where, perhaps, were more banana splits consumed in such rapid order than at the George and Audrey Stahl farm near here Sunday.

"An Afternoon at the Farm," sponsored by the Somerset County Farmers' Association, featured the construction – and consumption – of a 25-foot banana split. Augmented by individual dishes of banana splits, a total 500 were served.

Somerset County Dairy Princess Jennifer Barnett and her mother, Kathy, of Boswell R2, were in charge of the effort that required 10 persons to concoct the mammoth confection in a specially built trough. It, plus the individual servings, contained 15 gallons of ice cream, 150 bananas, four gallons of toppings and one gallon of cherries. Visitors gobbled it up in about 15 minutes.

Schneiders Dairy of Pittsburgh, to which the Stahls ship their milk, donated the ice cream. Other sponsors included William Myers, DHIA supervisor; Leonard Miller of Young's, Inc., Farm Credit and Walker Farm Service of Somerset.

Additional ice cream cones were served throughout the afternoon; the ice cream was provided by Schneiders and the cones by Big Drul-Alco of Somerset.

While some 400 people registered during the three-hour afternoon, several hundred more were estimated to have attended this fourth such program staged by the county organization.

Self-conducted tours of the dairy barn and the 65-head Holstein herd it houses were offered, along with an information sheet describing the Stahl operation and answering the question, "What is a family farm?" The milk house was open for inspection, machinery was on display and tractor-pulled hay wagons took visitors on rides around the property.

The Stahls mark the sixth generation on the 380-acre homestead. They rent an additional 150 acres and raise haylage, high moisture corn, corn silage and hay. The pipeline milking system delivers the production to a 1,000-gallon cooling tank.

Helping the Stahls work their farm are son David, a Penn State University dairy production graduate; daughter Sandy, who also works off the farm; son Tim, a junior at Somerset Area High School, and daughter Vicki, an eighth grader at the same school.

Family and other organization representatives around the farm said most of the questions Sunday came from youngsters wanting to know what cows ate, why they didn't have horns, why they had such large udders, and how the milking system worked.

George Stahl, asked about the future of the family farm, said, "It's the backbone of America. It's going to get bigger. It'll be a different kind of operation."

Just as he is not farming as he did 20 years ago, Stahl predicted that advanced technology, better cows and improved production will change the family dairy farm of the future. Advances already in these three areas, Stahl added, have enabled his family to remain in the business since, he said, "milk is selling at 1979 prices while we're buying at 1987 prices. Modern technology has helped us get better production."

Visitors to the farm, in addition to feasting on ice cream, were offered milk punch, Real Seal magnets, milk stickers and balloons.

Mel and Cathy Spory of Boswell coordinated the event.

A cab enclosed tractor drew youngsters and adults alike to its seat during the Somerset County Farmers' Association "Afternoon at the Farm." Visitors also could sit in a self-propelled combine, take a ride around the George Stahl farm on a hay wagon, and tour the dairy barn and milkhouse.

When the 25-foot banana boat was emptied, members of the Somerset County Farmers' Association dipped up ice cream cones for visitors at their "Afternoon at the Farm" on the George Stahl dairy farm.

The Milk Check

TOM JURCHAK
County Agent

It Begins In The Barn

June Dairy Month speeches, articles, promotions and displays go heavily on consumer information to hopefully increase the consumption of dairy products but sometimes I feel that we neglect including some appreciation of the dairy cow — where it all starts — or the dairy farmer who makes it start.

Because she has been with us so long it's easy to take the cow for granted but after all these years she is still the most efficient converter or feed into food with enough left over when she goes to provide 18 percent of our beef and make some shoes, jackets, fertilizer, glue, furniture, ornaments, drugs and even more feed for other animals. But the milk she produces is still her greatest claim to fame. Not only because it's "natures most nearly perfect food" but because she does it so well that after all these years we still don't know if there are any limits to her production.

Even a "run of the barn" cow can produce 10 times her own weight in milk each year and do it on roughages no human could digest. Out of this annual milk production comes protein equal to the trimmed cuts of eight steers. Enough to supply protein for one person for nine years; enough calcium for 30 years; enough phosphorus for 25 years and enough energy for five years.

No other animal or bird or any man made machine or plant is more efficient in food production. In fact, with all the technology and sophisticated equipment that allows us to send men on interplanetary trips, we still haven't figured out how to make a glass of milk. And there's the dairy cow, lying in the pasture, chewing her cud and making a quart of milk every hour, 24 hours a day and never knowing that she's the only one in the world that can do it.

However, she's not alone. It takes 740,000 of her kind to produce the river of milk (4.6 billion quarts) that flows each year from Pennsylvania farms and brings $3.5 million a day back to Pennsylvania farmers. Which brings us around to another "taken for granted" part of our June Dairy Month observance — the farmer.

On 14,000 dairy farms in Pennsylvania those 740,000 cows have to be milked twice a day, 365 times a year, in addition to the feeding, watering, nursing, breeding and cleaning that they need. All this adds up to large capital investments in land, buildings and machinery that farmers risk without getting the returns expected in other businesses. So, if you're celebrating June Dairy Month try some of the many delicious and nutritious dairy products but also drink a toast to the dairy cow and another for yourself—the dairy farmers—where it all starts.

Not Without Cost

While that's the June Dairy Month story we tell publicly we know privately that the industry, like any other, is not without its problems. All of that production and efficiency has not come without some cost to the producer. Even beyond his investments in new technology to stay on the cutting edge of maintaining profits, he also pays out cash each month in an effort to stay competitive in the market.

Our supply and demand problems that keep prices down have been approached from both sides. Mandatory price support cuts and assessments along with voluntary diversion programs have been used with some effect to reduce the supply side Mandatory assessments for advertising and promotion have been even more effective for increasing demand.

On The Supply Side

The Dairy Termination Program and the Milk Diversion Program demonstrated to producers the effect of supply on prices giving you a record high Minnesota-Wisconsin Price of $12.72 and more recently an increase in the M-W of 82 cents over the previous year. These were voluntary programs paid for largely out of milk check assessments to show you what could be done and help you get started in the right direction. Never meant to be a permanent solution, their success will depend on the lessons learned and the response of producers to support price cuts scheduled for the future if supplies continue to increase nationally.

With record low numbers of cows and record high production last year, it's no exaggeration to say that we don't know the limits of milk production per cow. However, we did learn something from the voluntary diversion programs about how many cows have to be removed, for how long, to get the effect you hope for on the milk price. Maybe we didn't get it exactly right this time but we didn't do too bad and we can do better if you want to try it again.

What we did learn is that the effect on supply from price support cuts and/or voluntary diversion programs is not the same all over the country. There are serious regional differences that create marketing problems or opportunities that have to be handled by producers and dealers in that

Bellefonte FFA Chapter Holds Annual Banquet

Members of the Bellefonte FFA chapter were recently honored during the group's annual banquet.

The new greenhands are David Houser, Robert Nichols and Greg Emel; Eric Smith is star greenhand.

Chapter farmer pins were presented to Matt Harter and Adam Fleisher. Todd Woomer received the star chapter farmer plaque.

Wayne Fravel, Dave Ault, Don Irvin and Todd Woomer all received pins for keeping outstanding ag production record books.

Scholarship awards were presented to Don Irvin and Eric Smith. Dave Ault, Don Irvin and Wayne Fravel all received awards for leadership.

The corn award presented by Mr. and Mrs. Joe Hartle went to Todd Woomer. Greg Emel won the hard-working freshman mechanic award presented by Mim Kustanbauder.

Eric Smith and Dave Ault received farm management awards and Don Irvin won the agriculture sales award. Wayne Fravel received the agri-businessman award. The Keystone Farmer award went to Kevin Martz.

Beef production awards were presented to Don Irvin and Wayne Fravel. Todd Woomer earned the swine production award and Matt Harter, the dairy production award.

Awards for public speaking were given to members of the demonstration team and Eric Smith. Team members are Don Irvin, Wayne Fravel and Fern Lucas. Eric won the award in the creed contest.

The soil judging award, donated by Mike Musser, went to Dave Ault, while Dave Houser earned the sheep judging pin. Beef pins were presented to Steve Corl, Matt Harter and Wayne Fravel, who also won the swine judging contest.

Don Irvin received a certificate from Way's Fruit Farm of Stormstown for selling the most fruit.

Honorary chapter memberships were presented to Donald Fravel, Mr. and Mrs. Paul Hartle and Charles Vonada Sr.

Water Shortages Predicted For Much Of West

WASHINGTON – Much of the West will suffer from water shortages this summer because of unusually low snowpack and precipitation this winter, according to the U.S. Department of Agriculture.

"The drought is extremely serious in Idaho and Montana," said Wilson Scaling, chief of USDA's Soil Conservation Service. "In those areas the snowpack has never been as low as it is now." Most of the region is affected except Arizona, New Mexico and southern Colorado where precipitation has been adequate.

Scaling said that management of irrigation water will become very critical. Farmers who rely on reservoirs for irrigation will have much less than usual water to use. Management will be even more critical for those who rely on streamflow and who do not have storage. "The folks who will be able to deal with these conditions are those who have managed their reservoirs well," Scaling said.

The western water supply forecast is based on the latest snow surveys and analyses of precipitation data by SCS and the U.S. Department of Commerce's National Weather Service.

The western states depend on snowmelt for about 75 percent of their water supply. Seasonal runoff forecasts are based on the assumption that the weather will be normal until summer. SCS data collected shows that so far the spring has failed to produce the precipitation needed to bring relief, Scaling said.

The Milk Check

(Continued from Page C3)

region. In most regions the producers are sufficiently organized into cooperatives to work with handlers to capitalize on the situation but not so here in the northeast. Here we have to take what the price support program and Federal Milk Marketing Orders provide in the way of minimum prices without any negotiating for prices that reflect the local situation. Here again we can learn from our past experiences and make an effort to do better in the future.

On The Demand Side

The increase in commercial dairy sales in the last three years has been the talk of the food industry. You paid for the advertising and promotion program that produced a 10 percent increase in dairy product consumption. The mandatory assessment starting in May 1984 tripled the money paid by producers for promotion. However, you also paid for keeping product costs down so dairy was competitive with other foods in retail markets. The increase of 10 percent in consumption may not sound like much but look at it this way. If you had produced as much milk in 1986 as you did in 1981, and if the commercial sales of dairy products were the same as last year, there would have been a milk shortage.

Order 2 Situation

Supplies in Order 2 fell 4.6 percent below May of a year ago indicating that locally or regionally we're still well below the national average in production custs. The Uniform Price for May was $11.30, just five cents better than last year.

However, your milk check will show much more improvement than that because a year ago in April and May you were paying assessments of 52 cents for the Dairy Termination Program and Gramm-Rudman. This year it's only 25 cents so that should provide a 27 cent increase plus the five cents for a total of 32 cents. It sounds better that way. However, supplies are still tight in the northeast with many dealers increasing cream and butter inventories for the ice cream season.

Chicago butter prices suddenly jumped over four cents a pound the first week of June and there's more to come. Prices have not yet bottomed out for the season but milk supplies should have peaked so the future will look a little better than the past.

AGRIPRO™ SOYBEANS
NUMBER ONE IN RESEARCH

AP-350
Tests prove it outyields Williams and Mitchell.
- Group IV maturity pureline soybean variety.
- Bred to outyield varieties such as Williams 82, Union and Mitchell.
- Excellent field resistance to Phytophthora root rot.
- Good iron chlorosis resistance.
- Excellent shattering resistance.

HP-2530
HP-2530 is an outstanding mid Group II variety with exceptional yield capability. Very good emergence and standability. Good field resistance to Phytophthora. Good narrow row adaptability Three days earlier than Beeson 80.

AP 4321
A short bean that's long on yield.
AP 4321 matures about 3 days later than Williams 82, and about 1 day later than AP 350 It has excellent stalk strength, and good narrow root adaptation. It shows good field resistance to Phytophthora root rot and very good resistance to shattering.

AP 3023
AP 3023 is an early Group III variety. For maximum yield and stress tolerance, it's hard to top AP 3023. High resistance to Phytophthora root rot. AP 3023 has very good resistance to shattering, protecting your yield when harvest is slightly delayed.

AP 3132
New for 1987!
Big Yielder.
AP 3132 is an early Group III variety, with its ability to produce high yields making it an excellent choice. AP 3132 tied for 4th place in the 1986 soybean variety trials conducted by Penn State University at Landisville Research Farm.

LET'S TALK RESULTS...

A Lancaster Co. subscriber ran an ad for his truck.

"Talk about coverage... A man from Massachusetts saw my ad, flew down here, bought my truck & drove it back home! Thank You - Lancaster Farming!"

"My son Brian and Lancaster Farming are my two best salesmen!"

Said Paul Stitzel of Stitzel Farm Equipment, Inc., Hamburg, PA who runs an ad every week.

"You have a good circulation. We reach people as far as New England!"

Both Paul and Brian like the format of Lancaster Farming. Example: Sales in Sec D, Classifieds in Sec. B & C, Markets in A, etc.

"PLEASE CANCEL OUR AD!"

D. Jones of Jones Implement Company, Cambridge, MD ran this ad once.

> For Sale
> Used Swartz truck body. Roll back 26' headboard, hydraulic tail gate, winch Price $4,500 00 good shape
> Jones Implement Co.
> Cambridge, MD
> 301-228-XXXX

"We sold it after numerous responses generated by our ad in your paper."

He immediately placed another ad for combines.

"SOLD TO BUYER FROM WALTON, N.Y.!"

J. Reiff of Ephrata, PA placed this ad in the classifieds

> '82 Chevy Silverado Suburban, 6.2 diesel, automatic, dual air, excellent condition. 717-733-XXXX.

"I like Lancaster Farming because it reaches different states, (NJ, MD, NY) etc!"

Leigh

Ann

We are your Classified Ad-Visors.
Call us today at
717-394-3047
or 717-626-1164
We'll help you word a classified ad that will bring you results too!

Paul Brenneman, Lititz, PA ran a 2x2 display ad in the classifieds and here's what he enthusiastically had to say!

"This year we sold ½ million cauliflower, broccoli & cabbage plants from our ad in Lancaster Farming. They went to MD, DE, NY, NJ & PA. We can't wait to put an ad in Lancaster Farming next year! Last week someone called from our Lancaster Farming ad for 100,000 broccoli plants and we were out of them!"

"We Sell A Lot of Equipment!"

Said Edwin, Jr. of Horning's Farm Machinery, Ephrata, PA who runs an ad every week.

"We are well satisfied. Lancaster Farming is a real good paper to advertise equipment"

"It's Just Amazing Where Your Paper Goes!"

Said Adin Frey of Frey's Dairy, Chambersburg, PA who ran an ad for irrigation equipment.

"We received calls from Buffalo, N.Y., West Virginia & Connecticut We were quite pleased!"

"FANTASTIC RESULTS!"

That's what Dennis Miller of Dennis M. Miller Equipment Sales, Grantville, PA said when asked why he advertises in the Lancaster Farming Classified Ads.

"You have a well rounded paper that reaches so many people. I've met a lot of good people. Good rates - fantastic results."

Karen

Kim

"THIS TRACTOR SOLD AFTER 1st WEEK!"

L. Martin of Shippensburg placed this ad in the classifieds.

> JD 2840 w/hi-low, very nice. $7,200 717-532-XXXX.

He cancelled his ad after just one insertion.

"I have always had good results with Lancaster Farming"

ANOTHER SATISFIED CUSTOMER!!

Herr & Leaman, Used Farm Equipment Sales & Service, New Providence, PA runs a display ad every week.

They enjoy the convenience of being called every week for their updated list of inventory.

With over 44,000 subscribers, the coverage Lancaster Farming gives is the reason they sell equipment from upstate Pennsylvania to down in Maryland & Delaware!

"PLEASE CANCEL OUR AD!"

Roy & Glen Henry of Port Royal, PA ran an ad for four bulls.

"The ad came out on Saturday & by Monday they were all sold! We very much appreciate your help!"

"I MUST HAVE HAD 500 CALLS FROM THIS AD!"

Said H. Lawson of Greencastle, Pa. when he called to cancel his ad. He sold his farm.

He also cancelled his ad for his dairy herd.

"My Holstein Dairy Herd sold the first week of advertising - the ad worked great - thanks!"

...it works

The Bull-etin Board

Taurus Classifies Bull

MEHOOPANY, PA – The management of Taurus Service, Inc. announces the results of its spring classification. Veteran classifier, William Weller scored 22 individuals at the Mehoopany stud facility. There were 6 Excellents, 10 Very Good, 5 Good Plus and 1 Good at the close of the days scoring.

Poverty Hollow Valiant Star, Valiant's highest proven, red carrier son, classified 91 points. 76H0230, Valiant Star is the #2 TPI red carrier Sire and second only to "Enhancer" in total fat and protein pounds for red or red carrier Sires.

Highest among the six excellent sires scored at Taurus was 76H0032 Skagvale Chief SEATTLE, EX-94. Weller considered the Valiant son of "Bold Gay" to be one of the best bulls he had ever scored, with the potential to go higher.

The deep, well balanced 76H0040, Hanover-Hill Impact, "Sheik" son of "Telstar Barb", scored EX-91. Taurus is looking forward to his first proof in July

IMPACT's maternal brother by "Tempo" continues to improve with age, 76H0054, Hanover-Hill TRADE-MARK classified GP-83.

Other Excellents include 76H1253 MESSIAH, EX-92, 76H0222 HERMAN and 76H0157 ELVIS, both EX-90. Classifier Weller described this group of individuals as well balanced with stature, depth and the kind of feet and legs that make them easy to score Excellent.

76H0221, Comin-On Holsteins CHIEF, the current leading milk Sire in the United States, classified VG-85 and was described as a strong bull with good feet and legs. The "Sir Christopher" son of the fabulous "Charity", 76H0048 Hanover-Hill CHAPLAIN, was raised from GP to VG-87 and should go higher according to the classifier. Scoring VG-87 and expecting his first proof in July, 76H1248,TUB-TUCKER is a "Bell" son with a good body and stature

In all, it was an exceptional day for the Taurus line-up of Sires. Ten of the nineteen previously scored bulls were raised and three bulls received their first classification, scoring Good Plus

Hosts Needed For YFU Exchange Students

Youth For Understanding International Exchange is seeking local families to host Scandinavian, French, Spanish, Swiss, Dutch, German and Japanese boys and girls, 15-18 years of age, coming to the area for the upcoming high school year.

YFU stresses family living as the heart of the learning experience, offering students the chance to experience other cultures through personal involvement in the homes, schools and communities of their host country. For U.S. families, the program offers an opportunity to host an international student and to watch that student, as well as their entire family, grow in understanding and sensitivity to another culture. The exchange students live with their host family for 11 months, August through July. The basic goals of the YFU program are family life exchange and school life experience. The major goal is to promote "world peace".

Persons interested in learning more about the fun, fulfillment and joys of hosting a YFU student are invited to call toll-free 1-800-USA-0200 for information and the name of their local YFU representative.

Simple Design.....Easy Operation

If you're looking for extra-easy operation, the Gehl Models 1310 and 1710 fixed chamber round balers can't be beat No other balers are as easy to operate The pickup feeds material directly into the baling chamber, so these balers easily handle all crops and conditions Incoming material gently tumbles inside the chamber, gradually forming the bale The operator simply keeps an eye on the pressure gauge, when it reaches the factory recommended psi the bale is complete Stop by your Gehl dealer today for more information on these easy-to-operate balers from Gehl

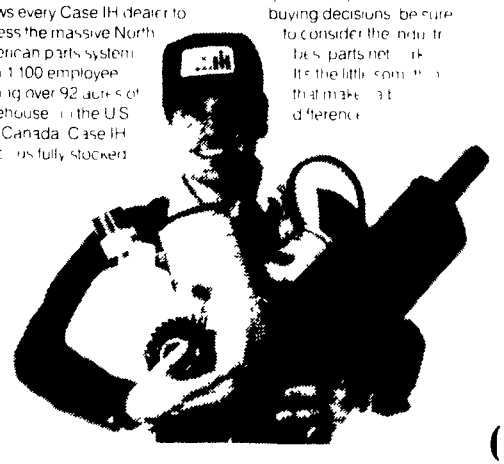
INTERNATIONAL HARVESTER PARTS
J.I. CASE PARTS
CASE IH PARTS

Global Parts Network Puts A World Of Parts At Our Fingertips.

Case IH adds a little something to every tractor we sell: the most sophisticated parts system in the industry.

The Global Parts Network allows every Case IH dealer to access the massive North American parts system. With 1,100 employees stocking over 92 acres of warehouse in the U.S. and Canada, Case IH keeps us fully stocked.

The network features nearly 400,000 different parts to provide service for Case International and Case IH equipment. So when you make your tractor buying decisions, be sure to consider the industry's parts network. It's the little something that makes all the difference.



Call Binkley & Hurst Bros. For Your Parts Needs. We Can Put You In Touch With Millions Of Parts Through Our Computerized Inventory. CALL NOW For Your Parts

DICKEY-john GjGMT Grain Moisture Tester

The DICKEY-john Grain Moisture Tester measures moisture content automatically. You don't have to preweigh the sample. There are no meters to read, no dials to set, and no thermometers to lose. As soon as you pour in the grain sample, the testing sequence begins. A digital readout is displayed when the proper weight of the sample has entered the test chamber. The readout is corrected for temperature at the touch of a pressure sensitive switch. Models are available with direct readouts for corn, soybeans, or wheat, and adhesive conversion charts are provided for other grains.

Check With Us For The Bale Chopper You Need For Commercial And Agricultural Uses

The Mulching Solution

GOOSSEN'S BALE CHOPPER

The Solution For Fast, Economical Mulching And Composting

MULCH WHERE YOU WANT IT.
With the Goossen Bale Chopper you can blow mulch evenly over large areas with the 180° rotating directional blower. Or use the 30', 6" diameter flexible hose attachment to mulch hard to reach areas. The hose can be hand held or mounted with the optional hose holder.

- **Mobile Mulching**
- **Mulch In Seconds**
- **Multi-Use Mulcher**

Nursery
The Bale Chopper chops then blows straw around trees, bushes, on bedding areas or any place where you need mulch. Apply mulch with the 30' flexible hose; hand held as shown at right.

Berry Farming
The Bale Chopper is ideal for mulching strawberries or any row crop.

Residential & Commercial Landscaping
The Bale Chopper evenly applies straw over large areas, and is easy to use around trees, behind bushes, or in any hard to reach spot. And it takes the Bale Chopper less than a minute to thoroughly shred and distribute an entire bale, so even large mulching jobs are completed quickly.

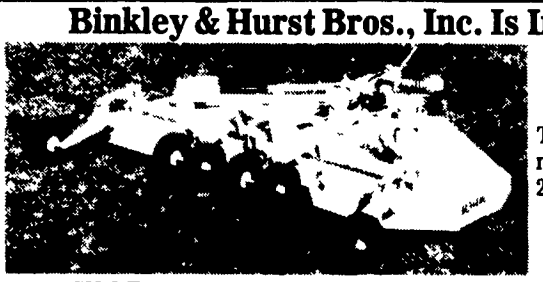
Binkley & Hurst Bros., Inc. Is Introducing The EAGLE Line Of FLEX WING MOWERS By Mohawk



These are heavy-duty, multi-purpose rotary mowers with cutting widths of 10', 13'6", 15' and 20'. Innovative features include:

PRINCIPLE:

- Knuckle system automatically retracts wing support wheels to achieve a maximum 8' width for road transport
- Massive 4½" axle has spring suspension system for maximum reliability
- All wheel supports are individually adjustable to accurately level machine for smoother cut
- One cylinder controls all three section heights
- Self-leveling rods between tongue and axle keep machine level while raising or lowering cutting height
- Ready access to working components allows easy cleaning and servicing

STANDARD:

- Slip clutches are on all three gearboxes to insure maximum protection
- Smooth top deck has most framework bracing on underside — no water traps
- Multi-use including roadways, waterways, pastures, row crops
- High visibility paint
- Spring shock absorbers on all four rear wheels and axles assure long life of machine
- Transport bar also acts as depth control for accurate adjustment for various cutting height

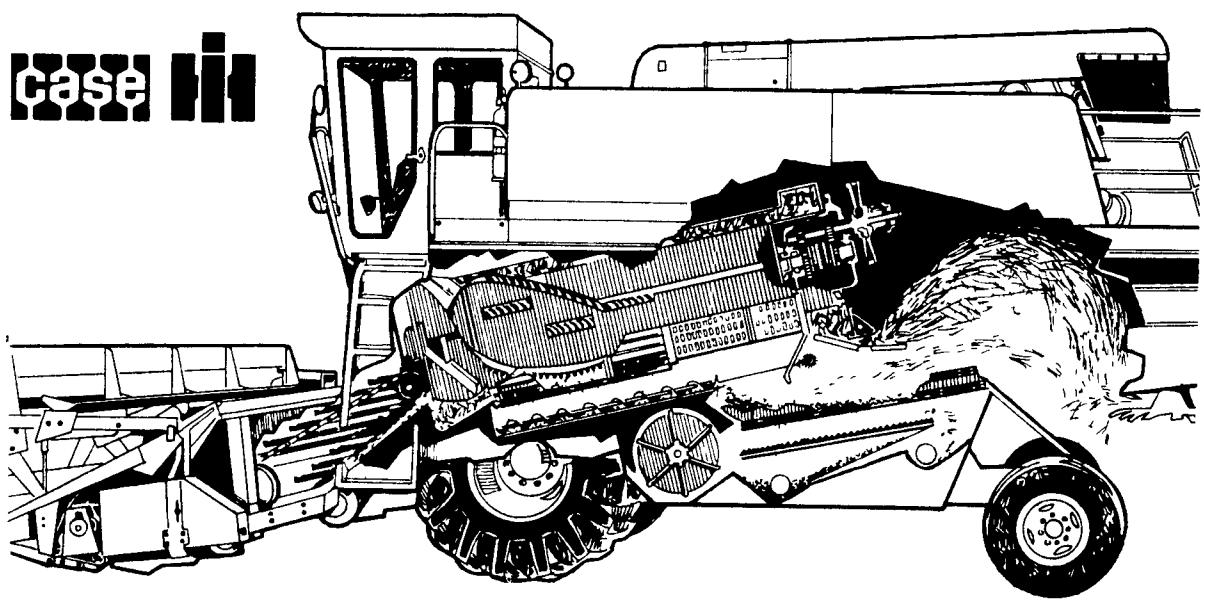
The Secrets To Case International Axial-Flow Combine Success In The East...

FEWER MOVING PARTS...

HIGHER QUALITY GRAIN...

ALL CROP VERSATILITY...



The one moving part in Axial-Flow's entire threshing/separating process is the single large-diameter rotor. Nothing more. No cylinder, beaters or straw walkers. There's far less that can break or need maintenance. That's Axial-Flow combine simplicity.

Axial-Flow helps bring top price at the elevator. It handles grain more gently. Less crackage and dockage. You'll combine higher moisture grain at faster ground speeds for a quicker harvest. That's Axial-Flow performance.

Axial-Flow Combines for every crop. Designed to harvest over 100 different crops including corn, soybeans, wheat, sorghum and others. All popular grain header sizes plus 4 to 8-row corn heads.

HOOBER COMBINE SERVICE...

HOOBER COMBINE SERVICE SPECIALISTS KNOW COMBINES.

For nine years Hoober's 3 combine mechanics have been working with Axial-Flow technologies. A COMBINE BOUGHT FROM HOOBER IS BACKED BY PEOPLE WHO KNOW AND CARE.

NO. 1 DAIRYING DIESEL

2 Cyl F2L-912

KHD DEUTZ

Since 1968 F2L-912 diesels have earned the reputation as the most reliable diesel Don't settle for less

EASIER STARTING: Heavy flywheel provides easy starting. No electric heater plugs.

QUIETER: Runs quieter than most water cooled diesels. Very quiet exhaust.

Continuous Duty Rating:
26.5 HP @ 1800 RPM

Fewer repair parts than comparable three-cylinder diesels - cheaper to overhaul

It has direct injection, lube oil cooling, and oil cooled pistons. This engine has proven to survive the extreme heat of a heavy load in a small engine house better than any other engine.

PLUS-FAMOUS DEUTZ FUEL ECONOMY

BERTHOUD-Agrotec

MODEL C-400 "CANNON"

Versatile Sprayer For Many Different Applications Of Insecticides And Fungicides!

Aerodynamic Design Of The "Cannon" Head Delivers

MORE AIR!

39" fan produces 280 MPH air speed. Allows you to cover 100-130 feet which means fewer trips thru the fields, fewer drive roads and more crop per acre. This design gives a well-defined, easily controlled mist, yet small cannon covers crop close to tractor.

MORE PENETRATION!

High air velocity produces a finer mist which penetrates short dense growth or tall crops such as sweet corn. Also allows smaller volumes of water with excellent coverage and fewer trips to the water tank.

5 MODELS IN STOCK...

Ready To Meet Your Spraying Needs!!

Several Good Used Trades Available...

TORQUE AMPLIFIERS & CLUTCHES

BEST VALUE? You Decide!

Over the past 5 years, we have sold thousands of T.A.'s to satisfied customers in 25 states across the U.S. Some of our best customers are I.H. Dealers.

Our prices on T.A.'s with the Dana Sprag, is still $595.00 with a 2 year warranty.

We also have units and parts available to rebuild old style T.A.'s, including Ramp & carrier sets for $300.00

Clutches, Pressure Plates PTO Drives & Water Pumps

We have clutches available for most all IH tractors; including many heavier than original. We also have clutches for many other brands.

- Compare Our Prices -

All clutches & T.A.'s will ship U.P.S. and are sold on an exchange basis. Core charges Apply.

QUALITY USED PARTS

We are continually increasing our inventory of late model tractor parts. We have a good selection of quality used parts at competitive prices. If we don't have it, we will try to locate it for you. Please have part no. when calling, if possible.

NEW INVENTORY

Wide front end for Most IH Tractors
(New) L.H. & R.H. Double steps for IH tractors

We have in stock many new replacement or remanufactured parts and will feature them over the next couple of months.

NEW & REBUILT PARTS

for your IH wide-front

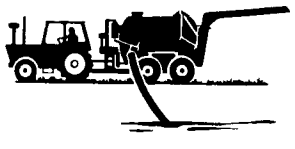
THE 2900
SLURRY BUGGY

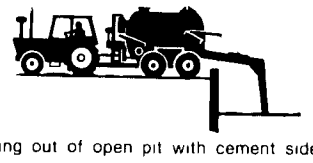
HAUL LIQUID MANURE ALL DAY WITHOUT GETTING OFF THE TRACTOR SEAT USING THE SLURRY BUGGY EASY LOADER.

THE SLURRY BUGGY IS DESIGNED FOR YOUR MANY LIQUID MANURE HANDLING JOBS.

Loading out of pit with ground bank

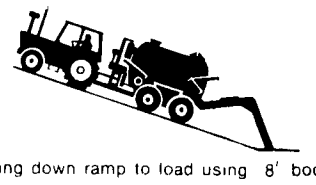


Using 6" side valve and hose for pumping out open pits or under building



Loading out of open pit with cement sides

Using top hydraulic manhole for loading with pump (optional)



Backing down ramp to load using 8' boom

Unloading with your pick of three different spreading patterns or spring loaded injection

We Have Spreaders To Rent - 1500 & 2900 Gallon

FOR FREE LITERATURE CALL OR WRITE

SLURRY BUGGY EQUIPMENT COMPANY
148 WEST METZLER ROAD, RD#2,
EPHRATA, LANCASTER COUNTY, PA 17522
PHONE (717) 859-3869

THE SLURRY MIXER
is built to handle your liquid manure agitating problems.

This 3 point hitch Slurry Mixer's large 22" propellor produces a strong undercurrent that moves liquids, floating chunks of crust, weeds, bedding and dried manure into the propellor that chops, mixes and blends your manure into an even liquid Slurry.

Priced at $2,285

Solid Ways To Improve Your Farm

Consider The Many Advantages Of Concrete

CONVENTIONAL SILOS

Since forage quality is so important to today's dairy farmers, it is very important to consider factors that might improve that quality.

Many farmers are finding that an upright silo is a good investment because of increased feed value of haylage. Samples of wilted hay from University forage analysis programs are running about 4 percentage points higher in crude protein than the average hay sample.

Are you having trouble making hay in this damp rainy weather? Think about your 2nd cutting. Maybe we will still have time to get a silo erected so that you can store your feed properly & with less loss due to weather.

There is no better upright silo than a poured Sollenberger Silo! The strong, smooth walls reflect heat so that your forage protein doesn't suffer from heat damage.

You will appreciate the quality of a Sollenberger Silo, and "your cows will just love you" because of the high quality feed.

A Sollenberger Silo keeps feed good, and unloads easily, at the 50%-58% moisture level.

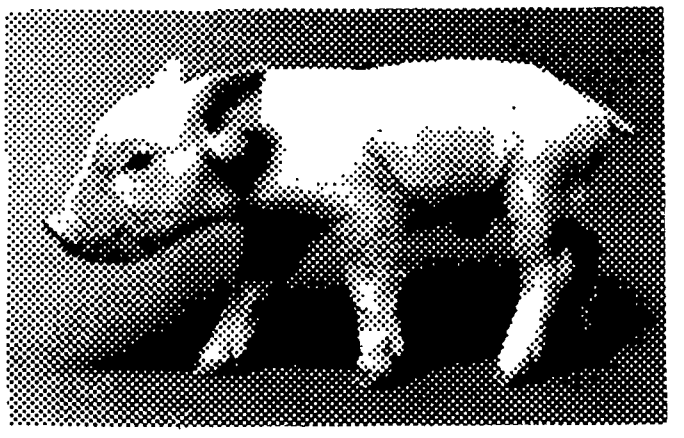
RUNT HUNT



WANTED:

Your Worthless Runts!

Do you... Have runts? Wean early? Have orphaned pigs? We're aiming to hunt down profit-robbing runts and turn 'em into good-doing hogs with new CRATE-MATE, "The Sow Replacer."

CRATE-MATE is scientifically blended to promote fast growth by actually helping the baby pig use the nutrients in the ration more efficiently. Try it for your runts and early weaned pigs. You'll see bigger, healthier pigs in your nursery faster. So you can increase production per sow unit for greater profit opportunities.

REWARD!

Just $3.50 worth of CRATE-MATE can turn an otherwise worthless runt into a real pig! That's not much to invest to increase the profitability of your business. So if you're in pursuit of bigger profits, join the hunt, and declare open season on scrawny runts with CRATE-MATE.

Shepherd's Crook Farm Aims To Grow With Industry

BY GINGER SECRIST MYERS
Adams County Correspondent

MECHANICSBURG — Pulling in off Lisburn Road, your first clue that you are approaching a sheep operation is that the driveway is bordered on both sides by high tensil fencing. Next a large, spacious steel building comes into view. And then there's the sheep; Columbias, Dorsets, and Rambouillets. Each in their own meticulously managed turn-out lots. You have arrived at Shepherd's Crook Farm, owned and operated by Bob and Suzie Leib and their six-year-old son Bill George. This is the home of the likes of BG Leib 22, the champion Rambouillet Ewe at last year's New York State Fair, the Eastern National Livestock Show, and the 1987 PA Farm Show.

Bob and Suzie describe their operation as diverse. However, it is also intensely concentrated on one topic — the business of breeding, marketing, and managing sheep. The Leibs show for both themselves and contract show for other breeders through the national level, they provide private fitting clinics at their farm or on location to both adult and youth audiences, they handle a complete line of Vigortone products and operate a retail business selling sheep supplies, they act as purchasing agents, service a large freezer market, sell breeding stock to both purebred and commercial producers and have added the title of "Flock Consultants" as their latest enterprise.

Suzie Leib has 20 years of experience in the business, starting as a youth in Maryland. Her marriage to Bob in 1979 combined his expertise in the livestock business with her shepherding talents. He was raised on a farming operation that also raised beef cattle. He now works full-time as a vo-ag instructor at the Cumberland Valley High School. Suzie works as a nurse part-time in the critical care unit at the Westminster Hospital, Westminster, MD.

The Leibs have cultivated three top-notch flocks with 15 select ewes in each; Columbias, Dorsets, and Rambouillets. The Rambouillets all belong to Bill George. Suzie explained that she always wanted to manage that breed but they were in scarce supply in the East. With the growing popularity and demand for lamb in the eastern corridor more Western breeds appeared at the better quality sales.

His parents bought Bill George his first sheep, a Rambouillet, before he was born. Bob stressed, "Those are his sheep (the Rambouillets) and he works with them. If, as he gets older he wants to pursue other interests, fine. But for now, he seems to like helping to feed, trim their feet, and is getting to be a pretty good fitter."

Limiting their flocks to 15 purebred ewes each, the Leibs are constantly marketing breeding stock and freezer lambs. This has proven to be no problem. They credit their showring successes, advertising, and word-of-mouth recommendations for their lengthy buyers list. Seventy-five percent of their sales are to repeat customers.

This past year they averaged a 163 percent lamb crop on all three breeds. According to their records, 90 percent of the ewe lambs were sold as breeding stock and 10 percent of the ram lambs were also sold for breeding. The Leibs are emphatic about the quality of the sheep that leave Shepherd's Crook. States Bob, "We won't sell anything for breeding stock that we won't keep for ourselves. I would rather sell something for a good price and have a satisfied customer, than sell an inferior animal cheap and make someone mad. That's the worst advertising we can get."

Suzie added, "Too many people think you can pick up sheep cheap at the stockyards. Those sheep are primarily culls . . . People tend to take better care of something they have to pay more for."

The Leibs have always been more than willing to advise their buyers on good management techniques and feeding programs. But as their buyers list has grown, so has the demand for a good source of sheep management information.

The Leibs have all the records on their own flocks computerized and logged on an Apple IIe computer. Pedigrees, worming schedules, feed rations, birth weights, sex, sales, and purchases — Bob puts everything into the computer. Their next logical step then seemed to be to offer this same kind of service to other breeders. Hence came the title of "Flock Consultants."

They offer their service to both purebred and commercial breeders. There is a basic flock fee and a per-head service charge. Explains Bob, "We find we work with a flock a year or two and then they seem to be able to go out on their own. People mainly want a set of directions."

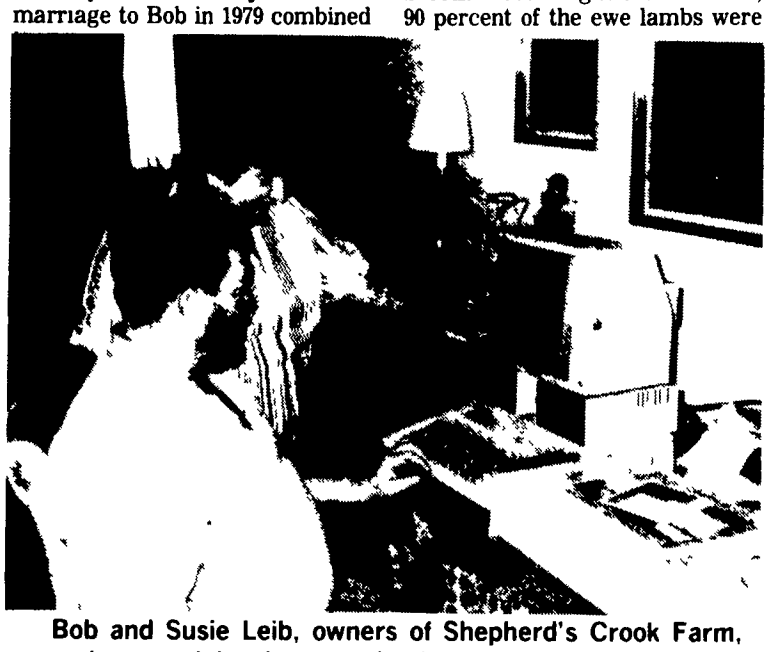
The first thing Bob and Suzie do with their clients is sit them down and discuss the owner's goals. Bob noted, "We ask them where they want to be in the sheep business in five years. Where they want to get to will determine where we can start with them. We also determine how much they want to invest in the enterprise. From this conversation we can work on a management plan that will help them maximize their return on their investment." The service then includes follow-up consultation visits at regular intervals.

Suzie was quick to point out, however that, "No amount of consultation will get the job done if the program is not implemented. The key to successful sheep management, as with any other livestock, is to take the time to do the job when it needs to be done. Don't delay worming, check their feet before the foot rot is so bad you have to ship them."

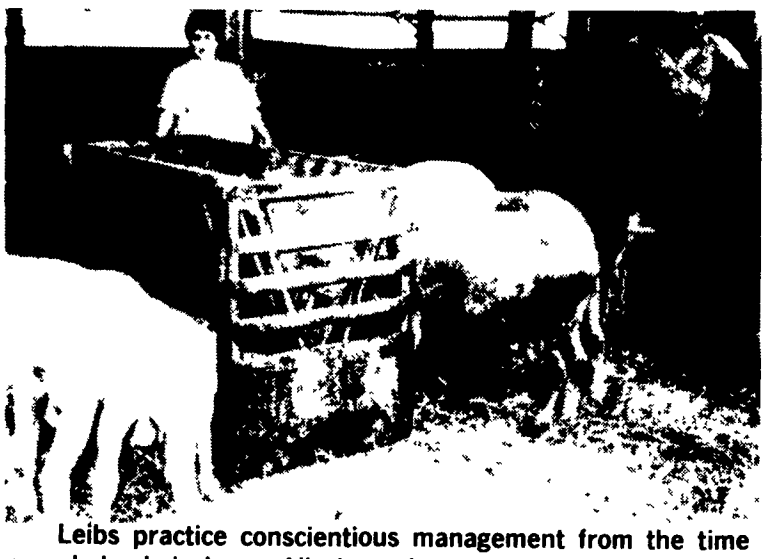
The Leibs practice what they preach with their own flocks. Bob explained, "How well our sheep do in the ring is 90 percent management and 10 percent genetics. In showing, you need every edge you can get." Still, it is the basics that they practice, and Suzie lists their "show secrets" as: providing their sheep with fresh clean water daily, having adequate supplies of salt and minerals available to the sheep at all times and worming on a regular basis.

The Leibs also have a five-year goal for their own operation. Bob would like to see the consultation business grow, as he feels this would be a direct reflection of the growth of the sheep industry. Both Bob and Suzie want to maintain the quality of their flocks and retain a demand for their breeding stock. And, perhaps show less, but attend more of the larger shows and sales. They are quick to add, however, that if Bill George's interest in showing keeps growing as fast as his Rambouilett flock has, they'll be on the tanbark trail for sometime to come.

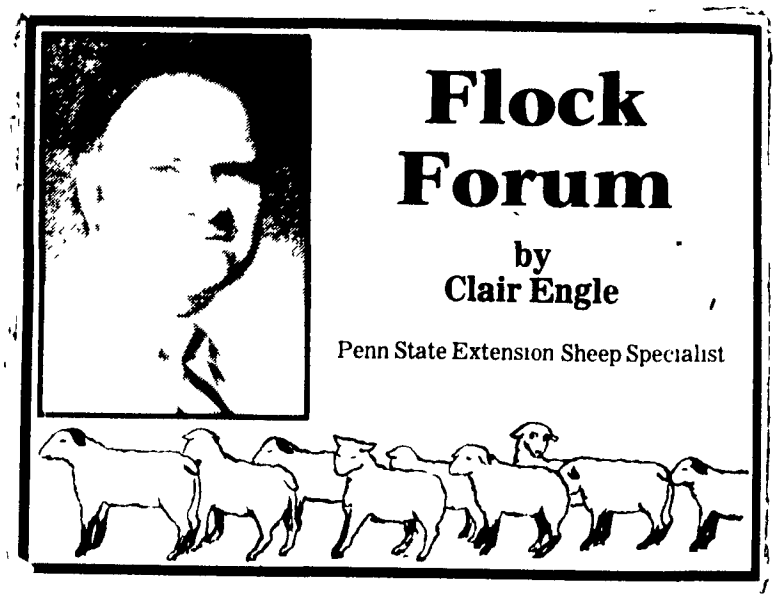
Bill George Leib and mother Susie show one of Bill's best Rambouillet ewes, named champion at the New York State Fair, Eastern National Livestock show and this year's State Farm Show.



Bob and Susie Leib, owners of Shepherd's Crook Farm, examine one of the sheep production programs they designed for a client.



Leibs practice conscientious management from the time each lamb is born. All sheep have access to fresh, clean water, minerals, salt and feed. Regular wormings and foot inspections are part of the regimen.



Selecting And Feeding Replacement Ewes

It is that time of the year to start identifying those potential replacement ewes. Hopefully you are able to select healthy and sound ewe lambs from your own flock. For others it may be best to purchase from a reputable breeder, especially if you have some specific flock improvement objectives in mind.

Structural soundness should be of prime importance in selecting any future breeding stock. This includes feet, legs and mouth. Overall balance in body conformation associated with good body volume and a strong top line should not be sacrificed for that taller, longer, narrow volume ewe.

Sheep are basically forage consuming livestock, thus their feet and legs are important. Animals are expected to move freely and be unhampered by poor legs, weak pasterns or a lame condition. The weak pasterns may be of genetic or nutritional origin. The lameness may be due to overgrown hooves or foot rot. If it is foot rot be cautious since this condition is very contagious.

Check the mouth of sheep. An animal said to be "off" in its mouth cannot graze properly. Sheep have no upper incisor teeth, but have a hard surface known as a dental pad in their place. In the lower jaw you find eight incisor teeth in four pairs. When the mouth is closed the teeth and dental pad should meet evenly. You can check this condition by merely running your thumb or finger between the lips.

If you are shopping give special preference to the producer who will share his or her individual ewe production records. Records are good predictors of future lambing rates for those ewe lambs or yearlings you agree to purchase.

Developing Replacement Ewe Lambs

Most producers realize the importance of good health and proper nutrition in the development of replacement ewe lambs in maintaining a productive flock. But how many give their ewe lambs special attention between the time they were selected as replacements and their first lambing? This is a critical time in the life of a ewe and proper attention to nutrition and management will pay off.

Acceptable growth rates for replacement ewe lambs depend on the breed type and when you want them to lamb for the first time. Some producers prefer to "grow out" ewe lambs and not breed them until they are 18 to 19 months of age. Many purebred breeders fall into this category. The commercial producer sould aim for the first lamb crop to hit ground when the ewe lamb is 12 to 13 months of age. This decision has been shown to be economically sound with no apparent biological reason for concern, providing proper nutrition and management are adhered to during these critical developmental stages.

As a thumb rule, ewe lambs ready to breed should be about two-thirds of their mature weight when exposed to the ram. When weighing your ewe lambs you

(Turn to Page D4)

OUR FREE INVESTMENT PROTECTION PACKAGE LEAVES NOTHING TO CHANCE.

Get $500 worth of filters and fluids free when you buy a new Field Boss 185 tractor.

The new Field Boss® 185 gives you protection against sluggish performance and high fuel bills. And now if you buy a Field Boss 185 tractor, you'll get protection against routine service expenses for a full year with a free supply of fluids and filters.

Come into your White Farm dealer and he'll give you an ECCO certificate that qualifies you for our unique investment protection package Buy a Field Boss 185 and redeem the certificate anytime during 1987. You'll get a year's worth of filters, oils and fluids. That's $500 worth of quality White Farm service products.

Protect America's most efficient tractor. With this free package, you'll be protecting the performance of a tractor that features a new-design Cummins engine that delivers the best fuel economy of any engine in a North American built tractor. ould condition score them also to sure the actual weight is real owth and development rather an over conditioning. Overfat eep, we know, reproductively e unsound sheep.

Feeding Ewe Lambs

Research has shown large-amed ewe lambs that are to be ed to lamb at approximately one ar can be self-fed a 50:50 hay-ain ration from market weight rough lactation, with good sults. If the hay is not high ality legume hay, the ewes will ed some additional protein ring lactation, especially if they e nursing twins. This proportion hay to grain can be altered to eet the needs of the individual breeder. Some may find that two-thirds roughage and one-third grain may work more satisfactorily, particularly if the ewe lambs are not being bred.

The minimum National Research Council requirements for an open ewe lamb weighing 110 pounds and gaining approximately 0.2 pound per day or weighing 132 pounds and gaining approximately 0.1 pound per day are 1.8 pounds total digestible nutrients (TDN) and 0.29 pounds of crude protein. Feeding 2 pounds high quality legume or legume-grass hay and 1 pound of shelled corn will meet the TDN requirements and provide more than adequate protein. If you want your ewe lambs to grow more rapidly than this, increase the amount of feed. The shelled corn could be increased up to 1.5 to 2.0 pounds per head per day or the shelled corn and hay could both be increased by one-half pound per head per day.

Ewe lambs that are to be bred should be managed and fed as a separate unit from the time they reach market weight until they are bred for their second lambing. Again, research has shown that good management and adequate nutrition during pregnancy and lactation are very essential for ewes that will lamb as yearlings. These same studies also revealed that flushing these ewes during their second breeding season is very important. Ewes lambing in May (at 15 months of age) had little trouble nursing their lambs, but when they are turned on pasture in July, after lactation, they did not breed well in September. A short flushing period (14 days) in which one-half pound of corn per day was fed proved to be very beneficial.

Coming Events:

July 10 & 11, PSWGA Keystone Ram & Ewe Show and Sale, PSU, Ag Arena.
July 10 & 11, PSWGA Lamb & Wool Crafts Festival, PSU, Ag Arena.
August 1, PDA Ram Lamb Performance Tested Sale, PSU, Ag Arena.

Oct. 31-Nov. 22, PSWGA Australia/New Zealand Sheep Industry Tour.
December 4-5, PSWGA Second Annual Sheep Symposium, The Embers, Carlisle, Pa.

Survey Shows Most Pork Producers Favor Checkoff

DES MOINES, Iowa — Pork industry leaders are viewing with cautious optimism an independent research study conducted in May that indicates the new national 100 percent legislative checkoff program is generally well accepted by producers. The phone survey of 500 randomly selected pork producers from all over the nation also indicated a national producer referendum on the checkoff, if held now, would be approved.

The survey was conducted by Wiese Research Associates, Inc. of Omaha, NE for the National Pork Producers Council. Producers who took part in the study were selected by geographic area and size of hog operation to represent current industry statistics. The names of producers selected to participate in the survey were obtained from a data bank independent of NPPC. The results indicated that 65 percent of producers taking part in the study are presently supportive of the national checkoff, while 18 percent say they are opposed. Another 18 percent say they just don't know enough about the checkoff to determine whether they favor it at this point.

Some 69 percent of producers taking part in the study would vote for continuance of the national checkoff if a referendum were held today. Another 26 percent of the producers surveyed said they would vote against it, and five percent said they haven't yet made up their mind whether to vote for continuing the checkoff when the referendum is held.

Under the federal law that established the national checkoff, which went into effect Nov. 1, 1986, a producer referendum must be held late next year or in early 1989 to determine whether the checkoff should continue. No firm referendum date has been set. A simple majority of those voting in the referendum would be required for continuance of the national checkoff.

Tom Wiese, president of the research company that conducted the producer attitude study, noted that at the time it was conducted in early May, hogs were selling at $55-plus per hundredweight, and that may have distorted the result to some degree.

Salmonella Issue Victim Of 'Media Hype', Says Cornell Scientist

ITHACA, N.Y. — The most common source of food poisoning from salmonella-contaminated chicken is mishandling and improper cooking by consumers and food service workers, according to a Cornell University food scientist, who took issue with a recent government report criticizing the poultry industry.

The normal level of salmonella bacteria in poultry is not high enough to cause any widespread food poisoning, Joe M. Regenstein, an associate professor of food science in the New York State College of Agriculture and Life Sciences at Cornell, testified in Washington on June 2.

Regenstein appeared before the House Agriculture Committee's Subcommittee on Livestock, Dairy and Poultry. The hearing was prompted by a report from the National Research Council on "Poultry Inspection, the Basis for a Risk-Assessment Approach," which was made public on May 12.

In its report, the NRC said that current inspections of poultry fail to protect the public from chemical contamination or from microorganisms that cause food poisoning and recommended a more intensive sampling of chickens and monitoring of feed and water

Commenting on the NRC report's estimation that as much as 37 percent of the chickens are contaminated with salmonella bacteria, Regenstein said such a finding is not unusual if the chicken carcasses are subjected to highly sensitive laboratory tests. But the number of salmonella detectable in each chicken with such tests will not be high enough to pose a general health hazard, he said.

He added that the percentage of chickens contaminated with salmonella after processing has not changed significantly for many years. Salmonella originates in the digestive tract and fecal material; victims of salmonella poisoning can get stomach aches, diarrhea or both.

"Thus, problems with salmonella — and probably campylobacter (another organism regarded as a potential health hazard) — only occur when the product is mishandled before cooking," he said.

"The popular press' recent emphasis on the salmonella problem seems to be a bit of media hype," Regenstein asserted. "In fact, it is not based on the discovery of any new information or any increase in the number of food-poisoning cases. The sensationalism may reflect a failure to educate consumers about how to handle meat and poultry safely."

The Cornell scientist said that incorrect handling of chickens by consumers and food service workers could "lead to a greater number of cases of sickness. You don't put milk on the kitchen counter for hours and drink it later," he said in an interview. "Similarly, the consumer must follow good sanitary practices when handling chicken, such as cooking fully and washing up after preparing raw poultry before going on to other food preparation.

"Unfortunately, in our zeal to protect consumers from the 'carcinogen of the month,' we have lost sight of the fundamentals of food science with respect to maintaining the routine safety of the food supply," he said. Another point he made was that salmonella contamination in poultry can be minimized by inspecting feed.

Commenting on the observation in the NRC report that federal inspectors have only a few seconds to inspect each bird visually, Regenstein said even such a cursory inspection is effective in detecting birds with visible diseases and bruises. He stressed that "some form of visual inspection must remain a part of poultry processing inspections, even if it is simplified or other new procedures are adopted. . ."

Regenstein also praised the report, pointing out that "undesirable chemical contaminants exist in all natural foodstuffs, and the NRC study has provided a road map for a universally applicable monitoring system."

Nat'l Jr. Angus Show To Hold Record Steer Event

ST. JOSEPH, Mo. — A total of 444 young Angus enthusiasts from 31 states plus Canada have entered 863-head of registered Angus cattle in the 1987 National Junior Angus Show set for July 7 to 11 at the Indiana State Fairgrounds in Indianapolis.

The four days of activities not only include the National Junior Angus Show, but junior members will be taking part in the National Junior Angus Showmanship Contest, as well as the annual meeting and election of six new directors to the National Junior Angus Association Board. There are also special events planned for young and old alike.

This year's show will feature the largest registered Angus steer show yet, some 149-head have been entered. In addition to the steers are 463 "owned" heifers (heifers owned but not bred by the exhibitor), 186 bred-and-owned heifers, 49 bred-and-owned bulls and 14 cow/calf pairs. Pete Sweeney, Mason, Michigan, will serve as judge for the breeding cattle and Dr. Doug Parrett, Urbana, Illinois, will judge the steers.

For more information on the show contact American Angus Association, 3201 Frederick Blvd., St. Joseph, MO 64501; phone: 816-233-3101.

Hog Producers To Discuss PRV

MARTINDALE — A meeting on pseudorabies has been scheduled for 7:30 p.m., June 25, at the Martindale Fire Hall. All hog producers who have quarantined herds or who raise hogs in areas known to harbor the PRV virus are invited to attend to assist in approving control recommendations that will be submitted to the State Department of Agriculture.

LCNC Says Farm Credit Bail-Out Must Not Penalize Northeast Farmers

WESTMINSTER, Vermont — In a letter to all northeastern Senators and Representatives, the Legislative Committee of Northeast Cooperatives (LCNC) this week asked Congress to assist the troubled Banks of the nation's Farm Credit System without diminishing the ability of the Banks which serve northeastern farmers to continue to provide affordable credit.

The Farm Credit System is the nation's largest farm lender, having approximately $54 billion in loans outstanding. Several of its regional Banks are in serious trouble and are charging their farmer-borrowers interest rates that are excessive by normal credit market standards.

In the letter, Steve Kerr, the executive director of the LCNC stated "there is no question that the troubled Banks and their borrowers must be helped. The ability of many farmers to work through the current agricultural recession hinges on a credit source that understands them and their business problems. The ability of American agriculture to adapt and compete in the rapidly changing global economy depends on a strong farm credit delivery system in the years ahead."

The Farm Credit System and a number of national farm organizations have asked Congress to adopt a package of legislative proposals that includes a loan request for $6 billion of federal funds.

The LCNC's letter notes that farmers recognize that "the federal budget deficit makes this a difficult request. Without federal financial assistance, however, several of the System's Banks are likely to fail. Many farmers will be left without a reliable source of credit; interest rates will most probably rise, across the board; and the financial problems of many farmers will be exacerbated. We urge you to support the System's request for financial assistance."

The LCNC asks, however, that northeastern members of Congress "not agree to any proposals that would diminish the ability of the Banks which serve northeastern farmers (Springfield and Baltimore) to continue to provide affordable credit." These Banks are financially strong and therefore able to provide farmers credit at reasonable, competitive rates. "Our farm income is enhanced by their ability to offer us affordable credit. That they be able to continue to do so is very important."

The letter points out that "over $150 million in Bank earnings that, under other circumstances, would have been paid out to farmer-borrowers in the Northeast over the past two years have been transferred to the troubled Banks through a voluntary loss-sharing program. Had they been returned as patronage dividends - as they had in the past - our effective interest rates would have been lower than they were and our net farm income would have been more than $150 million greater than it was

"Were the Springfield and Baltimore Banks now to be asked to shoulder more of the cost of providing financial assistance to the still struggling Banks, they would have to recover their outlays by raising the interest rates that they charge northeastern farmers. Net farm income can be hurt as much by increased interest costs as by reduced milk prices. Indeed, one of the surest ways to drive farmers out of business in the Northeast today would be to enact legislation that leads to higher interest rates and thereby reduces net farm income."

The LCNC's letter to Congress concludes by saying, "the resolution of the Farm Credit System's problems will have a tremendous bearing on the future profitability - and therefore survival - of dairying in this part of the country."

The LCNC is an association of 12,000 dairy farmers, who farm in the New England states, New York, New Jersey, Pennsylvania, Maryland and Delaware.

Hamilton Offers 'Home Banking' System

LANCASTER — At your fingertips, in the privacy of your home, you can now manage your financial affairs from just transferring money to even the most complex transaction.

Hamilton Bank is making available the first Home Banking system in southcentral Pennsylvania. All you need is a personal computer, a Hamilton checking account, a telephone modem and the Bank's special program.

Home Banking allows consumers to schedule bill payments, move funds, check balances, track and manage their finances, and ask about interest rates and services by electronic mail.

"Through Home Banking, we hope to attract customers who are comfortable with electronic delivery services and who put a premium on convenience," said William F. Fenimore, Jr., bank president.

Customers will not only have access to their bank accounts, but also to information about current rates on savings accounts, certificates of deposit and various consumer loans. Rate information and an economic forecast from the economics department of CoreStates, the parent company of Hamilton, will be up-dated weekly.

Hamilton's Home Banking program also includes software for a broad array of financial planning, record keeping and analysis activities such as a budgeting spread sheet, tax record maintenance and net worth calculation.

"This is an integrated package that makes it unnecessary for the subscriber to purchase other financially oriented software," said Susan B. Carr, assistant vice president and manager of Home Banking.

The Home Banking system also provides a gateway for subscription to other electronic information services providing airline and hotel reservations, weather services, Ticketron, stock market quotations and news from around the world.

The program works with IBM and compatible personal computers, Apple II series or compatible and Commodore 64 and 128 computers. The on-line service is available 24 hours a day.

Maximum security and control is afforded since each customer maintains a personal diskette and selects a personal password.

Hamilton Home Banking is being offered through MAC and the Money Access System, a correspondent banking service of CoreStates Financial Corp.

BUSINESS NEWS...

Robert Porr's visit to the Pennsylvania Pork Producers Council's Pork Congress in February proved profitable when his name was drawn to receive a Large White boar from RPM Farms, Beavertown. Porr runs a feeder pig operation near Palmyra.

FMC Works To Solve Off-Target Problems With Herbicide

PRINCETON, N.J. — "The situation with Command herbicide has made one thing clear this year," says Rick Landrum, Command product manager with FMC Corporation, "and that is that farmers will apply chemicals correctly if some effort is taken to educate them on why they should and how they can do it right, and if they're willing to make the effort to use the chemical."

Landrum's comments come in the wake of a planting season that has seen virtually no problems with Command moving off fields due to spray drift or volatilization; last year, in a number of cases, movement of Command caused nearby vegetation to turn white or yellow.

After the off-target incidents occurred, FMC modified the label instructions for Command to require incorporation, listed drift-reduction guidelines, and undertook a comprehensive effort to ensure that label instructions and drift-reduction measures were followed by growers and custom applicators who intended to use Command.

"We knew that the label changes would reduce off-target movement by more than 90 percent," Landrum says, "but we also knew that we were going to have to educate dealers and growers about those new instructions and the importance of following them, so we used several other methods to get our message across."

Those other methods included face-to-face meetings between more than 75,000 potential Command users and FMC personnel, a special training and testing program for dealers and customer applicators, and a series of educational publications.

Landrum says that one thing that must be kept in perspective is that soybean growers wanted to use Command again this year. "Just about everyone who used it last year planned to use it again this year, even those who had some off-target problems. They either figured out a way around the problem themselves or relied on the information they got from us."

Farm Credit News

The Farm Credit System

James Elected Southeast Farm Credit Service President

WEST CHESTER — William H. James, Jr. of West Chester has been named president of Southeast Farm Credit Service by its boards of directors. Mr. James is a graduate of Downingtown High School, Brandywine College, and earned a degree in general agriculture from The Pennsylvania State University in 1974

Mr James joined the Farm Credit System in 1975 and has worked in the five county Philadelphia area since 1979 He most recently held the position of vice president/operations, to which he was promoted in 1984

Southeast Farm Credit, with offices in West Chester, Avondale, Silverdale, and Creamery serves the agricultural community with short, intermediate and long term loans for virtually any farm and farm-related purpose.

William H. James Jr.

New IMC Plant To Produce Hormone

TERRE HAUTE, Ind. — International Minerals & Chemical Corporation recently committed $50 million to build a new facility to produce its newly developed porcine samatotropin product.

Speaking to an audience of several hundred civic leaders, guests and employees at groundbreaking ceremonies, on June 9, Donald E Phillips, president of IMC's Animal Products Group, said the new plant is an important element in a long-term growth strategy to become a leader in the animal health biotechnology market.

"Today's groundbreaking marks a milestone in an ongoing effort begun in 1980 to build upon a solid position in the animal health and nutrition business, coming on the heels of several important acquisitions and dramatic returns from an expanded commitment to research and development of new products," Phillips explained.

Ford New Holland Names Director

John Ochs has been appointed director of Public Affairs for Ford New Holland, Inc., a subsidiary of Ford Motor Company. He succeeds Arnold S. Hirsch, who has been named stockholder relations manager for Ford.

Ochs served as manager of Ford's Washington, D.C. Public Affairs office since joining the company in early 1986.

Before joining Ford, Ochs was press secretary and special assistant to former U.S. Secretary of Agriculture John Block. In that position, he served as the Reagan Administration's chief agricultural spokesman for five years

Prior to that, Ochs was press secretary for the Illinois secretary of agriculture, publications editor for the Illinois Farm Bureau, and a reporter for the Daily Pantagraph in Bloomington, Illinois.

He is a graduate of the University of Illinois, with a degree in agricultural journalism. Ochs maintains an active interest in a family grain and livestock operation near Olney, Illinois.

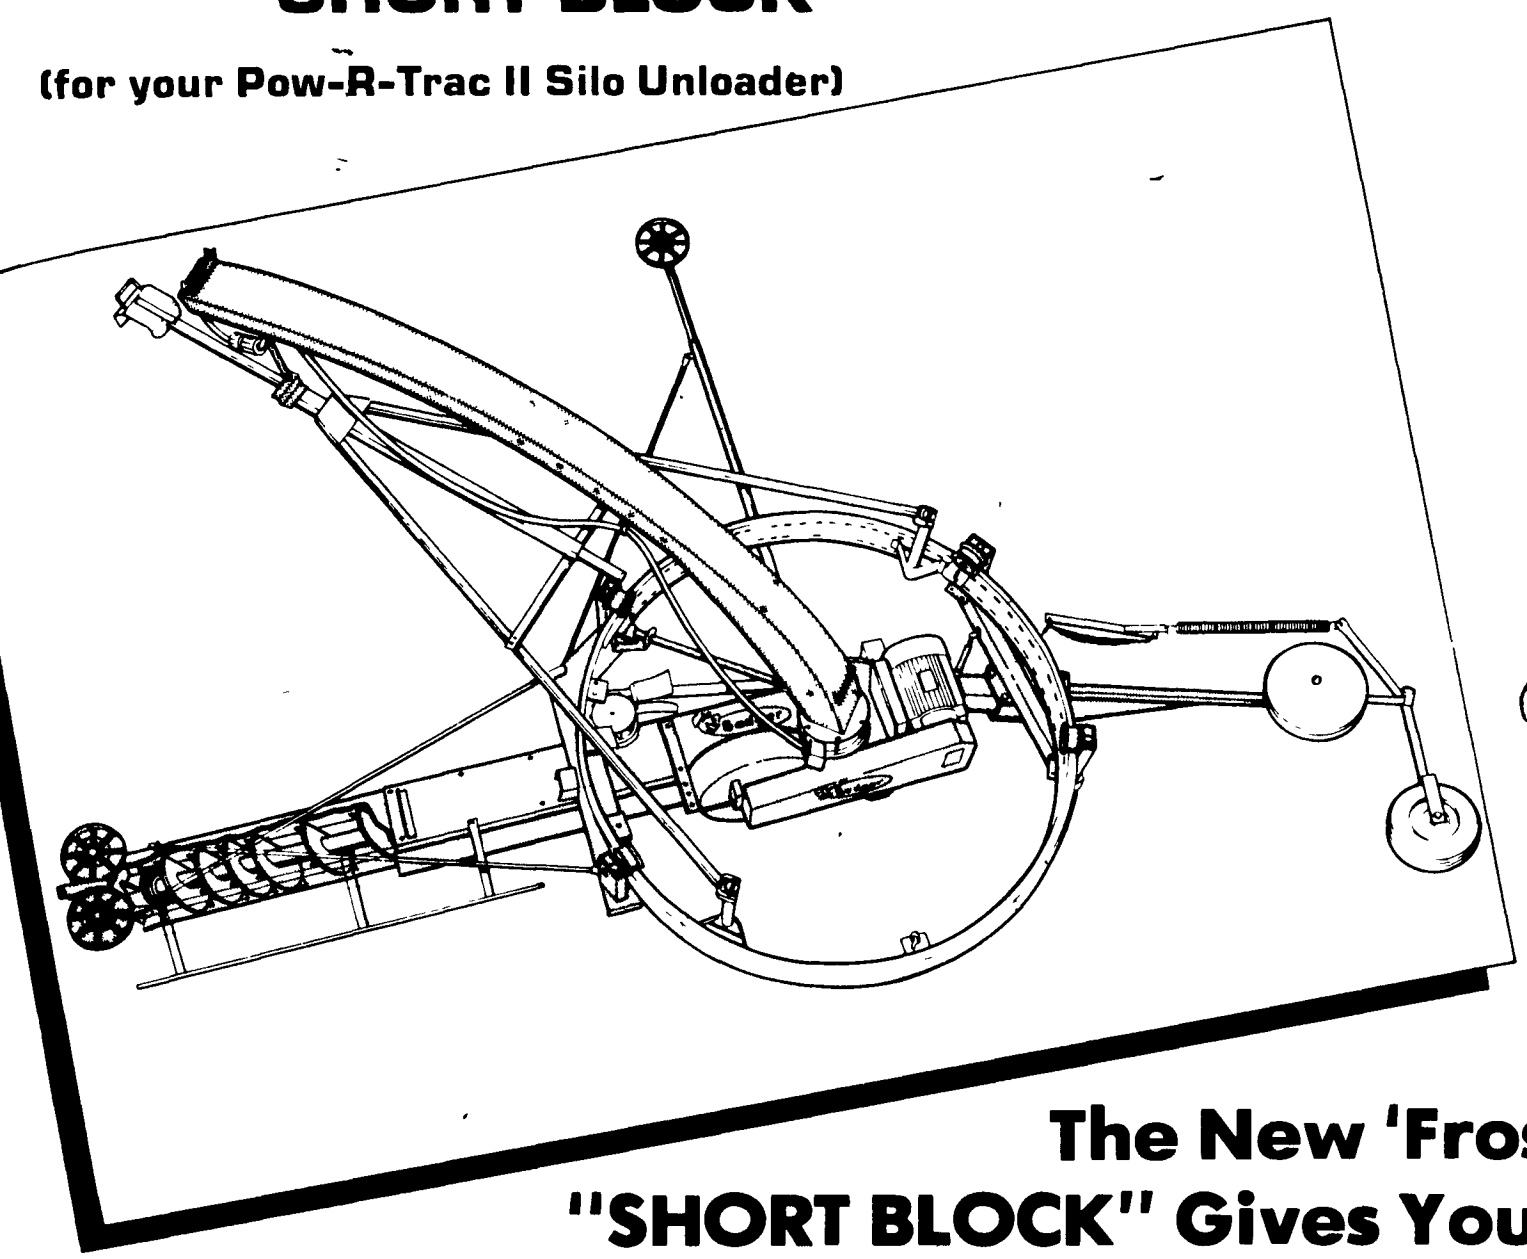
BN2500 'Frost Buster' "SHORT BLOCK"

(for your Pow-R-Trac II Silo Unloader)



Get the performance of the "FROST BUSTER" without buying a new unloader!

Badger

The New 'Frost Buster' "SHORT BLOCK" Gives You The Best Silo Unloader On The Market Today!

With Badger's new "Short Block", you can quickly and economically update your Pow-R-Trac II silo unloader to the same performance level of a 'Frost Buster'. After all, you already own part of a 'Frost Buster' — with the addition of the "Short Block's" new component features, your Pow-R-Trac II will give you all the advantages of a brand new silo unloader at a fraction of the cost.

The BN2500 "Short Block" includes all this:

- complete frame assembly with frame, auger drive transmission, covers, shields, motor mounts, and new guide wheels
- a new blower with 1¼" shaft and bearings, and a complete new spout
- new front and rear carrier frames with all rollers and support brackets, a pilot wheel assembly, and a pressure wheel arm
- new belts, chains, sprockets, digger wheel and auger knives

Not included are rings, ring drive transmission and slip clutch, torque arm, counter weights or outer pressure wheel assembly, collector ring, motor, power cord or suspension system. These items should be checked by your Badger dealer and replaced if necessary.

Badger's "Short Block" - Loaded with Performance Features that Outperform the Competition!

With Badger's 'Frost Buster', the whole weight of the unloader bears down on the large single auger to insure even unloading.

- Never gallops over hard packed or frozen material
- Rugged 10" auger accepts full set of knives
- Extra strong frame for rigid support 2"x2"x¼" high carbon steel angle. 12 gauge auger shroud
- Double flighting and auger knives at end
- Heat treated Zinc Dichromated knives on the auger for severe operating conditions

Polled Hereford Assoc. Holds Preview Show

STATE COLLEGE — The Pennsylvania Junior Polled Holstein Association held its Summer Preview Show on June 6, at the Ag Arena in State College

Starting at 11.00 a.m the association held its queen and princess contest. Karen M Rabenold, the 19-year-old daughter of Mr. and Mrs. Richard Rabenold of Kutztown, was crowned the 1987-88 Pennsylvania Polled Hereford Queen. Karen is a sophomore at Penn State majoring in animal production. Karen is also very active in the different animal club activities at school and has been a very active 4-H member since the age of 8.

Sonja Shearer was crowned the 1987-88 Pennsylvania Polled Hereford Princess. Sonja is 14 years old and in 9th grade at Spring Grove Junior High. She also is a very active member of her area 4-H club in all areas of livestock. She is the daughter of Mr. and Mrs. Terry Shearer, Abbottstown.

Lowell T. Midla was named Pennsylvania Junior State Merit Award winner. He is the son of Mr. and Mrs. Joe Midla of Marianna. He also will go on to the Junior National next month to represent the State.

Placings in the heifer and steer shows were as follows

Heifer Show

May Heifers

1 Heather McBee 2 Kyle Rooker 3 Jeremy Osterstock

April Heifers

1 Heather McBee 2 Howard McMurry

March Heifers

1 Kyle Rooker 2 Jason Osterstock 3 Frank Granbery

Feb Heifers

1 Curt Stockdale 2 Kyle Rooker

Jan Heifers

1 Brendan Midla 2 Kim Midla

(Turn to Page D9)

Beartooth Nan 7U, shown by Curt Stockdale (at halter) was champion female at the Polled Hereford Preview Show on June 6. From left are PPHA president Les Midla, show judge Erskine Cash and PPHA queen Anne Granbery.

Anne Granbery and Erskine Cash congratulate Heather McBee (at halter) on showing reserve champion steer.

Representing PPHA for 1987-88 are Queen Karen Rabenold (left) and Princess Sonja Shearer.

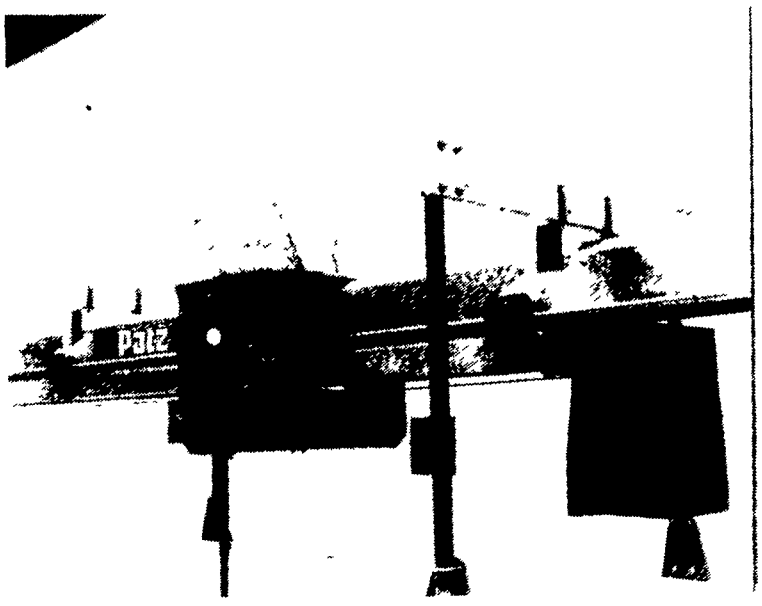
Patz Feeder Provides Direct Drive

POUND, Wisc. — The New Patz Model 8700 Center-charged Shuttle Feeder offers positive drive for sure starting. An instant-reverse motor connects directly to a gear reducer that transfers power to the drum-cable drive. No V-belt, pulleys, roller chain, or sprockets are required.

A pin-type torque limiter prevents torque overload. The drum-and-cable drive pulls the shuttle back and forth, using plastic-impregnated cable for quietness and long life.

A wide 16-inch belt distributes high volumes of feed evenly without separation. The stationary drive unit at the center of the feeder means no traveling electrical components for reliable service.



Patz's new direct drive Shuttle Feeder feeds cattle reliably and economically.

The Model 8700 mounts easily in bunks or on ceilings, making it ideal for in-barn feeding. Optional swivel spout pivots to feed two rows of cows. Available feeder lengths of 40 to 150 feet fit most operations.

Other features include:

- Greaseable bearings increase service life.
- Cable tightener is ratchet type for quick and easy use.
- The 16-inch P.V.C. impregnated polyester feed-carrying belt is specially made for cold-weather flexibility and long life.
- A belt wiper cleans the belt surface to minimize carryback.
- An internal belt wiper removes material from the inside belt surface to prevent feed buildup.

Massey Ferguson Offers Club Membership

DES MOINES, Iowa — Using an innovative approach to money-saving benefits and services for farmers, the MF Club has become the fastest growing organization of its kind in North America with 20,000 first-year members.

This unique club is supported by Massey-Ferguson as a way of saying "thank you" to its many customers throughout North America, and savings for members can add up to hundreds of dollars a year.

MF Club members are eligible for discounts on many needed products and services, including tractor and combine parts, seeds, family medical and life insurance, budget vacations, car rentals, hotel/motel rates, clothing, merchandise — even a European farm tour.

Club members receive $25 in M-F Parts Savings Certificates and $10,000 Accidental Death and Dismemberment insurance protection for joining the Club. In addition, members receive the bi-monthly Club Newsletter containing information on new money-saving offers and club news, and the "Hotline" is available to call Club Headquarters for information or assistance.

Anyone interested in learning more about MF Club benefits and services can pick up a booklet about the MF Club at any Massey-Ferguson or Massey Combines dealership, or write Massey-Ferguson, MF Club, P.O. Box 1813, Des Moines, Iowa 50306. For faster service, call the Club toll-free at 1-800-247-9571, or 1-800-445-1580 in Iowa.

High-volume air circulation

...wherever you need it!

Berg "Kool Komfort" Fans are ideal for use in livestock confinement buildings or wherever maximum air circulation is needed for cooling comfort, air exchange, dispelling odors and removing dust, smoke or humidity, etc. • **Giant face circulation area!** Measures 2,375 sq. inches on the 54" fan; 1,104 sq. inches on the 36" model • **Portable!** Large, rubber-tire wheels and a 19' electric cord permit easy movement. • **Economical!** Thrifty, 1½-horsepower electric motors cut operating costs.

Corn Classic Attendees To Tour Northrup King

ST. LOUIS — Regardless of the size of the 1987 corn crop, John Marten, Farm Journal staff economist, says this year will be similar to 1986 in terms of reserves and storage.

Marten, a featured speaker for the National Corn Growers Association's Corn Classic, July 19-21, Minneapolis, MN, will address attendees during a tour of the Northrup King Research Center, Stanton, MN.

He will provide an outlook analysis of future corn prices and their effects on livestock and soybean prices, as well as his predictions of land price and interest rate trends.

Two groups, leaving the Hyatt Regency in Minneapolis, at 8 a.m. and 10:30 a.m., Tuesday, July 21, will have an opportunity to see firsthand some of the industry's newest advances in biotechnology at the research center.

At the 412- acre facility, visitors will talk with plant breeders about agronomic research, herbicide tolerance and production methods while touring research trials of field corn, sorghum, alfalfa, sunflowers and soybeans. The field trials will include Northrup King, Stauffer Seeds and Prime hybrids and varieties. For those who prefer to visit Northrup King's flower trials, a horticulturist will discuss gardening.

Stops on the tour of the bioscience labs will include: plant pathology, entomology, molecular genetics and tissue culture, as well as visits to the quality assurance lab and several of the 13 computer-controlled greenhouses. Tour guides will be staff agronomists who can answer questions corn growers may have.

In 1985, Northrup King Co. underwent a multimillion dollar expansion to accommodate the company's growing biotechnology needs. The enhanced facility allows scientists to more quickly develop improved hybrids and varieties which are economical for farmers.

For Corn Classic registration and hotel information write National Corn Growers Association, 1000 Executive Parkway, Suite 224, St. Louis, MO 63141 or call 314/275-9915.

Armstrong Issues Warning On Implement Rims

NEW YORK, NY — Armstrong Tire Company has noted that, despite warnings from the Rubber Manufacturer's Association, some tire dealers have mistakenly tried applying domestically produced implement tires to certain European wheels with unique diameter and width.

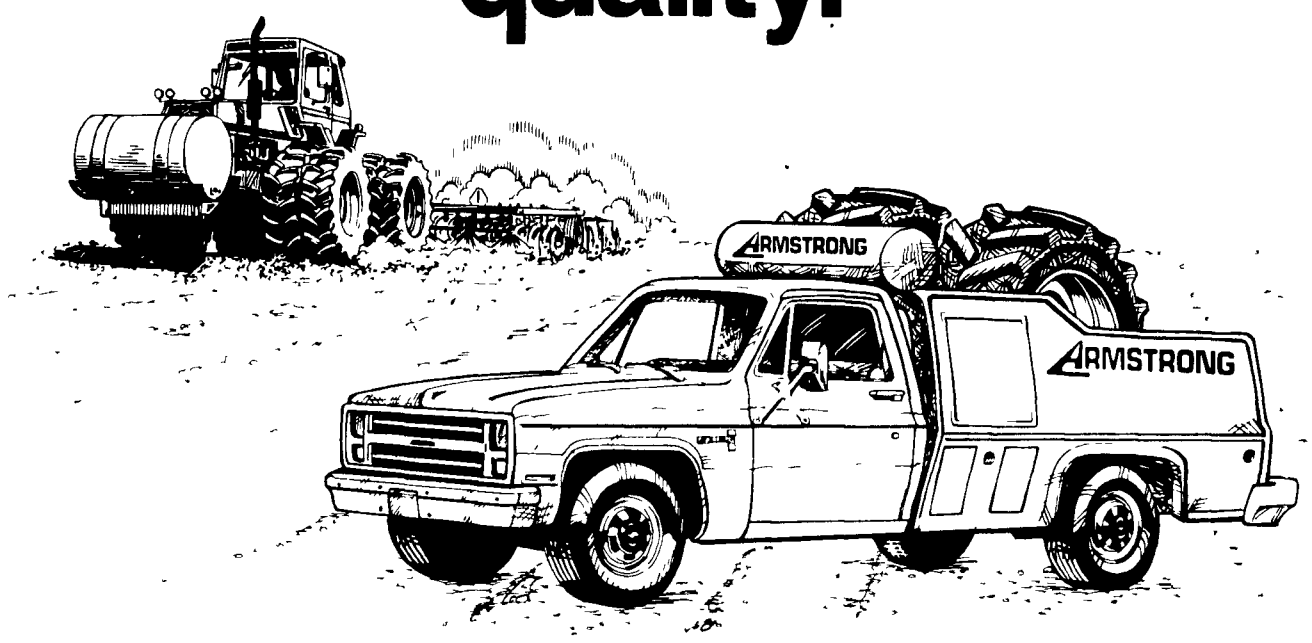
Fred Fuest, manager, Consumer Affairs at Armstrong, New Haven, Conn., explained that attempts to mount domestically produced tires on these wheels may cause the tire beads to break, possibly resulting in serious injury or death.

"The rims in question are 15.3 inches in diameter and nine inches wide," explained Mr. Fuest. "Rims manufactured in 1981 and earlier are marked 15 inches but they're actually 15.3 inches. Later wheels are marked 15.3 inches. The best way to avoid this situation is the nine inch rim width. The domestic wheel industry does not manufacture a nine inch rim width for farm implements."

The European tire sizes that may be mounted on these rims are: 10.0/75-15.3; 10.5/80-15.3; 11.5/80-15.3; 12.5/80-15.3.

For further information, Armstrong Tire Company maintains a toll-free consumer/dealer telephone line, (1-800-243-0167).

Anyone can sell you a tire. ARMSTRONG sells you service and quality.



DON'T GET STRONG-ARMED — GET ARMSTRONG

Your LOCAL AUTHORIZED Armstrong dealers sell you more than just tires. You get service, too. We'll respond quickly to your service call, 24 hours a day. Anywhere. In any weather.

No matter what tires you need repaired, count on us to always be there. Because when it comes to farming, we know you don't have time to spare.

Purebred Angus Added To Alfred State Beef Program

ALFRED, NY – Alfred State College recently added seven purebred Angus to the institution's beef program.

The new arrivals are four cows, two heifer calves, and a bull calf, all obtained from Wayne Heyden of Morrisville. More are expected to be added, according to Lee LaRochelle, assistant professor of animal science, and Tim Pajda, livestock herdsman.

"By integrating Angus into the livestock program, we provide students a chance to gain practical experience with purebred registered cattle and to become familiar with management techniques unique to them," said LaRochelle.

Before the Angus arrived, the College's commercial beef herd consisted of a three-breed rotational cross of Angus, Charolais, and Simmental cattle.

Plans are being made to show the purebred Angus at various fairs during the summer of '88.

Alfred's 800-acre college farm already manages the largest commercial beef herd of any two-year state university college, according to LaRochelle, who said addition of purebred Angus "enables us to enhance our livestock program while still maintaining the high standards of the commercial herd."

He said an important reason for adding purebred Angus to the beef program is that although many students will work with commercial cattle after graduation, more and more are finding jobs with purebred operations.

To illustrate beef industry support of the new dimension, Warren Bippert of Alden has donated enough high quality semen from such Angus bulls as New Yorker, Foolish Pride, Firecracker, Sayre Patriot, and New York New York to breed the four Angus cows this spring.

Hands-on training which students receive includes complete responsibility for grooming cattle in preparation for sales and shows, LaRochelle said, adding that students are also assigned cattle which they must train and groom for the annual Showmanship Day competition at the college farm.

Beyond classroom instruction, students also are involved in the day-to-day management of the cattle, including processing calves, hoof trimming, dehorning, monitoring and managing the nutritional and health programs of the cattle, synchronizing heifers and cows for breeding, and selecting bulls.

Alfred State's new purebred Angus are shown by John M. Dickenson (left); John R. Donnelly; Lee LaRochelle, asst. professor of animal science; Kenneth Barker; Tim Pajda, herdsman; Kevin Brown; and Russell Karr.

Wheel Conversion Rims From Unverferth

WARSAW, Ind. — Specially designed "step-up" rims to convert 34-inch tractor wheels to 38 or 42 inch, or 38 inch wheels to 42 inch are available from Unverferth Manufacturing, Kalida, Ohio.

To accomplish the 34/42 conversion, the rims simply attach to Unverferth step-up spacer lugs mounted on the tractor's original hub. Standard step-up rims and lugs fit most tractors using an 8-, 12- or 16-lug cast wheel center. Special heavy rims and "deep drop" models are available to accommodate high-torque applications and 4WD tractors, including those with 10-lug centers.

For more information, contact Unverferth Mfg. Co., Inc., P.O Box 357, Kalida, OH 45853. Phone 1-800-537-9442.

Unverferth Step-Up Rims

More Farms Needed For Vacation Program

LEWISBURG – More Pennsylvania farmers are needed to provide farm vacations, according to Guy Temple, Extension community development agent Farmers with extra rooms can provide their facilities to people seeking to learn about rural Pennsylvania. It is an excellent way to form new friendships and strengthen rural-urban ties, and it will also provide extra income for the farmer.

Presently there are 29 farms in the state providing overnight, weekend or extended vacation accommodations. They have been approved and inspected by the Pennsylvania Farm Vacation Association to insure proper facilities are being provided.

Farmers who would like additional sources of income and would like to provide farm vacation facilities, should contact their local Extension Office or the PA Department of Agriculture at 717-783-9946

ABS Honors Leland Lamb

DEFOREST, Wisc. — Sixty members of the late Leland W. Lamb's immediate family, friends, and ABS personnel from several western states and Canada, gathered recently at the American Breeders Service facilities in Wellington, Colorado. Their purpose was to dedicate the ABS headquarters building in memory of Leland "Lee" Lamb, who served ABS from 1940 to 1965.

Lee Lamb, 84, died at his home in Lincoln, Arkansas, in July, 1986. He, along with the original ABS owner, J. Rockefeller Prentice and Philip I. Higley, long-time president and general manager, were the key people in establishing ABS in the early 1940s.

During the dedication ceremonies, Dr. John J. Sullivan, vice president, Production, for ABS, pointed out that Lamb was responsible for the selection and purchase of more than 600 mature dairy bulls for ABS during his career. These bulls were used to artificially inseminate almost a million dairy cows each year prior to 1965, when Lamb retired.

Preventing Leg Weakness In Capons

BY HERBERT C. JORDAN
Penn State University

UNIVERSITY PARK — At least one third of all problem calls on capons involve too many B grade or condemned carcasses, hock disorders, breast blisters, foot troubles or disease resulting from leg weakness. To prevent leg weakness, consider the following:

• Purchase only roaster cockerel strains to use for capons. Broiler strains have more leg weakness after they pass 6 weeks of age. Roaster strains stand up better on their legs from 6 to 16 weeks of age, apparently because they are bred to reach their heavier weights. Breeder flocks should be well fed and managed to produce cockerels ready for caponizing, recovery and growth.

• Low energy diets can be used from four weeks of age to market. Capons tend to get too fat too early in life, so they must be fed more fiber and lower energy feeds with high quality protein. One way to do this is to feed a normal growing ration for roasters of turkeys, then mix it (80 percent mash and 20 percent whole oats by weight). Once a week, feed one pound granite grit sprinkled on top of mash for each 50 birds. A capon feeding program may be used by following directions in "Suggested Feeding Programs for Small Poultry Flocks" by Owen D. Keene, Dept. of Poultry Science, 213 Henning Bldg., University Park, PA 16802.

• Mycoplasma and Salmonella-free stock can be obtained from hatcheries that blood test every breeder and cull out carriers of venereal or vertically transmitted diseases. MG and MS-free chicks make the strongest, healthiest capons. Ask hatcheries to send you only healthy cockerels, from blood tested, disease-free parent stock.

• Foot injuries can occur if sharp metal, broken glass or nails in litter are left underfoot. Wire floors are not satisfactory for capons. After surgery, a capon gets fragile and hard to raise; capon skin, flesh and food pads get soft and tear easily. Staphylococci and other pathogens enter the blood stream where the foot is cut, so protect capons anyway you can.

• Tendosynovitis is a disease which affects some capons by causing a swelling above the hock joint in the leg, ascending to 2 inches above the hock. It looks like a lead pencil is buried under the skin. See your veterinarian for prevention or treatment for this disorder.

• Exercise birds five times a day, every day. This makes legs stronger on capons in total confinement. Have youngsters go in and get birds up and move each bird around slowly five times a day for about 10 minutes. When birds walk around, they tend to pass toxins out of their system, eat and drink more and build stronger muscles.

• Ranging birds two to 10 hours a day (after 9 am, every day) makes stronger legs in most capons. Granite grit must be fed on top of mash when ranging birds. Eating clover or high quality grass will reduce total bought feed needed to produce a capon by 10 to 20 percent if you restrict mash to 80 percent of what they normally eat.

Allen Appointed To ASA Committee

Omaha, Nebr. — John M. Allen, Jr. of Saxonburg, Pa. was recently appointed by the American Shorthorn Association to serve on the Breed Promotion and Improvement Committee. This committee will be responsible for making recommendations concerning breed promotion, improvement and advertising and will provide recommendations regarding ways of increasing new members in the American Shorthorn Association. Additional responsibilities include suggesting new ideas for promoting Shorthorn cattle at state and national beef cattle conventions and meetings.

Allen has been past secretary/treasurer of the Pennsylvania Shorthorn Association and currently serves as an association director and a junior advisor. He has been elected as a delegate on several occasions for the annual American Shorthorn Convention.

His other cattle-related activities include a directorship in the Northwest Cattlemens Association; 4-H leader in the Butler County Livestock Club and vice president of the Northwest Junior Beef Classic.

Allen lives in Saxonburg with his wife Kathy and two children Johnny and Andrew.

To prevent a hernia, lift with your legs.

The groin is the weakest point With strain it may give way and cause a hernia

Bend your knees to pick up a heavy object, then straighten your legs. When your legs are doing the work your groin and back are protected

What if you already have a hernia? In most cases, a hernia can be repaired in one day. This outpatient surgery is done by the Canadian or Shouldice method

To find out more about hernia repair, call 397-5104 for a brochure or an appointment

Study Shows Unleaded Gas Damages Older Engines

UNIVERSITY PARK – Farm equipment generally will operate satisfactorily on low-lead gasoline, but many older gasoline-powered tractors, combines and trucks are vulnerable to excessive valve-seat wear if operated on unleaded gasoline.

These findings were recently released as the result of a joint study by the U.S. Department of Agriculture and the U.S. Environmental Protection Agency.

"The study results underscore the need for farmers operating older equipment to take preventive measures to protect engines," says James Garthe, Penn State agricultural engineer.

The study examined the effects that unleaded and low-lead gasoline and non-lead fuel additives may have on agricultural engines designed to use leaded gasoline. EPA currently limits the amount of lead in leaded gasoline to 0.10 gram per gallon.

The study analyzed the potential for mechanical problems, including valve-seat wear, that may result from using various fuels in farm machinery. Eight types of engines were tested: four tractor engines, one combine engine, two farm truck engines and one recreational vehicle engine. Tests were run on leaded, low-lead and unleaded fuel as well as two aftermarket non-lead additives.

The engines ran satisfactorily on leaded and low-lead gasoline. Although some performed satisfactorily on unleaded gasoline, most experienced excessive valve-seat wear. Non-lead additives showed varying ability to reduce engine wear.

"Since 1974 all automotive and agricultural engines have been designed to use lead-free gasoline," says Garthe. "They have hardened valves and valve seats that don't need the lubrication that lead provides. But a lot of equipment made before 1974 is still being used on farms."

U.S. farmers operate some 1.8 million gasoline-powered tractors, 271,000 gasoline-powered combines and 750,000 trucks larger than one-ton capacity that use leaded gasoline. Gasoline-powered tractors represent about 40 percent of all tractors, with the rest powered by diesel fuel.

About 42 percent of gasoline-powered farm tractors are used only for light tasks and have little risk of excessive valve-seat wear if operated on unleaded gasoline. The other 58 percent see some medium and heavy uses, and unleaded gasoline could cause excessive wear, unless they are low-speed engines or have hardened exhaust valve seats. Only about one-third of gasoline-powered tractors have hardened valve seats.

All combine engines and many trucks receive hard use, and soft valve seats will probably wear down if the engine runs on unleaded fuel.

"Farmers whose equipment is subject to wear have a number of options," Garthe says. "They could have valve seat inserts installed. This is a routine procedure – many automotive and machine shops are now doing it." He recommends Stellite valve seat inserts, as opposed to steel or case-hardened iron, because Stellite is the hardest and most wear-resistant of the three.

Farmers can also protect their engines by running them at lower speeds and lighter loads, by keeping valves adjusted and by keeping engines tuned and timed properly, Garthe says.

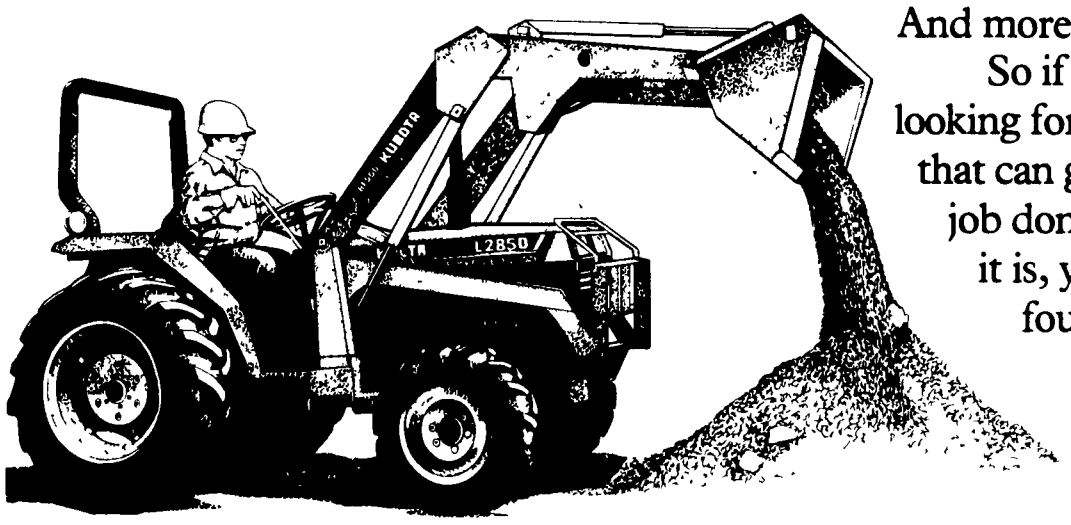
Because of health and environmental consequences of public exposure to lead, EPA undertook a lead reduction program in the early 1970s. Since then, lead usage standards have been tightened several times

THEY HOLD DOWN MORE THAN ONE JOB.

Kubota's mid-sized tractors are very versatile. You'll find them at work on farms, in parks, nurseries, estate homes and even on construction sites.

The reason is simple. Our L-Series tractors come with features you'd expect to find only on bigger, heavier machines. For example, 3-, 4-, or 5-cylinder diesel engines with PTO horsepower from 21 to 40.

Other features you can select include 8x7 or 8x8 mechanical or hydraulic shuttle-shift. A choice of 2- or 4-wheel drive on most models. A hefty 3-point hitch. And more.



So if you're looking for a tractor that can get the job done, whatever it is, you've found it. The Kubota L-Series.

Mandatory Conservation Provisions Of The 1985 Farm Bill

Editor's Note: The following is the second part of two in the examination of the conservation provisions of the 1985 Farm Bill. In last week's issue on page C2, William McSweeney explained the background of the conservation programs of the Bill in addition to the Conservation Reserve Program portion of the Bill. This week he looks at the three mandatory compliance provisions covered by the Bill.

BY WILLIAM McSWEENEY
Assistant Professor of Agricultural Economics

Sodbuster

The Sodbuster provision covers land shifted to commodity crops after passage of the 1985 Farm Bill. Whereas the CRP attempts to put highly erodible land back into permanent cover, the Sodbuster requirements affect the conversion of land under permanent cover into agricultural production.

Specifically affected are highly erodible fields that were not planted to an agricultural commodity or designated as set-aside land between Dec. 31, 1980 and Dec. 23, 1985. The Sodbuster provision arose out of concern that highly erodible land already in permanent cover was being converted to crop production without conservation practices to control erosion. The Sodbuster provision is designed to encourage farmers to use an approved conservation plan if they produce crops on sodbusted land.

If a farmer has highly erodible land that is subject to the Sodbuster provision, and puts the land into crop production without an approved conservation plan, the farmer will lose eligibility for the following USDA programs: commodity price and income supports, disaster payments, crop insurance, Farmers Home Administration loans and loan guarantees, farm storage facility loans, CCC storage payments, and CRP annual payments. The farmer will remain ineligible until a conservation plan is implemented for those sodbusted acres.

Conservation Compliance

Whereas the Sodbuster provisions applies to the conversion of highly erodible land into cropland, the Conservation Compliance provision applies to highly erodible land already being used for crops at the time the 1985 Farm Bill was passed. Such land may be eligible for the CRP, but if the farmer elects to keep producing crops on the land, he or she will still be subject to the Conservation Compliance requirements.

Under Conservation Compliance, farmers must, by Jan. 1, 1990, be actively applying a locally approved conservation plan on highly erodible fields, or lose eligibility to the same set of farm programs mentioned previously. The plan must be fully operational by 1995. If, after Jan. 1, 1995, a farmer continues to farm highly erodible land without an approved conservation plan, whether one has been developed or not, he or she may lose eligibility for the previously discussed set of farm programs.

The only exceptions to the mandated dates in the Conservation Compliance provision are where there are no soil maps available. Then, a producer has two years after maps are completed to develop an approved conservation plan.

Swampbuster

The remaining provision is known as the Swampbuster. Similar to the Sodbuster, the purpose of the Swampbuster is to encourage the preservation of

wetlands.

This provision applies to wet soils that support mainly water-loving plants. These soils are usually saturated or ponded. Producers who convert wetland after Dec. 23, 1985 in order to produce crops will no longer be eligible for the farm programs mentioned previously.

There are, however, four exceptions to the Swampbuster provision. Farmers who commenced the conversion of wetlands before Dec. 23, 1985, are exempt. Producers who converted wetlands that had been created artificially are exempt, as are irrigation-induced wetlands.

Producers who grow crops on wetlands that become dry for natural conditions such as drought, are exempt. And also exempt are producers whose conversion to wetlands for crop production has been determined by the SCS to have minimal effect on wetland values.

Farmer Options

Many farmers are asking themselves, "What should I do? What options are open to me?"

For farmers with eligible land, the CRP could be just the ticket. More acreage is now eligible since the inclusion of legume and grass hay as a commodity and the redefinition of highly erodible land. Since most highly erodible soils tend not to be very productive unless large amounts of expensive chemicals and fertilizers are used, the CRP will provide the farmer with a guaranteed level of income from those acres, something leaving them in production cannot do.

Farmers can produce crops on sodbusted highly erodible fields protected by a conservation plan, and continue their eligibility for the USDA programs. Or, they can sodbust highly erodible land without the guidance of a conservation plan and forfeit their eligibility for the USDA programs. The same options hold for farmers with land subject to the Swampbuster.

Farmers with existing highly erodible cropland can get a conservation plan developed by 1990 and implemented by 1995 and retain their eligibility. Or, such farmers can choose to continue producing without an approved conservation plan and forfeit their eligibility to the USDA programs.

The options are clear and the choices are few. Many farmers would argue that they do not depend on the price and income support programs and do not intend to ever use them. However, it is the rare farmer who does not depend in some fashion on at least one of the programs mentioned. Hence, the smart farmers, who need a conservation plan will apply for one as soon as possible, to not only give themselves time to plan and apply appropriate cropping and conservation practices, but to give the local SCS field staff adequate time to handle the expected sharp increase in their workload.

Get started now: delays caused by heavy workloads could cost a farmer eligibility to the various farm programs.

The farm conservation programs discussed in this column and last week's column represent a first step toward consistency in the scope and purpose of USDA farm programs, at least with respect to protecting this nation's soil and water resources. Farmers who comply with the new conservation provisions of the 1985 Farm Bill will not only continue to have many farm programs open to them, but do their part to meet national soil and water conservation goals.

U.S., Soviet Agreement May Lead To Increased Soybean Sales

ST. LOUIS – U.S. soybean farmers have scored a significant victory in their efforts to convince the Soviet Union of their desire and ability to be long-term soybean suppliers, says American Soybean Association president David Haggard.

The Soybean Association and the Soviet Union's Ministry of Agriculture, called GOSAGROPROM, signed an agreement of scientific and technical cooperation on May 27 in Moscow. In addition to Haggard, the Soybean Association was represented by Chief Executive Officer Dr. Kenneth L. Bader; Staff Vice President, Michael A. Phillips; and ASA East European staff Dr. Steven Nemeth and Aleks Cerne.

As part of the agreement, the Soybean Association and Soviet officials for the first time will work together on a swine feeding trial this fall in the Soviet Ukraine. The trial will combine domestically-produced high moisture corn with 44 percent protein U.S. soybean meal. This combination should result in a cost-efficient, high energy ration which meets Soviet needs.

"Soviet agricultural officials acknowledge that their country has a protein meal deficiency of six to 10 million metric tons," says Haggard. "For U.S. soybean farmers that represents a potential soybean meal market equivalent to 300 to 450 million bushels of soybeans."

Holding back inclusion of higher levels of protein in feeds is apprehension on the part of Soviet economists. They aren't fully convinced that including more protein in feed will cost-efficiently increase the productivity of their livestock industry, says Haggard.

If the feeding trial is successful, the Soybean Association hopes to work with the Soviets to increase soybean market opportunities in other areas such as technical aspects of soybean processing and further refining of soybean oil into products such as margarines and mayonnaises. "The Soybean Association is tremendously excited about this recent agreement of cooperation," says Haggard. "This co-sponsored swine feeding trial will help bridge the gap and open communication between countries. We are looking to build the United States' share of the Soviet soybean market and become its premier supplier."

If you're looking for a manure handling system, look to the people who specialize

Inject manure for more profit

- Injector discharges manure in soil to preserve nutrients and boost crop yields
- All operating parts up front for easy viewing and control
- Hydraulically operated precision gate valve operated from tractor seat provides controlled rate of unloading
- All working parts removable from outside of tanker
- Internal 4 bladed chopper homogenizes slurry
- Walking beam tandem axle with surge brakes on all 4 wheels
- 540 or 1000 R P M. P T O available
- Four shanks are self-penetrating for easier pull, deep injecting and good covering
- Shear bolt shanks feature replaceable points and leading edge
- Adjustable gauge wheels assure uniform depth
- Independent injector uses 3 point hitch

Not All Bugs Deserve To Die

NEWARK, Del.—The bug zapper, a popular summertime purchase, does not discriminate between good bugs and bad when frying the feckless.

"Insects are an important part of our environment and many have useful functions," says Delaware extension master gardener Ralph B. Johnson. "By killing indiscriminately, the bug zappers eliminate food for fish and birds as well as many useful insects."

Moreover, although almost everyone will agree that mosquitoes are bad, the bug zappers are not good at stopping them. "Mosquitoes are not particularly photosensitive—they are not attracted to light," the master gardener says. "Rather they react to heat and carbon dioxide, and black-light zappers provide neither."

"Good" bugs are those that feed on destructive insects or are parasitic to them," Johnson explains. "Such insect predators or parasites should be encouraged, not destroyed. In fact, colonies of certain insects can be purchased to control others," he says.

The master gardener provides the following partial list of beneficial insects:

- **Ladybugs (or Lady Bird Beetles).** The adults and larvae feed chiefly on destructive aphids, but they also eat scale insects, mealybugs, spider mites and insect egg masses. A single beetle may consume over 5,000 aphids in its lifetime.
- **Lacewings.** The larvae of this golden-eyed insect devour aphids, scale, mealybugs, thrips, mites and insect eggs. Each larva can consume a hundred or more insects per day.
- **Praying Mantids.** These insects, also known as praying mantises, help control crickets and grasshoppers.
- **Dragonflies.** Mosquitoes make up a large part of their diet.
- **Parasitic Wasps.** This large group of insects lays its eggs in the larvae of harmful pests such as the tomato hornworm and the European corn borer.
- **Flower Flies** The larvae of these non-stinging flies feed on aphids, termites and ants.
- **Ground Beetles.** These feed on other insects.
- **Fireflies.** The larvae of these delightful creatures feed on small insects and snails.

"So, with your new awareness," says the master garener, "does that $40 to $60 bug zapper still look good to you?"

NY Cattlemen Outline 3-Year 'Plan Of Action'

ITHACA, NY — A three-year plan of action emphasizing membership development, producer services, and local or 'grassroots" involvement was adopted by the governing Council of the New York Beef Cattlemen's Association at its June meeting at Morrison Hall on the Cornell campus.

New York Beef Cattlemen's Association president Peter Nixon of Westfield presented the plan which had been developed by the advisory and promotion committees.

The three-year plan as approved also set goals for the Association's newsletter "The Cattleman" and for development of funding sources in order to reduce dependence on the Beef Barbecue tent at Empire Farm Days as a revenue source.

Nixon, in presenting the three-year plan said, "The committees chose to recommend fewer areas of action but to strive for a higher degree of success in meeting the goals set for 1987, 1988 and 1989.

The plan as approved calls for initiation of an immediate membership drive to continue through Labor Day; continuation of the Tel-Marketing program with increased involvement and participation by the membership, Cooperative Extension, and other groups; greater use of the Performance Testing program; as well as strengthening of the six divisions in the association with more local events and participation.

Executive secretary Lee Kraszewski reported a membership of 570 to date and said 65 of these are new members and 85 are out-of-state members.

Harold Maynard of Campbell, chairman of the sales committee, reported the Fall Feeder Calf Sales will be Nov. 7 at Chatham and Nov. 14 at Canandaigua.

Henry Bono of Richmondville, chairman of the Bull Test Committee, and William Greene, livestock extension associate at Cornell reported on plans for the 1987-88 Bull Test. Rib-eye measurements will be added to the performance data and bulls must weigh at least 525 pounds at the time of delivery to the test site.

The Council accepted the invitation of the Eastern Division to host the general membership family picnic at noon Aug. 2 at the Town Park in Westerlo. This will be a social gathering only with no Council or committee meetings scheduled and will be open to all Cattlemen's Association members and their families as well as to interested persons.

The marketing committee reported on plans for the 1987 Tel-Marketing program and announced a series of meetings will be conducted in July across the state to explain the program.

Herbicide Approved For Pastures, CRP Acreage

MIDLAND, Mich. — Dow Chemical's CROSSBOW Weed and Brush Killer has been recently approved by the Environmental Protection Agency for use in permanent grass pastures and Conservation Reserve Program areas.

Crossbow controls a wide variety of woody plants including multiflora rose, hawthorn and blackberry, as well as many broadleaf weeds such as Canada thistle and ironweed. While the product is highly active against many weed species, it will not harm most grasses.

During the past two seasons, Crossbow has become widely known for use in fencerows and other non-crop areas. According to Tim Playford, Crossbow product marketing manager for Dow Chemical U.S.A., the unique mixture of triclopyr, a popular woody brush control herbicide, aqnd 2,4-D, an effective broadleaf weed control standard provides Crossbow with a broad spectrum mix which enhances weed and brush control efforts.

"The ability to selectively target a wide array of tough woody and broadleaf weeds has long been in demand," he says. "The combination of active ingredients in Crossbow now allows farmers and ranchers to control over 50 weed species while posing little threat to grasses. Legumes, however, (such as clover and alfalfa) are susceptible to Crossbow applications.

Washington Co. To Host Steer Show

WASHINGTON, Pa. — Washington County's third annual Open Jackpot Steer Show is scheduled for Saturday, June 27, beginning at 1 p.m.

"Anyone who wants to show a steer is invited," says show spokesman Gloria Wirtz, adding that officials hope to top last year's registration of 63 steers.

Sponsored by the Glyde Ag 4-H Club with assistance from the Pennsylvania Beef Council, the show features numerous cash prizes, including $250 for grand champion, $100 for reserve and $25 for each class winner.

Serving as show judge will be Cambria county cattleman W. Donald Templeton. Registrations will be accepted up to check-in time, 11 a.m. the day of the show For more information contact Johanna Sheppard, 412-228-6881, or Donald Gardner. 412-267-3976.

'Imaginative Approach' Needed To Preserve Groundwater Quality

UNIVERSITY PARK — Almost five centuries after Christopher Columbus first set foot on America, groundwater supplies in many regions of the United States remain "an ever-youthful fountain," according to a Penn State geologist.

"Subsurface aquifers store more water now than all the dams, rivers and surface reservoirs have been holding since Columbus came here," said Dr. Richard R. Parizek, professor of geology and geophysics.

"It is a fountain of youth, due to its renewal capabilities. To many people, it seems to have a mystical quality about it," he added.

But the cumulative effect of land use since Columbus' time has changed the hydrologic cycle both physically and chemically.

"Now, we're smart enough to see that we have to deal with the effects of those changes," Parizek said. Only with an imaginative approach — using technology more advanced than the divining rod — can the country maintain its abundant water resources and protect the quality, he added.

"Many people don't understand groundwater. There are fewer people trained in forecasting, developing and managing groundwater than are trained in surface waters. It is a little harder to predict what's going on underground."

But, he said, the benefits are great. Groundwater is less likely to be contaminated, is moderately abundant in most parts of the United States and remains a fairly constant temperature and quality year-round.

"In most cases, it is also cheaper than surface water. Often you don't have to buy the land for the right to put your straw in the bottle. You need only buy an access right, and you don't have to flood the land for a water source, as is being done by surface reservoirs in the southwest."

There is a disadvantage to relying on groundwater. While it is more difficult to contaminate, "if it does become contaminated, it is harder to clean up. A river flushes itself, but in groundwater a contaminant can linger even after cleanup operations," Parizek said.

One of the biggest fears about tapping into groundwater is that it will cause a drop in the water table. "In general, that's unfounded. In fact, a lowered water table may actually make an aquifer more efficient in collecting, storing and transporting water," he added.

Parizek said that by drilling a well near a river, the underground water flow is pulled from the direction of the river toward the well. It's called induced recharge and can win back water that is eight, 10 or more inches deep that now is being consumed by plants.

"By pulling the water table down past the root zone, most plants still survive, and the local recharge rate and volume of available water increases," he said.

However, this method of recharging local water supplies can work too well, pulling water from shallow wells in times of drought conditions. In other cases, it does not work at all and water is withdrawn faster than it can be replenished naturally.

"We have to use more water than only what we can see," Parizek said. "We can increase water supplies if we use groundwater aquifers as storage for excess surface water in addition to surface reservoirs. Such conjunctive use schemes have not been fully developed in the United States.

"Cities that rely on rivers and reservoirs could pump excess surface water to areas of high underground storage potential," he said. In an emergency, that stored water is like money in the bank.

Parizek, dubbed "Mr. Groundwater" by his peers at the University, seems hopeful that the United States will not let itself go dry.

"There is hardly an industry without the potential to adversely affect water quality," he said. "As long as we continue to study, develop and adopt the technologies to deal with that fact, we can be assured of both quality and quantity for the foreseeable future."

60% Of State's Groundwater Contaminated

UNIVERSITY PARK — Groundwater in Pennsylvania is considered a good source of drinking water, but 60 percent of all private water systems in Pennsylvania have corrosive water, said two Penn State water quality specialists.

"The big picture is that for most of the state, we can get excellent water with minimal or no treatment," said William Sharpe, associate professor of forest hydrology. "But this situation is changing."

"For too many years, groundwater was out of sight and out of mind," agreed project associate Joseph Makuch. "We believed that groundwater was safe from contamination. We made efforts to clean up surface water, but didn't do as much for groundwater."

"In Pennsylvania, about half of all groundwater we use goes for drinking water, which demands high quality and safeguards," said Makuch, who is co-author of the pamphlet, "A Quick Look at Pennsylvania Groundwater."

Makuch also is involved with Penn State's educational efforts on behalf of Pennsylvanians for a Clean Chesapeake Bay. Residents in the commonwealth use more than three-quarters of a billion gallons of groundwater every day.

Sharpe said improvements in monitoring will reveal more instances of contamination. "Extensively mined areas have expanding groundwater problems. We're finding water-soluble pesticides where agronomists said we wouldn't, and there are hazardous waste sites and associated groundwater contamination in some of the most pristine areas of the commonwealth."

Farming hasn't escaped the scrutiny of water specialists, either.

"The U.S. Environmental Protection Agency is conducting a national survey to locate organic pesticides, and I predict that they will be found everywhere," Sharpe said.

Farmers are willing to change for the good of the environment, said Makuch. "Now that there is more awareness of the problems, people are more careful of contamination. Farmers are doing things differently now," he said.

Makuch and Sharpe run water quality clinics for rural residents, and in two sessions per clinic, they teach, test, counsel and provide information on rural water supplies. The program encourages farmers to modernize management practices and modify traditional beliefs that farmers swore by for generations.

The impetus for change is to improve the quality of water that's not only running into Chesapeake Bay, but also the water that quenches the thirst of farmers and their livestock throughout the state, they said. Makuch said some of the problems, like bacterial contamination of a well, can often be prevented and remedied easily. Some, like nitrate contamination, due to sewage, manure and nitrogen fertilizer, can lead to serious health effects in infants if not resolved.

Sharpe said treatment techniques are an alternative way to ensure groundwater resources. "If we can't control the land uses, we'll have to use treatment. However," he said, "the simple chlorination of today is not going to be enough. In the future, we're going to have to build water treatment plants to remove organic contaminants and other contaminants from groundwater."

FmHA Committee Elections Underway

CLEONA — Election of a Farmers Home Administration county committee member will take place on June 30, County Supervisor Michael R. Orendo announced today.

The FmHA county committee assists the county office in determining the eligibility of applicants for certain types of FmHA Loans.

Farmers who live in Lebanon and Dauphin County, have their principal farming operation within the county or area for which the election is being held, and derive the principal part of their income from farming are eligible to vote.

Nominees for the Lebanon and Dauphin County FmHA county committee are: Henry Martin and Victor K. Ziegler.

Voting ballots are available from the FmHA county office at 528 East Penn Avenue, Cleona, PA 17042. Marked ballots must be received at the FmHA office by June 29.

135 Registered &
-Hi-Grade Holstein Cattle 135

The current DHIA Rolling Herd average is 18,630 M. 650 F. 3.5 test, 611 Protein consisting of (70) milk cows, (30) bred heifers, (25) open to breeding age heifers, (10) started calves to 6 mths. of age. The last May-87 DHIA test (5) cows milking over 100 lbs. of milk per day & up to 125 lbs. milk per cow. The Lactation of this dairy is as follows: (25) fresh cows, (12) due July, Aug., & Sept., (18) due Oct. & Nov., (10) due Dec. & balance in various stages of lactations. This herd has (20) cattle projected over 20,000 M. with a high cow to 27,281 M. 828 F. 863 Protein. She is Ted daughter Born 9-4-82 bred to Whales due Sept. 1-87. A few Top Sires used in this herd are as follows; Roybrook Tempo, Magic, Dreamstreet Home Run, Bootmark and others not listed. All cattle vet checked for pregnancy plus Shipping Fever & Lepto Shots. Catalogues mailed on request or at ring side. Call Jo DeMarte, (607) 863-3675 or Jack Wood (607) 863-4141 or John Weidman (607) 263-5933.

MANAGERS NOTE: This is a good home raised dairy consisting of mostly Eastern AI Breeding using only the Top Sires. The herd is a very young productive dairy with good udders, feet & legs, size & quality. This herd is open for inspection from now thru sale date. Come look this dairy over. You'll like what you see here.

TERMS: Cash or Good Check Day of Sale W/Positive ID. Lunch Available.
